Planters of the City of London for the first Colony in Virginia.' The new Association, which embraced representatives of every rank, trade, and profession, included twenty-one peers, and its list of names presents an imposing array of wealth and influence. By this charter Virginia was greatly enlarged, and made to comprise the coast-line and all islands within 100 miles of it,—200 miles north and 200 south of Point Comfort,—with all the territory within parallel lines thus distant and extending to the Pacific boundary; the Company was empowered to choose the Supreme Council in England, and, under the instructions and regulations of the last, the Governor was invested with absolute civil and military authority. . . . Thomas West (Lord Delaware), the descendant of a long line of noble ancestry, received the appointment of Governor and Captain-General of Virginia. The first expedition under the second charter, which was on a grander scale than any preceding it, and which consisted of nine vessels, sailed from Plymouth on the 1st of June, 1609. Newport, the commander of the fleet, Sir Thomas Gates, Lieutenant-General, and Sir George Somers, Admiral of Virginia, were severally authorized, whichever of them might first arrive at Jamestown, to supersede the existing administration there until the arrival of Lord Delaware, who was to embark some months later; but not being able to settle the point of precedency among themselves, they embarked together in the same vessel, which carried also the wife and daughters of Gates. . . . On the 23d of July the fleet was caught in a hurricane; a small vessel was lost, others damaged, and the 'Sea Venture,' which carried Gates, Somers, and Newport, with about 150 settlers, was cast ashore on the Bermudas. . . . Early in August the 'Blessing,' Captain Archer, and three other vessels of the delayed fleet sailed up James River, and soon after the 'Diamond,' Captain Ratcliffe, appeared, without her mainmast, and she was followed in a few days by the 'Swallow,' in like condition. The Council being all dead save Smith, he, obtaining the sympathy of the sailors, refused to surrender the government of the colony; and the newly arrived settlers elected Francis West, the brother of Lord Delaware, as temporary president. The term of Smith expiring soon after, George Percy — one of the original settlers, a brother of the Earl of Northumberland, and a brave and honorable man — was elected president. . . . Smith, about Michaelmas (September 29), departed for England, or, as all contemporary accounts other than his own state, was sent thither 'to answer some misdemeanors.' These were doubtless of a venial character; but the important services of Smith in the sustenance of the colony appear not to have been as highly esteemed by the Company as by Smith himself. He complains that his several petitions for reward were disregarded, and he never returned to Virginia. . . . At the time of his departure for England he left at Jamestown three ships, seven boats, a good stock of provisions, nearly 500 settlers, 20 pieces of cannon, 300 guns, with fishing-nets, working-tools, horses, cattle, swine, etc. Jamestown was strongly fortified with palisades, and contained between fifty and sixty houses. . . . No effort by tillage being made to replenish their provisions, the stock was soon consumed, and the horrors of famine were added to other calamities. The intense sufferings of the colonists were long remembered, and this period is referred to as 'the starving time.' In six months their number was reduced to 60, and such was the extremity of these that they must soon have perished but for speedy succor. The passengers of the wrecked 'Sea Venture,' though mourned for as lost, had effected a safe landing at the Bermudas, where, favored by the tropical productions of the islands, they, under the direction of Gates and Somers, constructed for their deliverance two vessels from the materials of the wreck and cedar-wood, the largest of the vessels being of 80 tons burden. . . . Six of the company, including the wife of Sir Thomas Gates, died on the island. The company of 140 men and women embarked on the completed vessels—which were appropriately named the 'Patience' and the 'Deliverance'—on the 10th of May, 1610, and on the 23d they landed at Jamestown. . . . So forlorn was the condition of the settlement that Gates reluctantly resolved to abandon it." The whole colony was accordingly embarked and was under sail down the river, when it met a fleet of three vessels, bringing supplies and new settlers from England, with Lord Delaware, who had resolved to come out in person, as Governor and Captain-General of Virginia. Gates and his disheartened companions turned back with these new comers, and all were set vigorously at work to restore the settlement. "The administration of Delaware, though ludicrously ostentatious for so insignificant a dominion, was yet highly wholesome, and under his judicious discipline the settlement was restored to order and contentment." His health failing, Lord Delaware returned to England the following spring, whither Sir Thomas Gates had gone. Sir Thomas Dale had already been sent out with the appointment of high marshal, bearing a code of extraordinary laws which practically placed the colony under martial rule. Gates returned in June, 1611, with 300 additional settlers and a considerable stock of cows and other cattle. During that year and the next several new settlements were founded, at Dutch Gap, Henrico, and Bermuda Hundred, individual grants of property began to be made, and many signs of prosperity appeared. The year 1612 "was a marked one, in the inauguration by John Rolfe [who married Pocahontas two years later, having lost his first wife] of the systematic culture of tobacco,—a staple destined to exert a controlling influence in the future welfare and progress of the colony, and soon, by the paramount profit yielded by its culture, to subordinate all other interests, agricultural as well as manufacturing." In the spring of 1613, Sir Thomas Gates left the colony, finally, returning to England, and the government fell to the hands of Dale, who remained at the head until 1616.—R. A. Brock, *Virginia*, 1606–1689 (*Narrative and Critical Hist. of Am.*, *v.* 3, *ch.* 5).

A. D. 1613.—The French settlements in Acadia destroyed by Argall and the Dutch at New York forced to promise tribute. See Canada: A. D. 1610–1613; and New York: A. D. 1610–1614.

A. D. 1617-1619.—The evil days of Argall, and the better administration that followed. —Meeting of the first provincial Assembly.— "A party of greedy and unprincipled adventurers headed by Lord Rich, soon after the Earl of Warwick, acquired sufficient influence in the Company to nominate a creature of their own as Deputy-Governor. Their choice of Argall [Samuel Argall] would in itself have tainted their policy with suspicion. Whether dealing with the Indians, the French, or the Dutch, he had shown himself [see CANADA: A. D. 1610–1613; and NEW YORK: A. D. 1610–1614] able, resolute, and unscrupulous. To do him justice, he seems at least to have understood the principle of Tiberius, that a shepherd should shear his sheep, not flay them. His first measure was to provide a sufficient supply of corn for the maintenance of the colony. With that he appeared to think that his duty to the settlers was at end. . . . An event soon occurred which released Argall from the fear of a superior, and probably emboldened him in his evil courses. Lord Delaware, who had sailed in a large vessel with 200 emigrants," died on the voyage. "Argall now began to show that his care for the well-being of the colony was no better than the charity of the cannibal who feeds up his prisoner before making a meal on him. Trade with the Indians was withheld from individuals, but, instead of being turned to the benefit of the Company, it was appropriated by Argall. The planters were treated as a slave-gang working for the Deputy's own private profit. The Company's cattle were sold, and the proceeds never accounted for. During this time a great change had come over the Company at home. An energetic and public-spirited party had been formed, opposed alike to Sir Thomas Smith and to Lord Rich. Their leader was Sir Edwin Sandys, a member of that country party which was just beginning to take its stand against the corruptions of the court policy. Side by side with him stood one whose name has gained a wider though not a more honourable repute, the follower of Essex, the idol of Shakespeare, the brilliant, versatile Southampton. . . . The . . . year 1619 was remarkable in the annals of the colony. It is hardly an exaggeration to say that it witnessed the creation of Virginia as an independent community. From the beginning of that year we may date the definite ascendancy of Sandys and his party, an ascendancy which was maintained till the dissolution of the Company, and during which the affairs of Virginia were administered with a degree of energy, unselfishness, and statesmanlike wisdom, perhaps unparalleled in the history of corporations. One of the first measures was to send out Yeardley to supersede Argall. . . . When Yeardley arrived he found that Argall had escaped. No further attempt seems to have been made to bring him to justice. In the next year he was commanding a ship against the Algerines." Soon afterwards, Sir Edwin Sandys was placed officially at the head of the Company, by his election to be Treasurer, in the place of Sir Thomas Smith. "About the same time that these things were doing in England, a step of the greatest importance was being taken in Virginia. Yeardley, in obedience to instructions from the Company, summoned an Assembly of Burgesses from the various hundreds and plantations. At one step Virginia, from being little better than a penal settlement, ruled by martial law, became invested with important, though not full, rights of self-government. Though we have no direct evidence of the fact, there is every probability that during the administrations of Yeardley and Argall the number of independent planters possessing estates of their own, with labourers employed in the service of their masters, not of the Company, had increased. Unless such an influence had been at work, it is scarcely possible that the experiment of constitutional government should have succeeded, or even have been tried. On the 30th of July, 1619, the first Assembly met in the little church at Jamestown. . . . In England the Company under its new government set to work with an energy before unknown to it, to improve the condition of the colony. . . . To check the over-production of tobacco a clause was inserted in all fresh patents of land binding the holder to cultivate a certain quantity of other commodities. Everything was done to encourage permanent settlers rather than mere traders. Apprentices, unmarried women, and neat cattle were sent out. New forms of industry, too, were set on foot, such as timber yards, silk manufactures, iron foundries, and vineyards. . . . In the year 1619 alone over 1,200 persons were sent out, half as private settlers or servants, half at the expense of the Company." —J. A. Doyle, *The English in Am.: Virginia, &c., ch.* 6.

A. D. 1619.—Introduction of Negro Slavery. —"In the month of August, 1619, five years after the commons of France had petitioned for the emancipation of every serf in every fief, a Dutch man-of-war entered James River and landed 20 negroes for sale. This is the sad epoch of the introduction of negro slavery; but the traffic would have been checked in its infancy had it remained with the Dutch. Thirty years after this first importation of Africans, Virginia to one black contained fifty whites; and, after seventy years of its colonial existence, the number of its negro slaves was proportionably much less than in several of the northern states at the time of the war of independence."—G. Bancroft, *Hist. of the U. S.* (*Author's last rev.*), *pt.* 1, *ch.* 8 (*v.* 1).

A. D. 1622-1624.—Plot and Massacre by the Indians.—Arbitrary dissolution of the Virginia Company by King James.— "On the 22nd of March, 1622, a memorable massacre occurred in the Colony. . . . On the evening before, and on that morning, the savages as usual came unarmed into the houses of the planters, with fruits, fish, turkies and venison to sell. In some places they actually sate down to breakfast with the English. At about the hour of noon, the savages rising suddenly and everywhere at the same time, butchered the colonists with their own implements, sparing neither age, sex, nor condition. Three hundred and forty-seven men, women and children fell in a few hours. . . . The destruction might have been universal but for the disclosure of a converted Indian, named Chanco, who, during the night before the massacre, revealed the plot to one Richard Pace, with whom he lived. Pace . . . repaired before day to Jamestown and gave the alarm to Sir

Francis Wyatt, the Governor. His vigilance saved a large part of the Colony. . . . The court of James I., jealous of the growing power of the Virginia Company and of its too republican spirit, seized upon the occasion of the massacre to attribute all the calamities of the Colony to its mismanagement and neglect, and thus to frame a pretext for dissolving the charter." The Company, supported by the colonists, resisted the high-handed proceedings of the King and his officers, but vainly. In November, 1624, "James I. dissolved the Virginia Company by a writ of Quo Warranto, which was determined only upon a technicality in the pleadings. The company had been obnoxious to the ill will of the King on several grounds. The corporation had become a theatre for rearing leaders of the opposition, many of its members being also members of parliament. . . . Charles I. succeeding [1625] to the crown and principles of his father, took the government of Virginia into his own hands. The company thus extinguished had expended £150,000 in establishing the Colony, and transported 9,000 settlers without the aid of government. The number of stockholders, or adventurers, as they were styled, was about 1,000, and the annual value of exports from Virginia was, at the period of the dissolution of the charter, only £20,000. The company embraced much of the rank, wealth, and talent of the kingdom. . . . As the act provided no compensation for the enormous expenditure incurred, it can be looked upon as little better than confiscation effected by chicane and tyranny. Nevertheless the result was undoubtedly favorable to the Colony."—C. Campbell, *Introd. to the Hist. of the Colony and Ancient Dominion of Va., ch.* 15–16.

A. D. 1639-1652.—Loyalty to King Charles. —The Refuge of the Cavaliers.—"Under Charles I. little worthy of notice occurred in the political history of Virginia. . . . Attempts were made to raise a revenue on tobacco, and subsequently to establish a royal monopoly of the tobacco trade. The attempts were averted, and the king contented himself with the preemption of the Virginian tobacco, and with enacting that no foreign vessel should be allowed to trade with Virginia, or to carry Virginian goods. In 1639 an attempt was made to re-establish the authority of the company, but was strenuously and successfully opposed by the assembly. That the royal government sat lightly on Virginia may be inferred from the loyal tone which had thus early become a characteristic of the colony. After the establishment of the commonwealth, 'Virginia was whole for monarchy and the last country belonging to England that submitted to obedience to the commonwealth of England,' and under Berkeley's government the plantation was a safe refuge for the defeated cavaliers. . . . But as soon as two or three parliamentary ships appeared [1652] all thoughts of resistance were laid aside. Yet, whether from lenity or caution, the parliament was satisfied with moderate terms. The submission of the colonists was accepted as free and voluntary."—J. A. Doyle, *The American Colonies, ch.* 2.

A. D. 1644.—Fresh Indian outbreak and massacre of whites.—"After a peace of five or six years, the Indians, provoked by continued encroachments on their lands, and instigated, it is said, by the aged chief Opechancanough, formed a new scheme for the extermination of the colonists. They were encouraged by signs of discord among the English, having seen a fight in James River between a London ship for the Parliament and a Bristol ship for the king. Five hundred persons perished in the first surprise, which took place, according to Winthrop, the day before Good Friday, appointed by the governor, 'a courtier, and very malignant toward the way of our churches,' to be observed as a fast for the good success of the king. For defense, the planters were concentrated in a few settlements; . . . forts were built at the points most exposed; and a ship was sent to Boston for powder, which, however, the General Court declined to furnish. This occasion was taken by 'divers godly-disposed persons' of Virginia to remove to New England. . . . The Indians were presently driven from their fastnesses. Opechancanough, decrepit and incapable of moving without assistance, . . . was taken prisoner and carried to Jamestown, where he was shot in the back by a vindictive soldier appointed to guard him. The Indian towns were broken up, and their 'clear lands possessed by the English to sow wheat in.' Opechancanough's successor submitted; and a peace was made by act of Assembly, the Indians ceding all the lands between James and York Rivers. No Indian was to come south of York River under pain of death. The Powhatan confederacy was dissolved. The Indians of lower Virginia sunk into servile dependence, and dwindled away, or, migrating to the south and west, were mingled and confounded with other tribes."—R. Hildreth, *Hist. of the U. S., ch.* 11 (*v.* 1).

A. D. 1650-1660. — Under the Commonwealth and Cromwell, and the Stuart Restoration. — Two sides of the story. — Origin of the name of "The Old Dominion."—"After this, Sir William Berkeley [governor] made a new peace with the Indians, which continued for a long time unviolated. . . . But he himself did not long enjoy the benefit of this profound peace; for the unhappy troubles of king Charles the first increasing in England, proved a great disturbance to him and to all the people. They, to prevent the infection from reaching that country, made severe laws against the Puritans, though there were as yet none among them. But all correspondence with England was interrupted, supplies lessened, and trade obstructed. . . . At last the king was traitorously beheaded in England, and Oliver installed Protector. However, his authority was not acknowledged in Virginia for several years after, till they were forced to it by the last necessity. For in the year 1651, by Cromwell's command, Captain Dennis, with a squadron of men of war, arrived there from the Carribbee islands, where they had been subduing Bardoes. The country at first held out vigorously against him, and Sir William Berkeley, by the assistance of such Dutch vessels as were then there, made

a brave resistance. But at last Dennis contrived a stratagem which betrayed the country. He had got a considerable parcel of goods aboard, which belonged to two of the Council, and found a method of informing them of it. By this means they were reduced to the dilemma, either of submitting or losing their goods. This occasioned factions among them; so that at last, after the surrender of all the other English plantations, Sir Wm. was forced to submit to the usurper on the terms of a general pardon. However, it ought to be remembered, to his praise, and to the immortal honor of that colony, that it was the last of all the king's dominions that submitted to the usurpation; and afterwards the first that cast it off, and he never took any post or office under the usurper. Oliver had no sooner subdued the plantations, but he began to contrive how to keep them under, that so they might never be able for the time to come to give him farther trouble. To this end, he thought it necessary to break off their correspondence with all other nations, thereby to prevent their being furnished with arms, ammunition, and other warlike provisions. According to this design, he contrived a severe act of Parliament [1651], whereby he prohibited the plantations from receiving or exporting any European commodities but what should be carried to them by Englishmen, and in English built ships [see NAVIGATION ACT, ENGLISH]. . . . Notwithstanding this act of navigation, the Protector never thought the plantations enough secured, but frequently changed their governors, to prevent their intriguing with the people. So that, during the time of the usurpation, they had no less than three governors there, namely, Diggs, Bennet and Mathews. The strange arbitrary curbs he put upon the plantations exceedingly afflicted the people . . . and inspired them with a desire to use the last remedy, to relieve themselves from this lawless usurpation. In a short time afterwards a fair opportunity happened; for Governor Mathews died, and no person was substituted to succeed him in the government. Whereupon the people applied themselves to Sir William Berkeley (who had continued all this time upon his own plantation in a private capacity) and unanimously chose him their governor again [March, 1660]. Sir William . . . told the people . . . that if he accepted the government it should be upon their solemn promise, after his example, to venture their lives and fortunes for the king, who was then in France. This was no great obstacle to them, and therefore with an unanimous voice they told him they were ready to hazard all for the king. . . . Sir William Berkeley embraced their choice, and forthwith proclaimed Charles II. king of England, Scotland, France, Ireland and Virginia, and caused all process to be issued in his name. Thus his majesty was actually king in Virginia before he was so in England. But it pleased God to restore him soon after to the throne of his ancestors."—R. Beverley, *Hist. of Va., bk.* 1, *ch.* 4.

—"The government of Virginia, under the Commonwealth of England, was mild and just. While Cromwell's sceptre commanded the respect of the world, he exhibited generous and politic leniency towards the infant and loyal colony. She enjoyed during this interval free trade, legislative independence and internal peace. The governers were men who by their virtues and moderation won the confidence and affections of the people. No extravagance, rapacity, or extortion, could be alleged against the administration. Intolerance and persecution were unknown, with the single exception of a rigorous act banishing the quakers. But rapine, extravagance, extortion, intolerance and persecution were all soon to be revived under the auspices of the Stuarts. . . . Richard Cromwell resigned the protectorate in March, 1660. Matthews, governor-elect, had died in the January previous. England was without a monarch; Virginia without a governor. Here was a two fold interregnum. The assembly, convening on the 13th of March, 1660, declared by their first act that, as there was then in England 'noe resident absolute and generall confessed power,' therefore the supreme government of the colony should rest in the assembly. By the second act, Sir William Berkeley was appointed governor, and it was ordered that all writs should issue in the name of the assembly. . . . No fact in our history has been more misunderstood and misrepresented than this reappointment of Sir William Berkeley, before the restoration of Charles II. . . . Sir William was elected, not by a tumultuary assemblage of the people, but by the assembly; the royal standard was not raised upon the occasion, nor was the king proclaimed. Sir William, however, made no secret of his loyalty. . . . Sir William was elected on the 21st of the same month, about two months before the restoration of Charles II. Yet the word king, or majesty, occurs no where in the legislative records, from the commencement of the Commonwealth in England until the 11th of October, 1660—more than four months after the restoration. Virginia was indeed loyal, but she was too feeble to express her loyalty."—C. Campbell, *Introd. to the Hist. of the Colony and Ancient Dominion of Va., ch.* 21-22.

—"There is no doubt whatever that if the Virginians could have restored the King earlier they would have done so; and Berkeley, who is known to have been in close communication and consultation with the leading Cavaliers, had sent word to Charles II. in Holland, toward the end of the Commonwealth, that he would raise his flag in Virginia if there was a prospect of success. This incident has been called in question. It is testified to by William Lee, Sheriff of London, and a cousin of Richard Lee, Berkeley's emissary, as a fact within his knowledge. Charles declined the offer, but was always grateful to the Virginians. The country is said to have derived from the incident the name of the 'Old Dominion,' where the King was King, or might have been, before he was King in England."—J. E. Cooke, *Virginia, pt.* 2, *ch.* 10.

A. D. 1651-1672.—The English Navigation Acts and trade restrictions. See NAVIGATION LAWS; also UNITED STATES OF AM.: A. D. 1651-1672.

A. D. 1660-1677.—The Restoration and its rewards to Virginia loyalty.—Oppression, discontent, and Bacon's Rebellion.—At the time of the restoration of the English monarchy, in the person of Charles II., the colony of Virginia "numbered not far from 50,000 souls, a large proportion of whom, especially, we may suppose those of middle life and most active habits, were natives of the soil, bound to it by the strongest ties of interest and affection, and by their hopes of what it was destined to become in the opening

future. Here was a state of things, comprising, in the apprehensions of the people, many of the elements of the highest happiness and prosperity. . . . But all this was totally and suddenly changed, and universal distress brought upon the land, by the new restrictive clauses added to the original Navigation Act, by the first Parliament of Charles. By the act of the Long Parliament it had been simply provided that foreign vessels should import into England no other products than such as were grown or manufactured in their own country; a shaft aimed principally at the Dutch. . . . By Charles's Commons this first hint was . . . expanded into a voluminous code of monopolizing enactments, by which the trade of the world was regulated on the principle of grasping for England every possible commercial advantage, and inflicting upon all other nations the greatest possible commercial injury. . . . Upon the colonies, one and all, this cruel policy bore with a weight which almost crushed them. . . . From 1660, when this monopolizing policy took its beginning, the discontent of the people increased day by day, as each new prohibition was proclaimed. Commerce lay dead. Tobacco would no longer pay for its cultivation, much less enrich the laborious planter; manufactures, as that of silk, after being attempted, failed to bring the hoped-for relief, and there seemed no prospect but starvation and ruin. What wonder that mischief lay brewing in the hearts of a people who, for their almost slavish loyalty, met only these thankless returns of injury and injustice; for the Virginians of that day were monarchists in the full meaning of the term. . . . Other causes conspired with these purely political ones to bring the public mind of Virginia into such a state of deep exasperation as to find its relief only in insurrection. Of these, one was particularly a source of irritation; namely, the grants of vast tracts of territory, made by the wasteful and profligate King to his needy and profligate favorites, made wholly irrespective of present owners and occupiers, who were transferred, like serfs of the soil, to any great patentee to whom the caprice of Charles chose to consign them." The discontent culminated in 1676, under the influence of an excitement growing out of trouble with the Indians. After more than thirty years of quiet, the natives became hostile and threatening. "Various outrages were first committed by the Indians, on whom the whites, as usual, retaliated; murder answered to murder, burning to burning, till, throughout the whole border country, were kindled the flames of an exterminating Indian war, accompanied by all its peculiar horrors. In the excited state of the public mind, these new calamities were laid at the door of the government." Governor Berkeley was accused of having an interest in the profits of trade with the Indians which restrained him from making war on them. Whether the charge was true or false, he gave color to it by his conduct. He took no steps to protect the colony. Nor would he authorize any self-defensive measures on the part of the people themselves. They "went so far as to engage that, if the Governor would only commission a general, whomsoever he would, they would 'follow him at their own charge.' Still they were not heard. Under such circumstances of neglect and excessive irritation, they took the case into their own hands." They chose for their leader Nathaniel Bacon, a young Englishman of education, energy and talent, who had been in the colony about three years, and who had already attained a seat in the Governor's Council. Bacon accepted the responsibility, "commission or no commission," and, in the spring of 1676, put himself at the head of 500 men, with whom he marched against the Indians. The governor, after formally proclaiming him a rebel, raised another army and marched, not against the Indians, but against Bacon. He was hardly out of Jamestown, however, before the people of that neighborhood rose and took possession of the capital. On learning of this fresh revolt, he turned back, and found himself helpless to do anything but submit. The result was the summoning of a new Assembly, to which Bacon was elected from his county, and the making of some progress, apparently, towards a curing of abuses and the removing of causes of discontent. But something occurred—exactly what has never been made clear—which led to a sudden flight on Bacon's part from Jamestown, and the gathering of his forces once more around him. Re-entering the capital at their head, he extorted from Governor Berkeley a commission which legalized his military office, and armed with this authority he proceeded once more against the Indians. "But as soon as he was sufficiently distant to relieve the Governor and his friends from their fears, all that had been granted was revoked; a proclamation was issued, again denouncing Bacon as a rebel, setting a price upon his head, and commanding his followers to disperse." Again, Bacon and his army retraced their steps and took possession of Jamestown, the governor flying to Accomac. A convention of the inhabitants of the colony was then called together, which adopted a Declaration, or Oath, in which they fully identified themselves with Bacon in his course, and swore to uphold him. The latter then moved once more against the Indians; Berkeley once more got possession of the seat of government, and, once more, Bacon (who had fought the Indians meantime at Bloody Run and beaten them) came back and drove him out. "The whole country . . . was with Bacon, and merely a crowd of cowardly adventurers about the Governor. Nothing would seem, at this moment, to have stood between Bacon and the undisputed, absolute control of the colony, had no unforeseen event interposed, as it did, to change the whole aspect of affairs." This unforeseen event was the sudden death of Bacon, which occurred in January, 1677, at the house of a friend. "Some mystery attaches to the manner of it," and there were, of course, sinister whispers of foul play. "But, however and wherever Bacon died, it could never be discovered where he was buried, nor what disposition had been made of his body. . . . The death of Bacon was, in effect, the restoration of Sir William Berkeley to his lost authority, and the termination of the war; there being not an individual, among either his counsellors or officers, of capacity sufficient to make good his place. . . . Berkeley, gradually subduing all opposition, and making prisoners of many of the prime movers of the revolt, in a short time saw the authority of his government completely reëstablished. . . . The historians of the period inform us that no less than 25 per-

sons were executed during the closing period of the rebellion and the few next succeeding months." — W. Ware, *Memoir of Nathaniel Bacon* (*Library of Am. Biog., series* 2, *v.* 3).

A. D. 1710-1716.—Crossing the Blue Ridge.—The Knights of the Golden Horseshoe.—Possession taken of the Shenandoah Valley.—"Lord Orkney is made Governor, but as usual sends his deputy, and in the year 1710 appears the stalwart soldier and ruler, Sir Alexander Spotswood. Alexander Spotswood, or Spottiswoode, as his family were called in Scotland, rises like a landmark above the first years of the century. When he came to Virginia he was only 34 and in the bloom of his manhood. But he had already fought hard, and his faculties as a soldier and ruler were fully developed. . . . The Virginians received Spotswood with open arms. He was a man after their own heart, and brought with him when he came (June 1710) the great writ of habeas corpus. The Virginia people had long claimed that this right was guaranteed to them by Magna Charta, since they were equally free Englishmen with the people of England. Now it was conceded, and the great writ came,—Spotswood's letter of introduction. It was plain that he was not a new Berkeley looking to the King's good pleasure as his law, or a new Nicholson ready to imprison people or put halters around their necks; but a respecter of human freedom and defender of the right. . . . In . . . 1716, Governor Alexander Spotswood set out on an expedition which much delighted the Virginians. There was a very great longing to visit the country beyond the Blue Ridge. That beautiful unknown land held out arms of welcome, and the Governor, who had in his character much of the spirit of the hunter and adventurer, resolved to go and explore it. Having assembled a party of good companions, he set out in the month of August, and the gay company began their march toward the Blue Ridge Mountains. The chronicler of the expedition describes the picturesque cavalcade followed by the pack-horses and servants,—'rangers, pioneers, and Indians'; how they stopped to hunt game; bivouacked 'under the canopy'; laughed, jested, and regaled themselves with 'Virginia wine, white and red, Irish usquebaugh, brandy, shrub, two kinds of rum, champagne, canary, cherry-punch, and cider.' In due time they reached the Blue Ridge, probably near the present Swift Run Gap, and saw, beyond, the wild valley of the Shenandoah. On the summit of the mountain they drank the health of the King, and named two neighboring peaks 'Mt. George' and 'Mt. Alexander,' after his Majesty and the Governor; after which they descended into the valley and gave the Shenandoah the name of the 'Euphrates.' Here a bottle was buried — there were, no doubt, a number of empty ones — containing a paper to testify that the valley of the Euphrates was taken possession of in the name of his Majesty, George I. Then the adventurers reascended the mountain, crossed to the lowland, and returned to Williamsburg. This picturesque incident of the time gave rise to the order of the 'Knights of the Golden Horseshoe.' The horses had been shod with iron, which was unusual, as a protection against the mountain roads; and Spotswood sent to London and had made for his companions small golden horseshoes set with garnets and other jewels, and inscribed 'Sic juvat transcendere montes.'"—J. E. Cooke, *Virginia, pt.* 2, *ch.* 21–22.

A. D. 1744.—Treaty with the Six Nations and purchase of the Shenandoah Valley.—"The Six Nations still retained the right to traverse the great valley west of the Blue Ridge. Just at this inopportune moment [1743], some of their parties came into bloody collision with the backwoodsmen of Virginia, who had penetrated into that valley. Hostilities with the Six Nations, now that war was threatened with France, might prove very dangerous, and Clinton [governor of New York] hastened to secure the friendship of these ancient allies by liberal presents; for which purpose, in conjunction with commissioners from New England, he held a treaty at Albany. . . . The difficulties between Virginia and the Six Nations were soon after [1744] settled in a treaty held at Lancaster, to which Pennsylvania and Maryland were also parties, and in which, in consideration of £400, the Six Nations relinquished all their title to the valley between the Blue Ridge and the central chain of the Allegany Mountains."— R. Hildreth, *Hist. of the U. S., ch.* 25 (*v.* 2).

A. D. 1763. — The Parsons' Cause and Patrick Henry. — "In Virginia as well as in Pennsylvania, a vigorous opposition to vested rights foreshadowed what was to come. A short crop of tobacco having suddenly enhanced the price of that staple, or, what is quite as likely, the issue of paper money in Virginia, first made that same year [1755], having depreciated the currency, the Assembly had passed a temporary act, authorizing the payment of all tobacco debts in money at twopence per pound — the old rate, long established by usage. Three years

after, under pretence of an expected failure of the crop, this tender act was renewed. Francis Fauquier, who had just succeeded Dinwiddie as lieutenant governor, a man of more complying temper than his predecessor, readily consented to it. The salaries of the parish ministers, some sixty-five in number, were payable in tobacco. They were likely to be considerable losers by this tender law; and, not content with attacking it in pamphlets, they sent an agent to England, and by the aid of Sherlock, bishop of London, procured an order in council pronouncing the law void. Suits were presently brought to recover the difference between twopence per pound in the depreciated currency and the tobacco to which by law the ministers were entitled. In defending one of these suits [1763], the remarkable popular eloquence of Patrick Henry displayed itself for the first time. Henry was a young lawyer, unconnected with the ruling aristocracy of the province, and as yet without reputation or practice. The law was plainly against him, and his case seemed to be hopeless. He had, however, a strong support in the prevailing prejudice in favor of the tender law, and in the dissatisfaction generally felt at the king's veto upon it. Addressing the jury in a torrent of eloquence as brilliant as it was unexpected, he prevailed upon them to give him a verdict. The Assembly voted money to defend all suits which the parsons might bring; and, notwithstanding their clear legal right in the matter, they thought it best to submit without further struggle."—R. Hildreth, *Hist. of the U. S., ch.* 27 (*v.* 2).

A. D. 1775.—The end of Royal Government.—Lord Dunmore's flight.—Not long after the excited demonstrations which followed Governor Dunmore's removal of powder from the public magazine at Williamsburg, the governor received Lord North's "conciliatory proposition," and "he convened the House of Burgesses, on the 1st of June, to take it into consideration. This withdrew Peyton Randolph from Congress, as had been anticipated, and Mr. Jefferson succeeded to the vacancy. But the latter was not permitted to leave the Burgesses before an answer to the ministerial proposition was framed. . . . How much the answer was 'enfeebled' by the doubts and scruples of the moderate members, we cannot say, but it rings true revolutionary metal, and it was a noble lead off for the Assemblies of the other Colonies. . . . The House, after the customary expression of a desire for reconciliation, declare that they have examined it (the Ministerial proposition) minutely, viewed it in every light in which they are able, and that, 'with pain and disappointment, they must ultimately declare that it only changed the form of oppression without lightening its burden.' . . . In the meantime events had transpired which soon afterwards terminated the official career of the Earl of Dunmore, and with it the royal government in Virginia. On the 5th of June, three men who entered the public magazine were wounded by a spring gun placed there by the orders of the Governor, and on the 7th, a committee of the House, appointed to inspect the magazine, found the locks removed from the serviceable muskets, and they also discovered the powder which had been placed in mine. These things highly exasperated the multitude, and on a rumor getting abroad that the same officer who had before carried off the powder was again advancing towards the city with an armed force, they rose in arms. The Governor's assurance that the rumor was unfounded restored tranquillity. He, however, left the city in the night with his family and went on board the Fowey, lying at York, twelve miles distant. He left a message declaring that he had taken this step for his safety, and that thenceforth he should reside and transact business on board of the man of war! An interchange of messages, acrid and criminatory on his part, firm and spirited on the part of the House, was kept up until the 24th of June; when, on his final refusal to receive bills for signature except under the guns of an armed vessel, the House declared it a high breach of privilege, and adjourned to the 12th of October. But a quorum never afterwards attended. . . . We soon find the Earl of Dunmore carrying on a petty but barbarous predatory warfare against the people he had so lately governed."—H. S. Randall, *Life of Jefferson, v.* 1, *ch.* 3.

A. D. 1775-1776.—Lord Dunmore's warfare.—Norfolk destroyed.—"Having drawn together a considerable force, Dunmore ascended Elizabeth River to the Great Bridge, the only pass by which Norfolk can be approached from the land side; dispersed some North Carolina militia collected there; made several prisoners; and then, descending the river [November 1775], took possession of Norfolk. The rise of that town had been very rapid. Within a short time past it had become the principal shipping port of Virginia. Its population amounted to several

thousands, among whom were many Scotch traders not well disposed to the American cause. Fugitive slaves and others began now to flock to Dunmore's standard. A movement was made in his favor on the east shore of Maryland, which it required a thousand militia to suppress. The Convention of Virginia, not a little alarmed, voted four additional regiments, afterward increased to seven, all of which were presently taken into continental pay. . . . Woodford, with the second Virginia regiment, took possession of the causeway leading to the Great Bridge, which was still held by Dunmore's troops. An attempt to dislodge the Virginians having failed, with loss, Dunmore abandoned the bridge and the town, and again embarked. Norfolk was immemediately occupied by Woodford, who was promptly joined by Howe's regiment from North Carolina. After a descent on the eastern shore of Virginia [January, 1776], to whose aid marched two companies of Maryland minute men, being re-enforced by the arrival of a British frigate, Dunmore bombarded Norfolk. A party landed and set it on fire. . . . The part which escaped was presently burned by the provincials, to prevent it from becoming a shelter to the enemy. Thus perished, a prey to civil war, the largest and richest of the rising towns of Virginia. Dunmore continued, during the whole summer, a predatory warfare along the rivers, of which his naval superiority gave him the command, burning houses and plundering plantations, from which he carried off upward of 1,000 slaves. He was constantly changing his place to elude attack; but watched, pursued, and harassed, he finally found it necessary to retire to St. Augustine with his adherents and his plunder."—R. Hildreth, *Hist. of the U. S., ch.* 32 (*v.* 3).

A. D. 1776. — Independence declared and a Constitution adopted.—Declaration of Rights. —"There was a sudden change in public sentiment; and the idea of independence, said to be alarming to Virginians in March [1776] was welcome to them in April. One writes on the 2d: 'Independence is now the talk here. . . . It will be very soon, if not already, a favorite child.' Another, on the 12th, writes: 'I think almost every man, except the treasurer, is willing to declare for independence.'" On the 23d, the Charlotte County Committee charged its delegates in convention to use their best endeavors "that the delegates which are sent to the General Congress be instructed immediately to cast off the British yoke." On the next day, a majority of the freeholders of James City took similar action. "In May, the avowals for independence were numerous. In this spirit and with such aims, a new convention was chosen, and on the 6th of May met in Williamsburg. It contained illustrious men,—among them, James Madison, in the twenty-fifth year of his age; George Mason, in the maturity of his great powers; Richard Bland, Edmund Pendleton, and Patrick Henry, rich in Revolutionary fame. . . . On the 14th of May the convention went into a committee of the whole on the state of the colony, with Archibald Carey in the chair; when Colonel Nelson submitted a preamble and resolutions on independence, prepared by Pendleton. These were discussed in two sittings of the committee, and then reported to the House. They were opposed chiefly by delegates from the Eastern District, but were advocated by Patrick Henry, and passed unanimously when 112 members were present,—about 20 absenting themselves. This paper enumerated the wrongs done to the colonies . . . and instructed the delegates appointed to represent the colony in the General Congress 'to propose to that respectable body to declare the United Colonies free and independent States,' and to 'give the assent of the colony to measures to form foreign alliances and a confederation,—provided the power of forming government for the internal regulations of each colony be left to the colonial legislatures.' The same paper also provided for a committee to form a plan of government for Virginia. This action was transmitted by the President to the other assemblies, accompanied by a brief circular. . . . It was hailed by the patriots in other colonies with enthusiasm. . . . The convention agreed (June 12) upon the famous Declaration of Rights declaring all men equally free and independent, all power vested in and derived from the people, and that government ought to be for the common benefit; also that all men are equally entitled to the free exercise of religion according to the dictates of conscience. It also complied with the recommendation of Congress, by forming a constitution and electing a governor and other officers."—R. Frothingham, *The Rise of the Republic, ch.* 11.

Also in: H. B. Grigsby, *The Virginia Conv. of* 1776.—W. C. Rives, *Life and Times of Madison, v.* 1, *ch.* 5.—K. M. Rowland, *Life of Geo. Mason, v.* 1, *ch.* 7.—See, also, United States of Am.: A. D. 1776-1779.

The following is the text of the Declaration of Rights:

"A Declaration of Rights, made by the Representatives of the good People of Virginia, assembled in full and free Convention, which rights do pertain to them and their posterity as the basis and foundation of government. I. That all men are by nature equally free and independent, and have certain inherent rights, of which, when they enter into a state of society, they cannot by any compact, deprive or divest their posterity; namely, the enjoyment of life and liberty, with the means of acquiring and possessing property, and pursuing and obtaining happiness and safety. II. That all power is vested in, and consequently derived from, the people; that magistrates are their trustees and servants, and at all times amenable to them. III. That government is, or ought to be, instituted for the common benefit, protection and security of the people, nation or community; of all the various modes and forms of government, that is best which is capable of producing the greatest degree of happiness and safety, and is most effectually secured against the danger of maladministration; and that, when a government shall be found inadequate or contrary to these purposes, a majority of the community hath an indubitable, unalienable and indefeasible right to reform, alter or abolish it, in such manner as shall be judged most conducive to the public weal. IV. That no man, or set of men, are entitled to exclusive or separate emoluments or privileges from the community but in con-

sideration of public services, which not being descendible, neither ought the offices of magistrate, legislator or judge to be hereditary. V. That the legislative, executive and judicial powers should be separate and distinct; and that the members thereof may be restrained from oppression, by feeling and participating the burthens of the people, they should, at fixed periods, be reduced to a private station, return into that body from which they were originally taken, and the vacancies be supplied by frequent, certain and regular elections, in which all, or any part of the former members to be again eligible or ineligible, as the laws shall direct. VI. That all elections ought to be free, and that all men having sufficient evidence of permanent common interest with, and attachment to the community, have the right of suffrage, and cannot be taxed, or deprived of their property for public uses, without their own consent, or that of their representatives so elected, nor bound by any law to which they have not in like manner assented, for the public good. VII. That all power of suspending laws, or the execution of laws, by any authority, without consent of the representatives of the people, is injurious to their rights, and ought not to be exercised. VIII. That in all capital or criminal prosecutions, a man hath a right to demand the cause and nature of his accusation, to be confronted with the accusers and witnesses, to call for evidence in his favor, and to a speedy trial by an impartial jury of twelve men of his vicinage, without whose unanimous consent he cannot be found guilty; nor can he be compelled to give evidence against himself; that no man be deprived of his liberty, except by the law of the land or the judgment of his peers. IX. That excessive bail ought not to be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted. X. That general warrants, whereby an officer or messenger may be commanded to search suspected places without evidence of a fact committed, or to seize any person or persons not named, or whose offence is not particularly described and supported by evidence, are grievous and oppressive, and ought not to be granted. XI. That in controversies respecting property, and in suits between man and man, the ancient trial by jury of twelve men is preferable to any other, and ought to be held sacred. XII. That the freedom of the press is one of the great bulwarks of liberty, and can never be restrained but by despotic governments. XIII. That a well regulated militia, composed of the body of the people, trained to arms, is the proper, natural and safe defence of a free State; that standing armies in time of peace, should be avoided as dangerous to liberty; and that in all cases the military should be under strict subordination to, and governed by, the civil power. XIV. That the people have a right to uniform government; and therefore, that no government separate from or independent of the government of Virginia, ought to be erected or established within the limits thereof. XV. That no free government, or the blessing of liberty, can be preserved to any people, but by a firm adherence to justice, moderation, temperance, frugality and virtue, and by a frequent recurrence to fundamental principles. XVI. That religion, or the duty which we owe to our Creator, and the manner of discharging it, can be directed only by reason and conviction, not by force or violence; and therefore all men are equally entitled to the free exercise of religion, according to the dictates of conscience; and that it is the duty of all to practice Christian forbearance, love and charity towards each other.

A. D. 1779-1786.—Settlement of boundaries with Pennsylvania.—The Pan-handle.—"In 1779 commissioners appointed by the two States met at Baltimore to agree upon the common boundaries of Pennsylvania and Virginia. . . . On both sides there was an evident desire to end the dispute. Various lines were proposed and rejected. On August 31 the commissioners signed this agreement: 'To extend Mason and Dixon's line due west five degrees of longitude, to be computed from the River Delaware, for the southern boundary of Pennsylvania, and that a meridian line drawn from the western extremity thereof to the northern limit of the said State be the western boundary of Pennsylvania forever.' This contract was duly ratified by the legislatures of the two States. In 1785 Mason and Dixon's line was extended, and the southwestern corner of Pennsylvania established. The 'Pan-handle' is what was left of Virginia east of the Ohio River and north of Mason and Dixon's line, after the boundary was run from this point to Lake Erie in 1786. . . . It received its name in legislative debate from Hon. John McMillan, delegate from Brooke County, to match the Accomac projection, which he dubbed the Spoon-handle."—B. A. A. D. 1861 (January — June). — Attempted peace-making.—The State carried into rebellion.—Separation of West Virginia, which adheres to the Union.—"Early in January, 1861, the Virginia Assembly met at Richmond to determine the action of the Commonwealth in the approaching struggle. It was plain that war was coming unless the authorities of the United States and of the seceding States would listen to reason; and the first proceedings of the Assembly looked to peace and the restoration of fraternal union. Virginia recommended to all the States to appoint deputies to a Peace Convention [see UNITED STATES OF AM.: A. D. 1861 (FEBRUARY) THE PEACE CONVENTION]. . . . Thus ended in failure the first attempt of Virginia to preserve the national peace; and the crisis demanded that she should promptly decide upon her course. On February 13 (1861) a Convention assembled at Richmond, and a Committee was appointed on Federal Relations. On March 10 (1861), this Committee reported fourteen resolutions protesting against all interference with slavery; declaring secession to be a right; and defining the grounds on which the Commonwealth would feel herself to be justified in exercising that right, namely: the failure to obtain guarantees; the adoption of a warlike policy by the Government of the United States; or the attempt to exact the payment of duties from the seceded States, or to reënforce or recapture the Southern forts. These resolves clearly define the attitude of Virginia at this critical moment. After prolonged discussion, all but the last had passed the Convention when intelligence came that war had begun. The thunder of cannon from Charleston harbor broke up the political discussion. . . . Mr. Lincoln had expressed himself in his inaugural with perfect plainness. Secession was unlawful, and the Union remained unbroken; it was his duty to execute the laws, and he should perform it. To execute the laws it was necessary to have an army; and (April 15, 1861) President Lincoln issued his proclamation calling for 75,000 troops from the States remaining in the Union. The direct issue was thus presented, and Virginia was called upon to decide the momentous question whether she would fight against the South or against the North. . . . As late as the first week in April the Convention had refused to secede by a vote of 89 to 45. Virginia was conscientiously following her old traditions and would not move. Now the time had come at last. . . . On the 17th of April, two days after the Federal proclamation, the Convention passed an ordinance of secession and adhesion to the Southern Confederacy, by a vote of 88 to 55, which was ratified by the people by a majority of 96,750 votes, out of a total of 161,018. West Virginia refused to be bound by the action of the Convention, and became a separate State, but the Virginia of the Tidewater and Valley went with the South."—J. E. Cooke, *Virginia, pt. 3, ch. 22.*—"Of the 46 delegates from the territory now comprising West Virginia, 29 voted against [the ordinance of secession], 9 for it, 7 were absent and one excused. Those who voted against it hastened to leave the city," and, on reaching their homes, became generally the leaders of a movement to separate their section of the State from the Old Dominion. On the 13th of May a convention of delegates from the counties of Northwestern Virginia was held at Wheeling, by the action of which a more general convention was called and held at the same place on the 11th day of June. The latter convention assumed the power to reorganize the government of the State of Virginia.—V. A. Lewis, *Hist. of West Virginia, ch.* 21–23.

A. D. 1861 (April). — Seizure of Harper's Ferry and Norfolk Navy Yard. See UNITED STATES OF AM.: A. D. 1861 (APRIL). ACTIVITY OF REBELLION.

A. D. 1861 (June — November).—The loyal State government organized in West Virginia. — Steps taken toward separation from the old State.— A Convention held on the 11th of June in West Virginia declared the State offices of Virginia vacant by reason of the treason of those who had been elected to hold them, and proceeded to form a regular State organization, with Francis H. Pierpont for the executive head. Maintaining that the loyal people were entitled to speak for the whole State they declared that their government was the government of Virginia. They subsequently admitted delegates from Alexandria and Fairfax Counties in Middle Virginia and from Accomac and Northampton Counties on the eastern shore. Thus organized, the government was acknowledged by Congress as the government of Virginia and senators and representatives were admitted to seats. The Pierpont Government, as it was called, then adopted an ordinance on the 20th of August, 1861, providing "for the formation of a new State out of a portion of the territory of this State." The ordinance was approved by a vote of the people, and on the 26th of November the Convention assembled in Wheeling to frame a constitution for the new government.—J. G. Blaine, *Twenty Years of Congress, v. 1, ch. 21.*

A. D. 1861 (July).—Richmond made the capital of the Southern Confederacy.—"The Conspiracy had no intention originally of establishing its seat of government at Richmond. That was a part of the price exacted by Virginia for her secession, and it was not paid without reluctance. It is to be remembered that at that time every thing seemed to turn on what the Border States would do. . . . By establishing the seat of government at Richmond, it became certain that the most powerful of the Southern armies would always be present in Virginia. If Virginia had been abandoned, all the Border States would have gone with the North. . . . The Confederates having determined on the transfer of their seat of government to Richmond, the necessary preparations were completed, and their Congress opened its first session in that city on the 20th of July, 1861."—J. W. Draper, *Hist. of the Am. Civil War, ch. 39 (v. 2).*

VIRGINIA, University of.—"In 1816 the Legislature of Virginia authorized the president and directors of the Literary Fund to report a plan for a university at the next session of the Assembly. The committee made a full report as requested, but nothing was accomplished beyond bringing the subject of education prominently before the people. At the legislative session of 1817–18 that part of the bill relating to a university and the education of the poor was passed. . . . In the bill authorizing the establishment of the university, it was provided that the sum of $45,000 per annum should be given for the education of the poor, and $15,000 to the university. The commissioners having reported in favor of Central College as the most convenient place in Albemarle County, the Legislature decided, after much discussion, to locate the university at Charlottesville, and to assume the property and site of Central College. The commissioners embodied in their report an exhaustive plan for a university, chiefly from the pen of Thomas Jefferson."—F. W. VIZIR, OR VIZIER.—"Like the Sassanian emperors, the Caliph was not only the divinely appointed ruler, but the embodiment of the government itself. His word was literally law, and his caprice might at any moment overturn the most careful calculations of the ministers, or deprive them of life, power, or liberty, during the performance of their most active duties, or at a most critical juncture. It was very seldom, however, that this awful personage condescended to trouble himself about the actual details of the executive government. The Vizier, as the word implies [Vizier, in Arabic Wazir, means 'One who bears a burden,'—Foot-note], was the one who bore the real burden of the State, and it was both his interest and that of the people at large to keep the Caliph himself as inactive as possible, and to reduce him, in fact, to the position of a mere puppet."—E. WAGER OF BATTLE. — TRIAL BY COMBAT.—JUDICIAL COMBAT.—"Trial by combat does not seem to have established itself completely in France till ordeals went into disuse, which Charlemagne rather encouraged, and which, in his age, the clergy for the most part approved. The former species of decision may, however, be met with under the first Merovingian kings (Greg. Turon, l. vii. c. 19, l. x. c. 10), and seems to have prevailed in Burgundy. It is established by the laws of the Alemanni or Suabians. Baluz. t. i. p. 80. It was always popular in Lombardy. . . . Otho II. established it in all disputes concerning real property. . . . God, as they deemed, was the judge. The nobleman fought on horseback, with all his arms of attack and defence; the plebeian on foot, with his club and target. The same were the weapons of the champions to whom women and ecclesiastics were permitted to intrust their rights. If the combat was intended to ascertain a civil right, the vanquished party, of course, forfeited his claim and paid a fine. If he fought by proxy, the champion was liable to have his hand struck off; a regulation necessary, perhaps, to obviate the corruption of these hired defenders. In criminal cases the appellant suffered, in the event of defeat, the same punishment which the law awarded to the offence of which he accused his adversary. Even where the cause was more peaceably tried, and brought to a regular adjudication by the court, an appeal for false judgment might indeed be made to the suzerain, but it could only be tried by battle. And in this, the appellant, if he would impeach the concurrent judgment of the court below, was compelled to meet in combat every one of its members; unless he should vanquish them all within the day, his life, if he escaped from so many hazards, was forfeited to the law. If fortune or miracle should make him conqueror in every contest, the judges were equally subject to death, and their court forfeited their jurisdiction for ever. . . . Such was the judicial system of France when St. Louis [A. D. 1226–1270] enacted that great code which bears the name of his Establishments. The rules of civil and criminal procedure, as well as the principles of legal decisions, are there laid down with much detail. But that incomparable prince, unable to overthrow the judicial combat, confined himself to discourage it by the example of a wiser jurisprudence. It was abolished throughout the royal domains." Trial by combat "was never abolished by any positive law, either in France [at large] or England. But instances of its occurrence are not frequent even in the fourteenth century."—H. Hallam, *The Middle Ages, ch.* 2, *pt.* 2 (*v.* 1).—"Nor was the wager of battle confined to races of Celtic or Teutonic origin. The Slavonic tribes, as they successively emerge into the light of history, show the same tendency to refer doubtful points of civil and criminal law to the arbitrament of the sword. The earliest records of Hungary, Bohemia, Poland, Servia, Silesia, Moravia, Pomerania, Lithuania, and Russia, present evidences of the prevalence of the system." The last recorded instance of the wager of battle in France was in 1549. "In England, the resolute conservatism, which resists innovation to the last, prolonged the existence of the wager of battle until a period unknown in other civilized nations. . . . It was not until the time of Elizabeth that it was even abolished in civil cases. . . . Even in the 17th century, instances of the battle ordeal between persons of high station are on record." As late as 1818 the right was claimed and conceded by the judges, in a criminal case which caused much excitement. "The next year the act 59 Geo. III. chap. 46, at length put an end for ever to this last remnant of the age of chivalry."—H. C. Lea, *Superstition and Force, ch.* 2.—See, also, LAW, CRIMINAL: A. D. 1818.

WAGER OF LAW.—"This was the remarkable custom which was subsequently known as canonical compurgation, and which long remained a part of English jurisprudence, under the name of the Wager of Law. The defendant, when denying the allegation under oath, appeared surrounded by a number of companions — 'juratores,' 'conjuratores,' 'sacramentales,' 'collaudantes,' 'compurgatores,' as they were variously termed — who swore, not to their knowledge of the facts, but as sharers and partakers in the oath of denial. This curious form of procedure derives importance from the fact that it is an expression of the character, not of an isolated sept, but of nearly all the races that have moulded the destinies of Europe. The Ostrogoths in Italy, and the Wisigoths of the South of France and Spain were the only nations in whose codes it occupies no place, and they, . . . at an early period, yielded themselves completely to the influence of the Roman civilization. . . . The church, with the tact which distinguished her dealings with her new converts, was not long in adopting a system which was admirably suited for her defence in an age of brute force."—H. C. Lea, *Superstition and Force, ch.* 1.—On the abolition of the Wager of Law, see LAW, COMMON: A. D. 1833.

WAHABEES, The. "The Wahabees derive their name from Abdul Wahab, the father of Sheikh Muhammad, their founder, who arose about the beginning of the last century, in the province of Najd, in Arabia. The object of the Wahabee movement was to sweep away all later innovations, and to return to the original purity of Islam, as based upon the exact teaching of the Koran and the example of Mahomet. The principles of the sect rapidly spread among the Arab tribes, and were adopted by the sovereign princes of Darayeh, in Najd. Impelled by religious zeal and political ambition, and allured by the prospect of plunder, the Wahabees soon acquired nearly the whole of Arabia, and menaced the neighbouring Pashaliks of Turkey and Egypt. Mecca and Medina soon fell into their hands, the shrine was despoiled of its rich ornaments, and the pilgrim route to the Kaaba closed for some years. Early in this century (1811), Muhammad Ali, the Pasha of Egypt, at the bidding of the Sultan, set himself to check the progress of this aggressive sect; and his son Ibrahim Pasha completed the work (1818). . . . The following particulars of the Wahabee reform need only be added. They reject the decisions of the 'four orthodox doctors,' and the intercessions of saints; they condemn the excessive reverence paid to Mahomet, and deny his mediation, until the last day. They also disapprove of the ornamenting of tombs, &c."—J. W. H. Stobart, *Islam and its Founder, ch.* **10,** *with foot-note.*

WALDEMAR. See Valdemar.

WALDENSES, OR VAUDOIS, The.—"Let me at the outset express my conviction that the whole attempt to ascribe to the Waldenses an earlier date than the latter half of the 12th century, to throw back their origin some two hundred years, or sometimes much more than this, even to the times of Claudius of Turin (d. 839), is one which will not stand the test of historical criticism; while the endeavour to vindicate for them this remote antiquity has introduced infinite confusion into their whole history. The date of Waldo, who, as I cannot doubt, is rightly recognized as their founder, we certainly know. When it is sought to get rid of their relation to him as embodied in the very name which they bear, and to change this name into Vallenses, the Men of the Valleys or the Dalesmen, it is a transformation which has no likelihood, philological or historic, to recommend it. . . . Peter Waldo,—for we will not withhold from him this Christian name, although there is no authority for it anterior to the beginning of the 15th century,—was a rich citizen and merchant of Lyons [in the later half of the 12th century]. Not satisfied with those scanty portions of Scripture doled out to the laity in divine services, and yearning above all for a larger knowledge of the Gospels, he obtained from two friends among the priesthood a copy of these last and of some other portions of Scripture translated into the Romance language; a collection also of sayings from the Fathers. The whole movement remained to the end true to this its first motive—the desire namely for a fuller acquaintance with the Word of God. That Word he now resolved to make the rule of his life. . . . He . . . , as a first step, sells all that he has, and bestows it upon the poor. In the name which he adopts for himself and for the companions whom he presently associates with him, the same fact of a voluntary poverty, as that which above all they should embody in their lives, speaks out. On this side of the Alps they are Poor Men of Lyons; on the Italian, Poor Men of Lombardy. . . . And now he and his began to preach in the streets of Lyons, to find their way into houses, to itinerate the country round. Waldo had no intention herein of putting himself in opposition to the Church, of being a Reformer in any other sense than St. Francis or St. Bernard was a Reformer, a quickener, that is, and reviver of the Church's spiritual life. His protest was against practical mischiefs, against negligences and omissions on the part of those who should have taught the people, and did not. Doctrinal protest at this time there was none. But for Rome all forms of religious earnestness were suspicious which did not spring directly from herself. . . . In 1178 the Archbishop of Lyons forbade their preaching or expounding any more. Such as did not submit had no choice but to quit Lyons, and betake themselves elsewhere. And thus it came to pass that not the city, already so illustrious in ecclesiastical story, where Irenæus taught and Blandina suffered, . . . but the Alpine mountains must shelter these outcasts, and in turn be made famous by their presence." In 1209, Pope Innocent III. made an attempt to absorb Waldo's society in an "Order of Poor Catholics," which he instituted. "Failing this, he repeated, a few years later, at the Fourth Lateran Council (1215), the Church's sentence against the Waldenses, including them under a common ban with the

Cathari and the whole rabble rout of Manichæans and others with whom they have so often since been confounded. . . . Enemies have sought to confound, that so there might be imputed to the Waldenses any evil which had been brought home to the Albigenses. . . . Friends have sought to identify them out of the wish to recruit the scanty number of witnesses for Scriptural and Apostolical truth in the dark ages of the Church; as certainly it would prove no small numerical addition if the Albigenses might be counted among these." It seems to be certain that the Waldenses were not spared by the crusaders who exterminated the Albigenses of southern France between 1209 and 1229. They fled before that storm into the recesses of the Alps. "But they were numerous in North Italy as well; and far more widely scattered over the whole of central Europe than their present dwelling place and numbers would at all suggest. They had congregations in Florence, in Genoa, in Venice, above all in Milan; there were Waldensian communities as far south as Calabria; they were not unknown in Arragon; still less in Switzerland; at a later day they found their way to Bohemia, and joined hands with the Hussites there."—R. C. Trench, *Lect's on Mediæval Church Hist., lect* 17.—"The valleys which the Vaudois have raised into celebrity lie to the west of Piemont, between the province of Pignerol and Briançon, and adjoining on the other side to the ancient Marquisate of Susa, and that of the Saluces. The capital, La Tour, being about 36 miles from Turin, and 14 from Pignerol. The extent of the valleys is about 12 Italian miles, making a square of about 24 French leagues. The valleys are three in number, Luzern, Perouse, and St. Martin. The former (in which the chief town is now Catholic) is the most beautiful and extensive."—J. Bresse, *Hist. of the Vaudois, pt.* 1, *ch.* 1.—The Waldenses are sometimes confused, mistakenly, with the Albigenses, who belonged to an earlier time.—See ALBIGENSES.

A. D. 1655.—The second Persecution and Massacre.—Cromwell's intervention.—"They [the Vaudois, or Waldenses] had experienced persecutions through their whole history, and especially after the Reformation; but, on the whole, the two last Dukes of Savoy, and also Christine, daughter of Henry IV. of France, and Duchess-Regent through the minority of her son, the present Duke, had protected them in their privileges, even while extirpating Protestantism in the rest of the Piedmontese dominions. Latterly, however, there had been a passion at Turin and at Rome for their conversion to the Catholic faith, and priests had been traversing their valleys for the purpose. The murder of one such priest, and some open insults to the Catholic worship, about Christmas 1654, are said to have occasioned what followed. On the 25th of January, 1654–5, an edict was issued, under the authority of the Duke of Savoy, 'commanding and enjoining every head of a family, with its members, of the pretended Reformed Religion, of what rank, degree, or condition soever, none excepted, inhabiting and possessing estates in the places of Luserna . . . &c, within three days, to withdraw and depart, and be, with their families, withdrawn out of the said places, and transported into the places and limits marked out for toleration by his Royal Highness during his good pleasure,' . . . unless they gave evidence within 20 days of having become Catholics. Furthermore it was commanded that in every one even of the tolerated places there should be regular celebration of the Holy Mass, and that there should be no interference therewith, nor any dissuasion of any one from turning a Catholic, also on pain of death. All the places named are in the Valley of Luserna, and the object was a wholesale shifting of the Protestants of that valley out of nine of its communes and their concentration into five higher up. In vain were there remonstrances at Turin from those immediately concerned. On the 17th of April, 1655, the Marquis di Pianezza, entered the doomed region with a body of troops mainly Piedmontese, but with French and Irish among them. There was resistance, fighting, burning, pillaging, flight to the mountains, and chasing and murdering for eight days, Saturday, April 24, being the climax. The names of about 300 of those murdered individually are on record, with the ways of the deaths of many of them. Women were ripped open, or carried about impaled on spikes; men, women, and children, were flung from precipices, hacked, tortured, roasted alive; the heads of some of the dead were boiled and the brains eaten; there are forty printed pages, and twenty-six ghastly engravings, by way of Protestant tradition of the ascertained variety of the devilry. The massacre was chiefly in the Valley of Luserna, but extended also into the other two valleys. The fugitives were huddled in crowds high among the mountains, moaning and starving; and not a few, women and infants especially, perished amid the snows. . . . There was a shudder of abhorrence through Protestant Europe, but no one was so much roused as Cromwell. . . . On Thursday the 17th of May, and for many days more, the business of the Savoy Protestants was the chief occupation of the Council. Letters, all in Milton's Latin, but signed by the Lord Protector in his own name, were despatched (May 25) to the Duke of Savoy himself, to the French King, to the States General of the United Provinces, to the Protestant Swiss Cantons, to the King of Sweden, to the King of Denmark, and to Ragotski, Prince of Transylvania. A day of humiliation was appointed for the Cities of London and Westminster, and another for all England." A collection of money for the sufferers was made, which amounted, in England and Wales, to £38,000—equal to about £137,000 now. Cromwell's personal contribution was £2,000—equivalent to £7,500 in money of the present day. The Protector despatched a special envoy to the court of Turin, who addressed very plain and bold words to the Duke. Meanwhile Blake with his fleet was in the Mediterranean, and there were inquiries made as to the best place for landing troops to invade the Duke's dominions. "All which being known to Mazarin, that wily statesman saw that no time was to be lost. While Mr. Downing [second

commissioner sent by Cromwell] was still only on his way to Geneva through France, Mazarin had instructed M. Servien, the French minister at Turin, to insist, in the French King's name, on an immediate settlement of the Vaudois business. The result was a 'Patente di Gratia e Perdono,' or 'Patent of Grace and Pardon,' granted by Charles Emanuel to the Vaudois Protestants, Aug. 19, in terms of a Treaty at Pignerol, in which the French Minister appeared as the real mediating party and certain Envoys from the Swiss Cantons as more or less assenting. As the Patent substantially retracted the Persecuting Edict and restored the Vaudois to all their former privileges, nothing more was to be done." These events in Piedmont drew from Milton his immortal sonnet, beginning: "Avenge, O Lord, thy slaughtered saints."—D. Masson, *Life of John Milton, v. 5, bk. 1, ch. 1, sect. 2.*

A. D. 1691.—Toleration obtained by William of Orange.—"In the spring of 1691, the Waldensian shepherds, long and cruelly persecuted, and weary of their lives, were surprised by glad tidings. Those who had been in prison for heresy returned to their homes. Children, who had been taken from their parents to be educated by priests, were sent back. Congregations, which had hitherto met only by stealth and with extreme peril, now worshipped God without molestation in the face of day. Those simple mountaineers probably never knew that their fate had been a subject of discussion at the Hague, and that they owed the happiness of their firesides and the security of their humble temples to the ascendency which William [of Orange] exercised over the Duke of Savoy," who had lately joined the Grand Alliance against Louis XIV. of France.—Lord Macaulay, *Hist. of Eng., ch. 17.*

A. D. 1282-1284.—The final conquest.—"All the other races had combined on the soil of Britain, the Welsh would not. The demands of feudal homage made by the kings of England were evaded or repudiated; the intermarriages by which Henry II. and John had tried to help on a national agreement had in every case failed. In every internal difficulty of English politics the Welsh princes had done their best to embarrass the action of the kings; they had intrigued with every aspirant for power, had been in league with every rebel. . . . The necessity of guarding the Welsh border had caused the English kings to found on the March a number of feudal lordships, which were privileged to exercise almost sovereign jurisdictions, and exempted from the common operation of the English law. The Mortimers at Chirk and Wigmore, the Bohuns at Hereford and Brecon, the Marshalls at Pembroke, and the Clares in Glamorgan, were out of the reach of the King, and often turned against one another the arms which had been given them to overawe the Welsh. . . . So long as the Welsh were left free to rebel the Marchers must be left free to fight. . . . Llewelyn, the prince of North Wales, had, by the assistance given to Simon de Montfort, earned as his reward a recognition of his independence, subject only to the ancient feudal obligations. All the advantages won during the early years of Henry III. had been thus surrendered. When the tide turned Llewelyn had done homage to Henry; but when he was invited, in 1273, to perform the usual service to the new king, he refused; and again, in 1274 and 1275, he evaded the royal summons. In 1276, under the joint pressure of excommunication and a great army which Edward brought against him, he made a formal submission; performed the homage, and received, as a pledge of amity, the hand of Eleanor de Montfort in marriage. But Eleanor, although she was Edward's cousin, was Earl Simon's daughter, and scarcely qualified to be a peacemaker. Another adviser of rebellion was found in Llewelyn's brother David, who had hitherto taken part with the English, and had received special favours and promotion from Edward himself. . . . The peace made in 1277 lasted about four years. In 1282 the brothers rose, seized the border castles of Hawarden, Flint, and Rhuddlan, and captured the Justiciar of Wales, Roger Clifford. Edward saw then that his time was come. He marched into North Wales, carrying with him the courts of law and the exchequer, and transferring the seat of government for the time to Shrewsbury. He left nothing undone that might give the expedition the character of a national effort. He collected forces on all sides; he assembled the estates of the realm, clergy, lords, and commons, and prevailed on them to furnish liberal supplies; he obtained sentence of excommunication from the Archbishop of Canterbury. The Welsh made a brave defence, and, had it not been for the almost accidental capture and murder of Llewelyn in December, England might have found the task too hard for her. The death of Llewelyn, however, and the capture of David in the following June, deprived the Welsh of their leaders, and they submitted. Edward began forthwith his work of consolidation. . . . In 1284 he published at Rhuddlan a statute, called the Statute of Wales, which was intended to introduce the laws and customs of England, and to reform the administration of that country altogether on the English system. The process was a slow one; the Welsh retained their ancient common law and their national spirit; the administrative powers were weak and not far-reaching; the sway of the lords Marchers was suffered to continue; and, although assimilated, Wales was not incorporated with England. It was not until the reign of Henry VIII. that the principality was represented in the English Parliament, and the sovereignty, which from 1300 onwards was generally although not invariably bestowed on the king's eldest son, conferred under the most favourable circumstances little more than a high-sounding title and some slight and ideal claim to the affection of a portion of the Welsh people. The task, however, which the energies of his predecessors had failed to accomplish was achieved by Edward. All Britain south

of the Tweed recognised his direct and supreme authority, and the power of the Welsh nationality was so far broken that it could never more thwart the determined and united action of England."—W. Stubbs, *The Early Plantagenets, ch.* 10.

A. D. 1402-1413.—Owen Glendower's Rebellion.—"Since the day when it was conquered by Edward I. Wales had given the kings of England very little trouble. The Welsh remained loyal to the son and grandson of their conqueror, and were the most devoted friends of Richard II., even when he had lost the hearts of his English subjects. But on the usurpation of Henry [IV.] their allegiance seems to have been shaken: and Owen Glendower, who was descended from Llewelyn, the last native prince of Wales, laid claim to the sovereignty of the country [A. D. 1402]. He ravaged the territory of Lord Grey of Ruthin, and took him prisoner near Snowdon; then, turning southwards, overran Herefordshire and defeated and took prisoner Sir Edmund Mortimer, uncle to that young Earl of March, who should have been heir to the crown after Richard according to the true order of descent. In this battle upwards of a thousand Englishmen were slain, and such was the fierce barbarity of the victors that even the women of Wales mutilated the dead bodies in a manner too gross to be described, and left them unburied upon the field till heavy sums were paid for their interment. It was necessary to put down this revolt of Glendower, and the King collected an army and went against him in person. It was the beginning of September; but owing, as the people thought, to magical arts and enchantments practised by the Welshman, the army suffered dreadfully from tempests of wind, rain, snow, and hail before it could reach the enemy. In one night the King's tent was blown down, and he himself would have been killed if he had not retired to rest with his armour on. Finally the enterprise had to be abandoned. . . . Glendower continued as troublesome as ever, and the King was unable from various causes to make much progress against him. At one time money could not easily be raised for the expedition. At another time, when he actually marched into the borders of Wales [A. D. 1405], his advance was again impeded by the elements. The rivers swelled to an unusual extent, and the army lost a great part of its baggage by the suddenness of the inundation. The French, too, sent assistance to Glendower, and took Carmarthen Castle. Some time afterwards [A. D. 1407] the King's son, Henry Prince of Wales, succeeded in taking the castle of Aberystwith; but very soon after Owen Glendower recovered it by stealth. In short, the Welsh succeeded in maintaining their independence of England during this whole reign, and Owen Glendower ultimately got leave to die in peace." On the accession of Henry V. (A. D. 1413), "the Welsh, who had been so troublesome to his father, admired his valour and claimed him as a true prince of Wales, remembering that he had been born at Monmouth, which place was at that time within the principality. They discovered that there was an ancient prophecy that a prince would be born among themselves who should rule the whole realm of England; and they saw its fulfilment in King Henry V."—J. Gairdner, *The Houses of Lancaster and York, ch.* 4, *sect.* 3; *and ch.* 5, *sect.* 1.

WALES, Prince of.—"When Edward I. subdued Wales, he is said to have promised the people of that country a native prince who could not speak English, and taking advantage of the fact that his queen, Eleanor, was delivered of a child at Carnarvon Castle, in North Wales, he conferred the principality upon his infant son Edward, who was yet unable to speak. By the death of his eldest brother Alphonso, Edward became heir to the throne, to which he afterwards succeeded as Edward II.; but from this time forward, the principality has been appropriated solely to the eldest sons of the kings of England, who previous to this period had only borne the title of 'Lord Prince.' In 1841, for the first time, the dukedom of Saxony was introduced among the reputed titles of the Prince of Wales. This dignity his Royal Highness derives merely in right of his own paternal descent. . . . Without any new creation, and previous to his acquiring the title of Prince of Wales, the heir-apparent of the sovereign is Duke of Cornwall, the most ancient title of its degree in England. Edward the Black Prince . . . was created the first Duke of Cornwall in 1337. . . . The dukedom merges in the Crown when there is no heir apparent, and is immediately inherited by the prince on his birth, or by the accession of his father to the throne, as the case may be. . . . The earldom of Chester is one of the titles conferred by patent, but it was formerly a principality, into which it had been erected by the 21st of Richard II. In the reign of Henry IV., however, the act of parliament by which it had been constituted was repealed, and it has ever since been granted in the same patent which confers the title of Prince of Wales. As the eldest sons of the kings of Scotland have enjoyed the titles of Duke of Rothsay, Earl of Carrick, Baron Renfrew, and Hereditary Great Steward of Scotland, those dignities are also invariably attributed to the Prince of Wales."—C. R. Dodd, *Manual of Dignities, pt.* 2.

WALI.—An Arabian title, given to certain governors of extensive provinces under the caliphate. It seems to have had a viceroyal significance, marking the bearer of it as an immediate representative of the caliph.—T. P. Hughes, *Dict. of Islam.*

WALLINGFORD, Treaty of. — A treaty concluded, A. D. 1153, between King Stephen and Matilda, who claimed the English crown as the heir of her father, Henry I. By the treaty Stephen was recognized as king and Matilda's son Henry (who became Henry II.) was made his heir.

WALLOONS, The. — "In Namur, Liege, and Luxembourg, the speech is what is called Walloon, the same word as Welsh, and derived from the German root 'wealh,' a foreigner. By this designation the Germans of the Flemish tongue denoted the Romano-Belgic population whose language was akin to the French, and whom a hilly and impracticable country (the forest districts of the Ardennes) had more or less protected from their own arms. Now the Walloon is a form of the Romano-Keltic so peculiar and independent that it must be of great antiquity, i. e., as old as the oldest dialect of the French, and no extension of the dialects of Lorraine, or Champagne, from which it differs materially. It is also a language which must have been formed on a Keltic basis. . . . The Walloons, then, are Romano-Keltic; whereas the Flemings are Germans, in speech and in blood." —R. G. Latham, *Ethnology of Europe, ch.* 3.— See, also, NETHERLANDS: A. D. 1494–1519.

WAMPUM.—"Wampum, or wompam, according to Trumbull was the name of the white beads made from stems or inner whorls of the Pyrula Carica or Canaliculata periwinkle shells so common on all the south coast of New England. When strung they were called wampon or wampom — peage or peake or peg, equivalent to 'strings of white beads,' for peage means 'strung beads.' Color was the basis of the nomenclature, as well as of the difference in value. 'Wompi' was white; 'Sacki' was black; 'Suckauhock' was the black beads made from the dark part of the poquauhock, the common quahog, Venus' mercenaria or round clam shell. The value of the black was generally twice that of the white. . . . The word generally used among the Dutch who led in introducing the bead currency of the Indians, Sewan or Zeewand, was more general in its application than wampum. But whatever the difficult Indian linguistic process may have been, the New England men soon settled on wampum and peage as the working names for this currency. The shell cylinders, black or white, were about one-eighth of an inch in diameter and one-quarter long. There were shorter beads used for ornaments, but there is hardly any trace of them in the currency. . . . The Indians strung the beads on fibres of hemp or tendons taken from the flesh of their forest meat. . . . The strings of peage were embroidered on strips of deer-skin, making the 'Máchequoce,' a girdle or belt 'of five inches thicknesse,' or more, and to the value of ten pounds sterling or more, which was worn about the waist or thrown over the shoulders like a scarf. More than 10,000 beads were wrought into a single belt four inches wide. These belts were in common use like the gold and jewelry of our day. They also played the same symbolic part which survives in the crown jewels and other regalia of civilized nations. . . . Whenever the Indians made an important statement in their frequent negotiations, they presented a belt to prove it, to give force to their words. . . . It gave to the words the weight of hard physical facts and made the expression an emblem of great force and significance. The philologists call this literary office, this symbolic function of wampum, an elementary mnemonic record. The same was fulfilled by the quippus, knotted strings or quipu of the ancient Peruvians. . . . 'This belt preserves my words' was a common remark of the Iroquois Chief in council. . . . The Iroquois were a mighty nation, almost an incipient state. Their only records were in these mnemonic beads. . . . Tradition gives to the Narragansetts the honor of inventing these valued articles, valuable both for use and exchange. . . . The Long Island Indians manufactured the beads in large quantities and then were forced to pay them away in tribute to the Mohawks and the fiercer tribes of the interior. Furs were readily exchanged for these trinkets, which carried a permanent value, through the constancy of the Indian desire for them. . . . After the use of wampum was established in colonial life, contracts were made payable at will in wampum, beaver, or silver. . . . The use began in New England in 1627. It was a legal tender until 1661, and for more than three quarters of a century the wampum was current in small transactions."— W. B. Weeden, *Indian Money as a Factor in New Eng. WASHINGTON (City): A. D. 1791.—The founding of the Federal Capital.—"One important duty which engaged the President's [Washington's] attention during part of the recess [of Congress] related to the purchase and survey of the new Federal city. The site chosen on the Potomac by himself and the commissioners, in conformity with law [see UNITED STATES OF AM.: A. D. 1789–1792], lay a few miles to the north of Mount Vernon on the Maryland side of the river, at the confluence of the Eastern Branch, and just below Georgetown. The tradition goes that, while a young surveyor scouring the neighboring country, Washington had marked the advantages of this spot for a great city. . . . The entire soil belonged in large parcels to a few plain, easy, Maryland farmers, who rode over to Georgetown for their flour and bacon. One of these only, David Burns, was obstinate about making terms; and the subsequent rise of land in the western quarter of the city, which his farmhouse now occupied, rendered his little daughter in time the heiress of Washington, and confirmed his claims to historical consideration as the most conspicuous grantor of the National Capital. For procuring this choice spot on behalf of his countrymen, the President conducted the negotiations in person, and the purchase of the Federal city was concluded upon just and even generous terms. Each owner surrendered his real estate to the United States with no restriction except that of retaining every alternate lot for himself. The government was permitted to reserve all tracts specially desired at £25 an acre, while the land for avenues, streets, and alleys should cost nothing. Thus the Federal Capital came to the United States as substantially a free conveyance of half the fee of the soil in consideration of the enhanced value expected for the other half. . . . Major l'Enfant, a French architect, was selected to plan and lay out the new city. The highways were mapped and bounded substantially as they exist at this day, being so spacious and so numerous in comparison with building lots as to have admitted of no later change, in the course of a century, except in the prudent direction of parking, enlarging sidewalks, and leaving little plats in front of houses to be privately cared for. Streets running due north and south from the northern boundary to the Potomac were intersected at right angles by others which extended east and west. To mar the simplicity of this plan, however, which so far resembled that of Philadelphia, great avenues, 160

feet wide, were run diagonally, radiating like spokes, from such main centres as Capitol Hill and the President's house. . . . This new Capital, by the President modestly styled 'the Federal City,' but to which the commissioners, by general acclamation, proceeded in September to affix his illustrious name, was America's first grand essay at a metropolis in advance of inhabitants. . . . The founder himself entered with unwonted ardor into the plans projected for developing this the new Capital. Not only did he picture the city which bore his name as an instructor of the coming youth in lessons of lofty patriotism, but he prophesied for it national greatness apart from its growth as the repository of the nation. He believed it would become a prosperous commercial city, its wharves studded with sails, enjoying all the advantages of Western traffic by means of a canal linking the Potomac and Ohio rivers, so as to bring Western produce to the seaboard. The ten-mile square which comprised the territorial District of Columbia, inclusive of the Capital, stretched across the Potomac, taking Georgetown from the Maryland jurisdiction, and Alexandria from Virginia. . . . The first corner-stone of this new Federal district was publicly laid with Masonic ceremonies, and though the auction sale of city lots in autumn proved disappointing, the idea prevailed that the government would gain from individual purchasers in Washington city a fund ample enough for erecting there all the public buildings at present needed."—J. Schouler, *Hist. of the U. S., ch.* 2, *sect.* 2 (*v.* 1).

WEIMAR.—For an account of the origin of the Duchy of Saxe Weimar, see SAXONY: A. D. 1180–1553.—"Small indeed is the space occupied on the map by the Duchy of Saxe-Weimar; yet the historian of the German Courts declares, and truly, that after Berlin there is no Court of which the nation is so proud. . . . 'Small among German princes is mine, poor and narrow his kingdom, limited his power of doing good.' Thus sings Goethe in that poem, so honourable to both, wherein he acknowledges his debt to Karl August. . . . Weimar is an ancient city on the Ilm, a small stream rising in the Thuringian forests, and losing itself in the Saal, at Jena; this stream on which the sole navigation seems to be that of ducks, meanders peacefully through pleasant valleys, except during the rainy season, when mountain-torrents swell its current and overflow its banks. The Trent, between Trentham and Stafford — 'the smug and silver Trent' as Shakespeare calls it — will give an idea of this stream. The town is charmingly placed in the Ilm valley, and stands some eight hundred feet above the level of the sea. 'Weimar,' says the old topographer, Mathew Merian, 'is Weinmar, because it was the wine market for Jena and its environs. Others say it was because some one here in ancient days began to plant the vine, who was hence called Weinmayer. But of this each reader may believe just what he pleases.' On a first acquaintance, Weimar seems more like a village bordering a park, than a capital with a Court, having all courtly environments. . . . Saxe-Weimar has no trade, no manufactures, no animation of commercial, political, or even theological activity. This part of Saxony, be it remembered, was the home and shelter of Protestantism in its birth. Only a few miles from Weimar stands the Wartburg, where Luther, in the disguise of Squire George, lived in safety, translating the Bible, and hurling his inkstand at the head of Satan, like a rough-handed disputant as he was. In the market-place of Weimar stand, to this day, two houses from the windows of which Tetzel advertised his indulgences, and Luther afterwards in fiery indignation fulminated against them. These records of religious struggle still remain, but are no longer suggestions for the continuance of the strife. . . . The theologic fire has long burnt itself out in Thuringia. In Weimar, where Luther preached, another preacher came, whom we know as Goethe. In the old church there is one portrait of Luther, painted by his friend Lucas Kranach, greatly prized, as well it may be; but for this one portrait of Luther, there are a hundred of Goethe. It is not Luther, but Goethe, they think of here; poetry, not theology, is the glory of Weimar. And, corresponding with this, we find the dominant characteristic of the place to be no magnificent church, no picturesque ancient buildings, no visible image of the earlier ages, but the sweet serenity of a lovely park. The park fills the foreground of the picture, and always rises first in the memory. . . . Within its limits Saxe Weimar displayed all that an imperial court displays in larger proportions: it had its ministers, its army, its chamberlains, pages, and sycophants. Court favour, and disgrace, elevated and depressed, as if they had been imperial smiles, or autocratic frowns. A standing army of six hundred men, with cavalry of fifty hussars, had its War Department, with war minister, secretary, and clerk. As the nobles formed the predominating element of Weimar, we see at once how, in spite of the influence of Karl August, and the remarkable men he assembled round him, no real public for Art could be found there. Some of the courtiers played more or less with Art, some had real feeling for it; but the majority set decided faces against all the beaux esprits. . . . Not without profound significance is this fact that in Weimar the poet found a Circle, but no Public. To welcome his productions there were friends and admirers; there was no Nation. Germany had no public."—G. H. Lewes, *The Life and Works of Goethe, bk.* 1, *ch.* 1.

WELSH, The Name of the.—"The Germans, like our own ancestors, called foreign, i. e. non-Teutonic nations, Welsh. Yet apparently not all such nations, but only those which they in some way associated with the Roman Empire: the Cymry of Roman Britain, the Romanized Kelts of Gaul, the Italians, the Roumans or Wallachs of Transylvania and the Principalities. It does not appear that either the Magyars or any Slavonic people were called by any form of the name Welsh."—J. Bryce, *The Holy Roman Empire, ch.* 17, *foot-note.*—"Wealhas, or Welshmen; . . . it was by this name, which means 'strangers,' or 'unintelligible people,' that the English knew the Britons, and it is the name by which the Britons, oddly enough, now know themselves."—J. R. Green, *The Making of England, p.* 122.

WERGILD.—"The principle that every injury to either person or property might be compensated by a money payment was common to all the northern nations. It was introduced into Gaul by the conquering Franks, and into Britain by the English invaders. Every man's life had a fixed money value, called the 'wergild.' In the case of a freeman, this compensation for murder was payable to his kindred; in that of a slave, to his master. The amount of the wergild varied, according to a graduated scale, with the rank of the person slain."—T. P. Taswell-Langmead, *Eng. Const. Hist., p.* 41.

WEST INDIES, The.—"The name West Indies recalls the fact that the discovery of the new world originated in an attempt to find a western route to the eastern seas, and that, when Columbus crossed the Atlantic and sighted land on the other side [see AMERICA: A. D. 1484–1492, and 1492], he fancied he had reached the further coasts of the Indies. 'In consequence of this mistake of Columbus,' says Adam Smith, 'the name of the Indies has stuck to those unfortunate countries ever since.' The islands, or some of them, have long borne the name of Antilles. Antillia or Antiglia was a mythical island [see ANTILLES] which found a place on mediæval maps, and the name was applied by geographers to Hispaniola and Cuba upon their first discovery. In modern times Cuba, Hispaniola or Hayti, Jamaica, and Porto Rico have usually been known as the Greater Antilles; and the ring of smaller islands, including the Windward and the Leeward Islands, as the Lesser Antilles. The terms Windward and Leeward themselves demand some notice. The prevailing wind in the West Indies being the north-east trade wind, the islands which were most exposed to it were known as the Windward islands, and those which were less exposed were known as the Leeward. Accordingly, the Spaniards regarded the whole ring of Caribbean islands as Windward islands, and identified the Leeward islands with the four large islands which constitute the Greater Antilles as given above. The English sailors contracted the area of Windward and Leeward, subdividing the Caribbean islands into a northern section of Leeward islands and a southern section of Windward islands, which project further into the Atlantic. In 1671 this division was made a political one, and the English Caribbean islands, which had before constituted one government, were separated into two groups, under two Governors-in-chief; the islands to the north of the French colony of Guadeloupe forming the government of the Leeward islands, the islands to the south of Guadeloupe forming the government of the Windward islands. Latterly the signification has been again slightly modified; and, for administrative purposes under the Colonial Office, the Leeward islands group now includes the more northerly section of the Caribbean islands belonging to Great Britain, from the Virgin islands to Dominica [embracing Antigua, St. Christopher or St. Kitts, Nevis, Montserrat, the Virgin Islands, Dominica, Barbuda, Redonda, and Anguilla]; while the Windward islands are artificially restricted to St. Lucia, St. Vincent, the Grenadines, and Grenada, the two most windward of all, Barbados and Tobago, being separated from the group." Barbados is a distinct crown colony, and Tobago is joined with Trinidad to form another. —C. P. Lucas, *Hist. Geog. of the British Colonies, v.* 2, *sect.* 2, *ch.* 1, *and* 4–7.—"The French possessions in the West Indies . . . consist of the following islands: Guadaloupe and its dependencies, Martinique, and St. Bartholomew. Guadaloupe, written by the French Guadeloupe, is the most important of the Leeward Islands belonging to that nation, and is situated between lat. 15° 57′ and 16° 30′ N., and long. 61° 15′ and 61° 45′ W. Including dependencies, its area is 625 square miles, with a population of 152,910, three-fourths of whom are coloured." It was colonized by the French in 1635. It has been thrice taken by the English in war, in 1759, 1794 and 1810, and thrice restored. "The Danish possessions in the West Indies consist of the islands of St. Thomas, St. Croix, and St. John. St. Thomas, one of the Virgin Islands, is situated about 30 miles east of Puerto Rico, and with an area of 35 square miles supports a population of 14,000, one-tenth of whom are white, two-thirds black, and the remainder mixed. A mountain ridge, attaining at one point an elevation of 1480 feet, forms a backbone to the island, and the consequent unevenness of surface renders a large portion of it unfit for cultivation. . . . Negotiations were opened in 1867 for the transfer of St. Thomas to the United States, but the project fell through. St. Croix, or Santa Cruz, is the largest and southernmost of the Virgin Islands, with a length of 25 miles, and a breadth at the widest part of five miles. . . . It has been alternately in the hands of the Dutch, British, Spanish and French. . . . The Dutch possessions in the West Indies consist of the islands of Curaçao, Aruba, St. Martin, Bonaire, St. Eustache, and Saba. . . . Curaçao is exceedingly barren. . . . . Water is very scarce. . . . Slavery was abolished in the Dutch West Indies on 1st July, 1863."—C. H. Eden, *The West Indies, ch.* 14. See, also, CUBA; HAYTI; JAMAICA.

WEST POINT.—Early in the War of Independence, the need of fortifying Hudson River at its narrow passes was seen. In the spring of 1778, "a committee of the New York Legislature, after surveying several sites, unanimously recommended West Point as the most eligible. Works were accordingly commenced there under the direction of Kosciuszko. . . . The principal redoubt, constructed chiefly of logs and earth, was completed before May. . . . At the close of 1779, West Point was the strongest military post in America. In addition to the batteries that stood menacingly upon the hilltops, the river was obstructed by an enormous iron chain. . . . West Point was considered the keystone of the country during the Revolution, and there a large quantity of powder, and other munitions of war and military stores, were collected. These considerations combined made its possession a matter of great importance to the enemy, and hence it was selected by Arnold as the prize which his treason would give as a bribe [see UNITED STATES OF AM.: A. D. 1780 (AUGUST—SEPTEMBER)]. When peace returned, it was regarded as one of the most important military posts in the country, and the plateau upon the point was purchased by the United States Government. . . . The Military Academy at West Point was established by an act of Congress which became a law on the 16th of March, 1802. Such an institution, at that place, was proposed by Washington to Congress in 1793; and earlier than this, even before the war of the Revolution had closed, he suggested the establishment of a military school there. But little progress was made in the matter until 1812."—B. J. Lossing, *Field-book of the Revolution, v.* 1, *pp.* 702–706.

A. D. 1862 (April—December).—The completed separation from Old Virginia.—Admission to the Union.—The work of the convention at Wheeling which framed a constitution for the new State of West Virginia was satisfactorily performed, and "on the first Thursday of April, 1862, the people approved the constitution by a vote of 18,862 in favor of it with only 514 against it. The work of the representatives of the projected new State being thus ratified, the Governor called the Legislature of Virginia together on the 6th day of May, and on the 13th of the same month that body gave its consent, with due regularity, to 'the formation of a new State within the jurisdiction of the said State of Virginia.' A fortnight later, on the 28th of May, Senator Willey introduced the subject in Congress by presenting a memorial from the Legislature of Virginia, together with a certified copy of the proceedings of the Constitutional Convention and the vote of the people. The constitution was referred to the Committee on Territories and a bill favorable to admission was promptly reported by Senator Wade of Ohio. The measure was discussed at different periods, largely with reference to the effect it would have upon the institution of slavery, and Congress insisted upon inserting a provision that 'the children of slaves, born in the State after the 4th day of July, 1863, shall be free; all slaves within the said State who shall at that time be under the age of ten years shall be free when they arrive at the age of twenty-one years; all slaves over ten and under twenty-one shall be free at the age of twenty-five years; and no slave shall be permitted to come into the State for permanent residence therein.' This condition was to be ratified by the convention which framed the constitution, and by the people at an election held for the purpose, and, upon due certification of the approval of the condition to the President of the United States, he was authorized to issue his proclamation declaring West Virginia to be a State of the Union. . . . On the 14th of July, three days before Congress adjourned, the bill passed the Senate by a vote of 23 to 17. Mr. Rice of Minnesota was the only Democrat who favored the admission of the new State. . . . Mr. Chandler and Mr. Howard of Michigan voted in the negative because the State had voluntarily done nothing towards providing for the emancipation of slaves; Mr. Sumner and Mr. Wilson, because the Senate had rejected the anti-slavery amendment [proposed by Mr. Sumner, declaring immediate emancipation in the new State]; Mr. Trumbull and Mr. Cowan, because of the irregularity of the whole proceeding. The bill was not considered in the House until the next session. It was taken up on the 9th of December," and was warmly debated. "On the passage of the bill the ayes were 96 and the noes were 55. The ayes were wholly from the Republican party, though several prominent Republicans opposed the measure. Almost the entire Massachusetts delegation voted in the negative, as did also Mr. Roscoe Conkling, Mr. Conway of Kansas and Mr. Francis Thomas of Maryland. The wide difference of opinion concerning this act was not unnatural. But the cause of the Union was aided by the addition of another loyal commonwealth, and substantial justice was done to the brave people of the new State. . . . To the old State of Virginia the blow was a heavy one. In the years following the war it added seriously to her financial embarrassment, and it has in many ways obstructed her prosperity."—J. G. Blaine, *Twenty Years of Congress, v.* 1, *ch.* 21.—In the legislative Ordinance of 1861 the proposed new State was called Kanawha; but in the Constitutional Convention this name was changed to West Virginia.

WESTERN AUSTRALIA.—"This great territory, the largest of the Australian Colonies, was formerly known as the Swan River Settlement, and covers an area not far short of a million square miles. The original Swan River Settlement was much less in extent, comprising the south-west corner of the continent only. . . . The first settlement of the Colony was made in 1826, with a party of convicts and a detachment of the 39th Regiment under the command of Major Lockyer. Three years later, i. e. on 1st June, 1829, the Colony was proclaimed by Captain Stirling, who was sent out from England as the first Governor. . . . A paper . . . read [in 1885] . . . at the Royal Colonial Institute, by Sir Frederick Napier Broome [then governor], . . . thus refers to the Colony: . . . 'Western Australia has until lately made but slow progress. She has been the Cinderella of the Australian family; while her more fortunate sisters have got on in the world, have been gay and prosperous, and have received much company in the shape of immigrants, she has led a solitary and unnoticed existence. . . . The most pressing want of the Colony, the one great need, is more people, . . . not only more hands to labour, but more capitalists to employ them.'"—*Her Majesty's Colonies* (*Colonial and Indian Exhibition*, 1886), *pp.* 217–218.—See AUSTRALIA: A. WESTMINSTER PALACE.—"Westminster was from the days of Edward the Confessor the recognised home of the great council of the nation as well as of the king. How this came about, history does not record; it is possible that the mere accident of the existence of the royal palace on the bank of the Thames led to the foundation of the abbey, or that the propinquity of the abbey led to the choice of the place for a palace; equal obscurity covers the origin of both. . . . From the very first introduction of representative members the national council had its regular home at Westminster. There, with a few casual exceptions, . . . all the properly constituted parliaments of England have been held. The ancient Palace of Westminster, of which the most important parts, having survived until the fire of 1834 and the construction of the New Houses of Parliament, were destroyed in 1852, must have presented a very apt illustration of the history of the Constitution which had grown up from its early simplicity to its full strength within those venerable walls. It was a curious congeries of towers, halls, churches, and chambers. . . . As time went on, every apartment changed its destination: the chamber became a council room, the banquet hall a court of justice, the chapel a hall of deliberation. . . . The house of commons met occasionally in the Painted Chamber, but generally sat in the Chapter House or in the Refectory of the abbey, until the reign of Edward VI, when it was fixed in S. Stephen's chapel."—W. Stubbs, *Const. Hist. of Eng., ch.* 20, *sect.* 735–736 (*v.* 3).

WHIG PARTY OF THE UNITED STATES. See UNITED STATES OF AM.: A. D. 1834.

WHIGS (WHIGGAMORS): Origin of the name and the English Party.—"The south-west counties of Scotland have seldom corn enough to serve them round the year: and the northern parts producing more than they need, those in the west come in summer to buy at Leith the stores that come from the north: and from a word 'whiggam,' used in driving their horses, all that drove were called the 'whiggamors,' and shorter the 'whiggs.' Now in that year [1648], after the news came down of Duke Hamilton's defeat [at the battle of Preston—see ENGLAND: A. D. 1648 (APRIL—AUGUST)], the ministers animated their people to rise and march to Edenburgh; and they came up marching on [at] the head of their parishes, with an unheard-of fury, praying and preaching all the way as they came. The marquis of Argile and his party came and headed them, they being about 6,000. This was called the 'whiggamors' inroad; and ever after that all that opposed the court came in contempt to be called 'whiggs': and from Scotland the word was brought into England, where it is now one of our unhappy terms of distinction."—G. Burnet, *Hist. of My Own Time, bk.* 1 (*Summary*), *sect.* 43 (*v.* 1).—"We find John Nicoll, the diarist, in 1666, speaking of the west-country Presbyterians as 'commonly called the Whigs,' implying that the term was new. The sliding of the appellation from these obscure people to the party of the opposition in London a few years later, is indicated by Daniel Defoe as occurring immediately after the affair of Bothwell Bridge in 1679. The Duke of Monmouth then returning from his command in Scotland, instead of thanks for his good service, found himself under blame for using the insurgents too mercifully. 'And Lauderdale told Charles, with an oath, that the Duke had been so civil to the Whigs because he was himself a Whig in his heart. This made it a court-word; and in a little while all the friends and followers of the Duke began to be called Whigs.'"—R.

WHIPS, Party.—The "party whips," in English politics, are "an extremely useful and hard-working body of officials. Being charged with the duty of keeping the respective sides in readiness for all emergencies, they are generally to be found in the lobby, where they make themselves acquainted with the incomings and outgoings of members, and learn a good deal as to their prospective movements. The whips are the gentlemen who issue those strongly underlined circulars by which legislators are summoned on important nights; and who, by their watchfulness and attention, can generally convey reliable intelligence to the party chiefs. If the Ministers, for example, are engaged in any controversy, and their whips are not absolutely certain of a majority, they would make arrangements for a succession of men to keep on talking till the laggards could be brought to their places." The whips also arrange "pairs," by which members of opposite parties, or on opposite sides of a given question, agree in couples, not to vote for a certain fixed period of time, thereby securing freedom to be absent without causing any loss of relative strength to their respective parties. This arrangement is common in most legislative bodies. "In addition to these duties, the whips of the opposing forces have to move for the issue of new writs in the place of deceased members — a task never undertaken till they have a candidate ready for the fray."—*Popular Account of Parliamentary Procedure, p.* 18.

WHITE HOODS OF FRANCE.—"The Caputiati, or Capuchons, or White Hoods, [was] a sect originating with a wood-cutter of Auvergne, by name Durand, about the year 1182. Their primary object was the maintenance of peace, and the extermination of the disbanded soldiery, whom the English kings had spread over the south of France, and [who] were now ravaging the country under the name of Routiers or Cotereaux. The members of this religious association were bound by no vow, and made no profession of any particular faith; they were only distinguished by the white head-gear that gave them their name, and wore a little leaden image of the Virgin on their breast. They found favour at first with the bishops, especially in Burgundy and the Berri, and were even, from the best political causes, countenanced by Philip Augustus. They thus rose to such a degree of power that on the 20th of July, 1183, they surrounded a body of 7,000 of the marauding party, and suffered not one man to escape. They were, however, soon intoxicated with success, and threw out some hints about restoring the primæval liberty of mortals and universal equality; thereby incurring the displeasure of Hugo Bishop of Auxerre, who took arms against them, and put an end to the sect by the might of the sword in 1186."—L. WHITE PENITENTS, OR WHITE COMPANIES.—"The end of the 14th century witnessed a profound outburst of popular devotion. The miserable condition of the Church, distracted by schism, and the disturbed state of every country in Europe, awoke a spirit of penitence and contrition at the prospect of another great Jubilee, and the opening of a new century. Bands of penitents wandered from place to place, clad in white garments; their faces, except

the eyes, were covered with hoods, and on their backs they wore a red cross. They walked two and two, in solemn procession, old and young, men and women together, singing hymns of penitence, amongst which the sad strains of the 'Stabat Mater' held the chief place. At times they paused and flung themselves on the ground, exclaiming 'Mercy,' or 'Peace,' and continued in silent prayer. All was done with order and decorum; the processions generally lasted for nine days, and the penitents during this time fasted rigorously. The movement seems to have originated in Provence, but rapidly spread through Italy. Enemies were reconciled, restitution was made for wrongs, the churches were crowded wherever the penitents, or 'Bianchi' ['White Penitents,' 'White Companies,' 'Whitemen' are various English forms of the name] as they were called from their dress, made their appearance. The inhabitants of one city made a pilgrimage to another and stirred up their devotion. The people of Modena went to Bologna; the Bolognese suspended all business for nine days, and walked to Imola, whence the contagion rapidly spread southwards. For the last three months of 1399 this enthusiasm lasted, and wrought marked results upon morals and religion for a time. Yet enthusiasm tended to create imposture."—M. Creighton, *Hist. of the Papacy during the Period of the Reformation, v.* 1, *pp.* 145–146.

WHITE SHIP, The sinking of the.—William, the only legitimate son of Henry I. of England, accompanied his father on a visit to Normandy (A. D. 1120). "When they were about to return by the port of Barfleur, a Norman captain, Thomas Fitz-Stephen, appeared and claimed the right of taking them in his ship, on the ground that his father had been captain of the 'Mora,' in which the Conqueror crossed to invade England. The king did not care to alter his own arrangements, but agreed that his son should sail in the 'Blanche Nef' [the White Ship] with Fitz-Stephen. William Ætheling, as the English called him, was accompanied by a large train of unruly courtiers, who amused themselves by making the sailors drink hard before they started, and dismissed the priests who came to bless the voyage with a chorus of scoffing laughter. It was evening before they left the shore, and there was no moon; a few of the more prudent quitted the ship, but there remained nearly 300 — a dangerous freight for a small vessel. However, fifty rowers flushed with wine made good way in the waters; but the helmsman was less fit for his work, and the vessel struck suddenly on a sunk rock, the Raz de Catteville. The water rushed in, but there was time to lower a boat, which put off with the prince. When in safety, he heard the cries of his sister, the countess of Perche, and returned to save her. A crowd of desperate men leaped into the boat; it was swamped, and all perished." —C. H. Pearson, *Hist. of Eng. during the Early and Middle Ages, v.* 1, *p.* 445.

WILDCAT BANKS.—"During Jackson's struggle with the Bank of the United States [see United States of Am.: A. D. 1833–1836, and 1835–1837] many new banks had been formed in various States, generally with little or no capital to pay the notes which they issued. They bought large quantities of cheaply printed bills. As these bills had cost them very little, they could afford to offer a higher price in paper money for lands in distant States and Territories than others could afford to offer in gold and silver. Having bought the lands for this worthless money, the wildcat bankers sold them for good money, hoping that their own bills would not soon find their way back for payment. If they were disappointed in this hope, the bank 'failed,' and the managers started a new one."—A. Johnston, *Hist. of the U. S. for Schools, sect.* 496.—See, also: Money and Banking: A. WINCEBY FIGHT (1643).—The sharp encounter known as Winceby Fight, in the English civil war, was one of Cromwell's successes, which drove the royalist forces out of the Lincolnshire country, and compelled the Marquis of Newcastle, who was besieging Hull, to abandon the siege. "Cromwell himself was nearer death in this action than ever in any other; the victory, too, made its due figure, and 'appeared in the world.' Winceby, a small upland hamlet, in the Wolds, not among the Fens, of Lincolnshire, is some five miles west of Horncastle. The confused memory of this Fight is still fresh there." The Fight occurred Oct. 10, 1643.—T. Carlyle, *Oliver Cromwell's Letters and Speeches, letter* 18 (*v.* 1).—See HULL.

WINCHESTER, General: Defeat at the Raisin. See UNITED STATES OF AM.: A. D. 1812–1813 HARRISON'S NORTHWESTERN CAMPAIGN.

WINCHESTER, England: Origin of.—"There can be little doubt that a town, of greater or less importance, has existed since the earliest dawn of English history on the same place where stands the Winchester of to-day. . . . If the first founders of the ancient city were Celtic Britons, covering with their rude dwellings the summit and sides of S. Catherine's Hill they were certainly conquered by the Belgæ, also probably of Celtic origin, who, crossing over from Gaul, established themselves in a large district of southern England. But whether in their time Winchester was called Caer Gwent is doubtful; very probably it was simply Gwin or Gwent, the white place. . . . But as there is no question of the Roman occupation of Britain, first by Julius Cæsar, later on by Claudius and Vespasian, so we know that the settlement on the Itchen was turned into Venta Belgarum, and S. Catherine's Hill converted into a Roman camp. . . . Venta, as well as many other towns, was completely Romanised. . . . But the time arrived when Rome could no longer defend herself at home, and was thus forced to leave Britain to contend with the wild Northmen who had already begun their inroads. The Britons implored their former masters to come back and help them, but in vain. . . . We know how Vortigern, chief among the southern British kings, invited the Saxon adventurers to help him against the Picts and Scots, who encroached more and more in Britain. . . . In 495 (as we learn from the Brito-Welsh Chronicle), there 'came two ealdormen to Britain, Cerdic and Cymric,' who landed at Hamble Creek, and eventually, after many battles much extolled in the Saxon Chronicle, became kings of the West Saxons. Cerdic is said to have been crowned in Venta, to have slaughtered most of the inhabitants and all the priests, and to have converted the cathedral into a heathen temple. . . . The name Venta now becomes Wintana, with the affix of 'ceaster,' Saxon for fortified place."—A. R. R. Bramston and A. C. Leroy, *Historic Winchester, ch.* 1.—See, also, VENTA.

A. D. 1805-1848.—Territorial vicissitudes.—Admission into the Union as a State.—From 1805 to 1809, Wisconsin formed a part of Indiana Territory. From 1809 to 1818 her territory was embraced in the Territory of Illinois, excepting a small projection at the northeast which was left out of the described boundaries and belonged nowhere. When Illinois became a State, in 1818, and her present boundaries were established, all the country north of them was joined to Michigan Territory. In 1834 that huge Territory was still further enlarged by the temporary addition to it of a great area west of the Mississippi, embracing the present states of Iowa, Minnesota and part of Dakota. It was an unwieldy and impracticable territorial organization, and movements to divide it, which had been on foot long before this last enlargement, soon attained success. In 1836, the year before Michigan became a State, with her present limits, the remaining Territory was organized under the name of Wisconsin. Two years later, "by act of June 12, 1838, congress still further contracted the limits of Wisconsin by creating from its trans-Mississippi tract the Territory of Iowa. This, however, was in accordance with the original design when the country beyond the Mississippi was attached to Michigan Territory for purposes of temporary government, so no objection was entertained to this arrangement on the part of Wisconsin. The establishment of Iowa had reduced Wisconsin to her present limits, except that she still held, as her western boundary, the Mississippi river to its source, and a line drawn due north therefrom to the international boundary. In this condition Wisconsin remained until the act of congress approved August 6, 1846, enabling her people to form a state constitution. . . . Wisconsin was admitted into the Union, by act approved May 29, 1848, with her present limits."—R. G. Thwaites, *The Boundaries of Wisconsin* (*Wis. State Hist. Soc. Coll's, v.* 11, *pp.* 455–468).

WISCONSIN, University of.—"In 1838, two years after organization as a Territory, Wisconsin petitioned Congress for aid to establish a university. The request was granted, the usual seventy-two sections of land were set aside for this object, and the Territorial Legislature at once passed a law establishing the University of the Territory of Wisconsin. The organization of a board of trustees was, however, the only other action which took place previous to the adoption of the State Constitution in 1848; this provided for the establishment of a State university 'at or near the seat of government,' and stated, emphatically, that the lands granted for a university should constitute a perpetual fund, the income of which should be devoted to the support of this institution. This declaration was apparently to little purpose, as the State has treated these domains as granted absolutely, and not as held in trust. There is probably no worse example of mismanaged public educational funds on record than is to be found in connection with this institution. . . . The entire sum realized from the 46,080 acres was only 'about $150,000.' The University of Wisconsin was established in 1850 on the basis of the funds thus secured, but even while passing laws for the sale of the university lands the Legislature realized that the income would be insufficient to support the institution, and they therefore petitioned Congress for seventy-two additional sections in lieu of the saline lands granted to the State in 1848 but never located. Congress granted this petition in 1854. . . . An opportunity to atone for past errors was now afforded the Legislature. It began to be realized, after it was too late to enact suitable laws to remedy the evil, that the best lands had been sold at a disadvantage. It was felt that, whereas the policy pursued had benefited

the State at large, it was not faithful to the increase of the seminary fund. . . . After fully examining the claims of the regents and the condition of the university in 1872 for four years, this body granted $10,000 annually, to atone for the injustice done by the State in selecting for an endowment unproductive lands."—F. W. Blackmar, *Hist. of Federal and State Aid to Higher Education in the U. S.* (*Bureau of Ed., Circ. of Information*, 1890, *no.* 1), *pp.* 250–251.

WITENAGEMOT, The.—"The Witenagemot or assembly of the wise. This [in old English history] is the supreme council of the nation, whether the nation be Kent or Mercia as in the earlier, or the whole gens Anglorum et Saxonum, as in the later history. The character of the national council testifies to its history as a later development than the lower courts, and as a consequence of the institution of royalty. The folkmoot or popular assembly of the shire is a representative body to a certain extent: it is attended by the representatives of the hundreds and townships, and has a representative body of witnesses to give validity to the acts that are executed in it. . . . The council of the aggregated state is not a folkmoot but a witenagemot. . . . On great occasions . . . we must understand the witenagemot to have been attended by a concourse of people whose voices could be raised in applause or in resistance to the proposals of the chiefs. But that such gatherings shared in any way the constitutional powers of the witan, that they were organised in any way corresponding to the machinery of the folkmoot, that they had any representative character in the modern sense, as having full powers to act on behalf of constituents, that they shared the judicial work, or except by applause and hooting influenced in any way the decision of the chiefs, there is no evidence whatever. . . . The members of the assembly were the wise men, the sapientes, witan; the king, sometimes accompanied by his wife and sons; the bishops of the kingdom, the ealdormen of the shires or provinces, and a number of the king's friends and dependents. . . . The number of the witan was thus never very large."—W. Stubbs, *Const. Hist. of Eng., ch.* 6, *sect.* 51–52 (*v.* 1).—The constitution and powers of the witenagemot are very fully discussed by Mr. Kemble, who gives also a list of the recorded witenagemots, with comments on the business transacted in them.—J. M. Kemble, *The Saxons in Eng., bk.* 2, *ch.* 6 (*v.* 2).

WOMAN'S RIGHTS.—WOMAN SUFFRAGE: A. D. 1790-1849.—The pioneer advocates.—"In 1790, Mary Wollstonecraft's 'Vindication of the Rights of Women,' published in London, attracted much attention from liberal minds. She examined the position of woman in the light of existing civilizations, and demanded for her the widest opportunities of education, industry, political knowledge, and the right of representation. . . . Following her, came Jane Marcet, Eliza Lynn, and Harriet Martineau—each of whom in the early part of the 19th century exerted a decided influence upon the political thought of England. . . . Frances Wright, a person of extraordinary powers of mind, born in Dundee, Scotland, in 1797, was the first woman who gave lectures on political subjects in America. When sixteen years of age she heard of the existence of a country in which freedom for the people had been proclaimed; she was filled with joy and a determination to visit the American Republic where the foundations of justice, liberty, and equality had been so securely laid. In 1820 she came here, traveling extensively North and South. She was at that time but twenty-two years of age. . . . Upon her second visit she made this country her home for several years. Her radical ideas on theology, slavery, and the social degradation of woman, now generally accepted by the best minds of the age, were then denounced by both press and pulpit, and maintained by her at the risk of her life. . . . In 1832, Lydia Maria Child published her 'History of Woman,' which was the first American storehouse of information upon the whole question, and undoubtedly increased the agitation. In 1836, Ernestine L. Rose, a Polish lady—banished from her native country by the Austrian tyrant, Francis Joseph, for her love of liberty—came to America, lecturing in the large cities North and South upon the 'Science of Government.' She advocated the enfranchisement of woman. Her beauty, wit, and eloquence drew crowded houses. About this period Judge Hurlbut, of New York, a leading member of the Bar, wrote a vigorous work on

'Human Rights,' in which he advocated political equality for women. This work attracted the attention of many legal minds throughout that State. In the winter of 1836, a bill was introduced into the New York Legislature by Judge Hertell, to secure to married women their rights of property. This bill was drawn up under the direction of Hon. John Savage, Chief-Justice of the Supreme Court, and Hon. John C. Spencer, one of the revisers of the statutes of New York. It was in furtherance of this bill that Ernestine L. Rose and Paulina Wright at that early day circulated petitions. The very few names they secured show the hopeless apathy and ignorance of the women as to their own rights. As similar bills were pending in New York until finally passed in 1848, a great educational work was accomplished in the constant discussion of the topics involved. During the winters of 1844–5–6, Elizabeth Cady Stanton, living in Albany, made the acquaintance of Judge Hurlbut and a large circle of lawyers and legislators, and, while exerting herself to strengthen their convictions in favor of the pending bill, she resolved at no distant day to call a convention for a full and free discussion of woman's rights and wrongs. . . . In 1840, Margaret Fuller published an essay in the Dial, entitled 'The Great Lawsuit, or Man vs. Woman: Woman vs. Man.' In this essay she demanded perfect equality for woman, in education, industry, and politics. It attracted great attention and was afterward expanded into a work entitled 'Woman in the Nineteenth Century.' . . . In the State of New York, in 1845, Rev. Samuel J. May preached a sermon at Syracuse, upon 'The Rights and Conditions of Women,' in which he sustained their right to take part in political life, saying women need not expect 'to have their wrongs fully redressed, until they themselves have a voice and a hand in the enactment and administration of the laws.' . . . In 1849, Lucretia Mott published a discourse on woman, delivered in the Assembly Building, Philadelphia, in answer to a Lyceum lecture which Richard H. Dana, of Boston, was giving in many of the chief cities, ridiculing the idea of political equality for woman. . . . It was her early labors in the temperance cause that first roused Susan B. Anthony to a realizing sense of woman's social, civil, and political degradation, and thus secured her life-long labors for the enfranchisement of woman. In 1847 she made her first speech at a public meeting of the Daughters of Temperance in Canajoharie, N. Y. The same year Antoinette L. Brown, then a student at Oberlin College, Ohio, the first institution that made the experiment of co-education, delivered her first speech on temperance in several places in Ohio, and on Woman's Rights, in the Baptist church at Henrietta, N. Y. Lucy Stone, a graduate of Oberlin, made her first speech on Woman's Rights the same year in her brother's church at Brookfield, Mass. Nor were the women of Europe inactive."—E. C. Stanton, S. B. Anthony, and M. J. Gage, eds., *Hist. of Woman Suffrage, ch.* 1.

A. D. 1840-1890.—The organized agitation. —"In 1840 a 'World's Antislavery Convention' was held in London, and all Antislavery organizations throughout the world were invited to join in it, through their delegates. Several American societies accepted the invitation, and elected delegates, six or eight of whom were women, Lucretia Mott and Mrs. Wendell Phillips among them. The excitement caused by their presence in London was intense, for the English Abolitionists were very conservative, and never dreamed of inviting women to sit in their Convention. And these women who had come among them had rent the American Antislavery Societies in twain, had been denounced from the pulpit, anathematized by the press, and mobbed by the riffraff of the streets. . . . A long and acrimonious debate followed on the admission of the women. . . . When the vote was taken, the women delegates were excluded by a large majority. William Lloyd Garrison did not arrive in London until after the rejection of the women. When he was informed of the decision of the Convention he refused to take his seat with the delegates. And throughout the ten days' sessions he maintained absolute silence, remaining in the gallery as a spectator. . . . The London Convention marked the beginning of a new era in the woman's cause. Hitherto, the agitation of the question of woman's equal rights had been incidental to the prosecution of other work. Now the time had come when a movement was needed to present the claims of woman in a direct and forcible manner, and to take issue with the legal and social order which denied her the rights of human beings, and held her in everlasting subjection. At the close of the exasperating and insulting debates of the 'World's Antislavery Convention,' Lucretia Mott and Mrs. Elizabeth Cady Stanton agreed to hold a Woman's Rights Convention on their return to America, and to begin in earnest the education of the people on the question of woman's enfranchisement. Mrs. Stanton had attended the Convention as a bride, her husband having been chosen a delegate. Accordingly the first Woman's Rights Convention of the world was called at Seneca Falls, New York, on the 19th and 20th of July, 1848. It was attended by crowds of men and women, and the deepest interest was manifested in the proceedings. 'Demand the uttermost,' said Daniel O'Connell, 'and you will get something.' The leaders in the new movement, Lucretia Mott and Mrs. Stanton, with their husbands, and Frederick Douglass, acted on this advice. They demanded in unambiguous terms all that the most radical friends of women have ever claimed. . . . The Convention adjourned to meet in Rochester, New York, August 2, 1848. . . . A third Convention was held at Salem, Ohio, in 1850; a fourth in Akron, Ohio, in 1851; a fifth in Massillon, Ohio, in 1852; another at Ravenna, Ohio, in 1853, and others rapidly followed. The advocates of woman suffrage increased in number and ability. Superior women, whose names have become historic, espoused the cause—Frances D. Gage, Hannah Tracy Cutler, Jane G. Swisshelm, Caroline M. Severance, Celia C. Burr, who later became Mrs. C. C. Burleigh, Josephine S. Griffing, Antoinette L. Brown, Lucy Stone, Susan B. Anthony, Paulina W. Davis, Caroline H. Dall, Elizabeth Oakes Smith, Ernestine L. Rose, Mrs.

C. H. Nichols, Dr. Harriot K. Hunt; the roll-call was a brilliant one, representing an unusual versatility of culture and ability. The First National Woman Suffrage Convention was held in Worcester, Massachusetts, October 23 and 24, 1850. It was more carefully planned than any that had yet been held. Nine States were represented. The arrangements were perfect — the addresses and papers were of the highest character — the audiences were at a white heat of enthusiasm. The number of cultivated people who espoused the new gospel for women was increased by the names of Ralph Waldo Emerson, Theodore Parker, Bronson and Abby May Alcott, Thomas W. Higginson, William I. Bowditch, Samuel E. and Harriet W. Sewall, Henry Ward Beecher, Henry B. Blackwell, Ednah D. Cheney, Hon. John Neal, Rev. William H. Channing, and Wendell Phillips. . . . A dozen years were spent in severe pioneer work and then came the four years Civil War. All reformatory work was temporarily suspended, for the nation then passed through a crucial experience, and the issue of the fratricidal conflict was national life or national death. The transition of the country from peace to the tumult and waste of war was appalling and swift, but the regeneration of its women kept pace with it. . . . The development of those years, and the impetus they gave to women, which has not yet spent itself, has been wonderfully manifested since that time. . . . It has been since the war, and as the result of the great quickening of women which it occasioned, that women have organized missionary, philanthropic, temperance, educational, and political organizations, on a scale of great magnitude. . . . In 1869, two great National organizations were formed. One styled itself 'The National Woman Suffrage Association,' and the other was christened 'The American Woman Suffrage Association.' The first established its headquarters in New York, and published a weekly paper, 'The Revolution,' which was ably edited by Mrs. Stanton and Miss Anthony. 'The American' made its home in Boston, and founded 'The Woman's Journal,' which was edited by Mrs. Mary A. Livermore, Mrs. Julia Ward Howe, Mrs. Lucy Stone, William Lloyd Garrison and Thomas W. Higginson. . . . After twenty years of separate activities, a union of the two national organizations was effected in 1890, under the composite title of 'The National-American Woman Suffrage Association.'" — M. A. Livermore, *Woman in the State* (*Woman's Work in America, ch.* 10).

A. D. 1842-1892.—Women in the Medical profession. — "The first advocate for women medical students, Miss Elizabeth Blackwell, after many years of struggle obtained entrance into the medical faculty of Geneva in 1842; in 1847 she received her doctor's degree, and went to England, Germany, and finally to Paris, to complete her studies. Her example fired others. In that same year a medical college for women was founded in Boston, in 1850 a similar one in Philadelphia, one in New York in 1868, and in Chicago in 1870. Soon after, the greater number of universities in America were thrown open to women, and by this their studies were largely extended. The difficulties proved far greater in Europe. The universities of Zürich in 1864, and of Berne in 1872, were the first to receive lady students for the study of medicine. In 1868 the Medical Faculty of Paris, chiefly through the intervention of the Empress Eugénie, first admitted lady students to follow the medical course. In Italy, in 1876, they obtained equal success; in Russia, an ukase of the Czar Alexander II., of November 2nd, 1872, conferred upon ladies the right to attend the medical courses in the Medico-Chirurgical Academy of St. Petersburg, but this permission was subsequently withdrawn on political grounds, on the accession of a new government. In 1874 the first school of medicine for women was started in London; in 1876 they were admitted to the study of medicine in Dublin. In Germany and Austro-Hungary women are not allowed to enter the universities, although ladies' associations have obtained thousands of signatures to petition both parliaments on the subject. From statistical sources, we learn that there are seventy lady doctors in practice in London, five in Edinburgh, and two in Dublin. Seven hundred lady doctors practise in Russia, of whom fifty-four are the heads of clinical schools and laboratories. In Italy, at the same time, there were only six. Spain has but two qualified lady doctors. Roumania, also, has two. Sweden, Norway, and Belgium have likewise comparatively few. In Berlin there are Dr. Franziska Tiburtius and Dr. Lehmus (who founded a poly-clinical school which is increasing year by year), Dr. Margaret Mengarin-Traube and Fraulein Kuhnow. In Austria, Dr. Rosa Kerschbaumer is the sole possessor of Government authority to practise her profession. In India, where native religion forbids their women calling in men doctors, there has been a strong movement in favour of ladies, and they have now one hundred lady doctors, three of whom are at the head of the three most important hospitals. The largest number of women practising medicine is in America."—A. Crepaz, *The Emancipation of Women, pp.* 99-103. — "The medical faculty of the University of Paris opened its doors to women in 1868, but at first only a very few availed themselves of the privileges thus offered. In 1878 the number in attendance was 32; during the next ten years (1878-'88) it increased to 114, and is at present 183, of whom the great majority (167) are Russians. The remainder are Poles, Rumanians, Servians, Greeks, and Scotch, and only one German."—*The Nation, Feb.* 14, 1895.

A. D. 1865-1883.—The higher Education of Women in England. See EDUCATION, MODERN: REFORMS &c.: A. D. 1865-1883.

A. D. 1869-1894.—Progress in Europe and America.—A certain number of the English cities "occupy a privileged position, under the title of 'municipal boroughs.' These alone are municipal corporations, enjoying a considerable degree of autonomy by virtue of charters of incorporation granted in the pleasure of the crown. . . . The other cities have as such no legal existence: they are simply geographical units. In past times the privilege of incorporation was often granted to wretched little hamlets. But whether they were once of consequence or not, the municipal corporations degenerated everywhere into corrupt oligarchies. The municipal reform of 1835 destroyed these hereditary cliques and extended the municipal franchise to all the inhabitants who paid the poor tax as occupants of realty. But in doing this . . . it was

WOMAN'S RIGHTS.

expressly provided in the Municipal Corporations Act of 1835 that the electoral franchise in the municipal boroughs should belong to male persons only. Before long the unorganized condition of the larger towns that were not municipal boroughs received the attention of Parliament. It did not grant them communal autonomy,— there could be no question of that,— but conceded special powers to establish sanitary systems and to undertake works of public utility such as lighting, paving, sewerage, etc. The special acts passed for these purposes from time to time, as the necessity for them arose, were consolidated and made general in two statutes: the Public Health Act of 1848, for a class of towns designated as 'local government districts,' and the Commissioners' Clauses Act of 1847, for the cities described as 'improvement commissions districts.' These acts gave to these urban agglomerations an incipient municipal organization, by establishing boards of health in some, and in others commissions to direct the public works. In both these classes of 'nascent, half-developed municipalities,' which had scarcely emerged from the parochial phase of local self-government, the authorities — i. e. the members of the boards of health and the commissioners — were elected, as in the parishes, by the ratepayers without distinction of sex. As these cities enlarged and developed, they were admitted to the honor of municipal incorporation. But since the Municipal Corporations Act limited the franchise to men, it resulted that while the city which was promoted to the rank of municipal borough saw its rights increased, a part of its inhabitants — the women — saw theirs suppressed. This anomaly gave the advocates of woman suffrage a chance to demand that the ballot be granted to women in the municipal boroughs. In 1869 Mr. Jacob Bright introduced such a measure in the House of Commons, and it was adopted almost without discussion. . . . But when the English legislator placed the administration of the 'nascent, half-developed municipalities'— which were only temporarily such and which might become cities of the first rank — on the same plane, as far as the suffrage of women was concerned, with the government of the parishes, he substituted a fluctuating for a permanent test, and as a result wiped out his own line of demarcation. When this fact was brought out, Parliament could not but recognize and bow to it. This recognition was decisive: it resulted in the overthrow of the electoral barriers against women in the entire domain of local self-government. The clause which, upon the proposal of Mr. Jacob Bright, was inserted in section 9 of the municipal act of 1869, found its way into the revised municipal act of 1882. Section 63 of this latter act reads: 'For all purposes connected with and having reference to the right to vote at municipal elections, words importing in this act the masculine gender include women.' This clause gave women the ballot in the municipal boroughs, but did not make them eligible to office. And as the general qualification for municipal suffrage is the occupancy by the elector in his own name of a house subject to the poor tax, the law includes independent women only, not married women. . . . When in 1881 the municipal suffrage was extended to women in Scotland, the question whether the separated woman could vote was decided in her favor. But of course this does not change the position of married women in England. A year after the introduction of the municipal suffrage of women they obtained (in 1870) the school vote also, in connection with the establishment of the existing system of primary instruction. . . . It still remained for women to make their way into the local government of the county; but county government, although representative, was not elective. In 1888 county councils were established, chosen by the ratepayers. The analogy of the municipal councils demanded that women should be included among the electors of the new local assemblies. Accordingly the Local Government Act of 1888 admits women to the electorate in England, and the act of 1889 gives them the same right in Scotland. . . . In Sweden local self-government is exercised in first instance, in the city and country communes, by the taxpayers in general assembly, or town meeting, where their votes are reckoned in proportion to the taxes paid, according to a graded scale, just as in the English vestries. In the cities with a population above 3,000 the taxpayers elect a communal council. . . . In the full assemblies of the communes that have no councils, and in the elections at which councillors are chosen, unmarried women have the same right of participation as men. . . . The next higher instance of local self-government consists of provincial councils (landstings). All the municipal electors, women not excepted, vote for the members of these councils. . . . In Norway women have no share in local government, except in the school administration. . . . In Denmark women are entirely excluded from local government; but they have been admitted to it in one Danish dependency — Iceland. . . . Finland, which was attached to Sweden for centuries before it fell under the sway of Russia, is still influenced by the movement of legislation in the former mother-country. . . . The law of February 6, 1865, concerning the rural communes, admitted women to communal rights under almost the same conditions as in Sweden. . . . The law of April 14, 1856, concerning the organization of the rural communes in the six eastern provinces of the kingdom of Prussia (section 6), as well as the analogous law of March 19, 1856, for the province of Westphalia (section 15), provide that persons of female sex who possess real property carrying with it the right to vote shall be represented — the married women by their husbands, the single women by electors of the male sex. A similar provision was adopted for the province of Schleswig-Holstein, after its annexation by Prussia (law of September 22, 1867, section 11). But in the Rhine province, where the administrative and the private law still show deep traces of the French influence, women are expressly excluded from the communal franchise. . . . In Saxony women are admitted to the communal vote in the country districts on the same terms as men. . . . Eligibility to communal office is denied to women in all the countries enumerated above. In Austria, as one consequence of the revolutionary movement of 1848, the legislator endeavored to infuse fresh life into the localities by giving a liberal organization to the rural communes. The law of 1849 granted communal rights to all persons paying taxes on realty and industrial enterprises, and also to various classes of 'capacities'— ministers of religion, university

graduates, school principals and teachers of the higher grades, etc. Among the electors of the first and most important group, based wholly upon property, were included women, minors, soldiers in active service and some other classes of persons who, as a rule, were excluded from suffrage, on condition that their votes be cast through representatives. . . . The Russian village community, the mir, which has come down across the centuries into our own time with very few changes in its primitive organization, is a typical example of rudimentary local self-government, where all who have an interest, not excepting the women, have a right to be heard in the common assemblies. . . . In the Dominion of Canada local suffrage has only recently been granted to women. The first law regulating this matter was passed in the province of Ontario (Upper Canada) in 1884. This law has served as an example, and in part also as a model, for the other provinces. The electoral rights granted to women by the legislation of the province of Ontario may be grouped under four heads: (a) participation in municipal elections, (b) participation in municipal referenda, (c) participation in school-board elections, and (d) eligibility to office. All unmarried women and widows twenty-one years of age, subjects of her Majesty and paying municipal taxes on real property or income, may vote in municipal elections. . . . Finally, all taxpayers resident in the school district are recognized by the laws of 1885 and 1887 as eligible to the office of school trustee. . . . Female suffrage does not exist in the great French-speaking province of Quebec (Lower Canada), in New Brunswick or in Prince Edward Island. . . . In almost all the continental [Australasian] colonies the municipal suffrage rests upon the same basis as does the parish franchise of the mother-country, i. e. the possession or occupation of real property. . . . [In the United States] several States have granted to women simply the right of being elected to school offices, provided always that they possess the qualifications prescribed for men. The question is thus decided in California, Illinois, Indiana, Iowa, Louisiana, Maine, Pennsylvania and Rhode Island. . . . At the present time the system of granting to women both rights — eligibility and suffrage — in school matters has been adopted in the following states besides Massachusetts: Colorado, North and South Dakota, Idaho, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oregon, Vermont, Washington and Wisconsin and the territory of Arizona. Of course to this list must be added Wyoming, where women vote at all elections, and Kansas, where they possess complete local suffrage. Finally, Kentucky and Nebraska admit women only to the school franchise, and that only under special conditions."— M. Ostrogorski, *Local Woman Suffrage* (*Pol. Science Quarterly, Dec.*, 1891).— "In three Territories . . . the right of voting at legislative elections was given by the legislature of the Territory, and in one of these, Wyoming, it was retained when the Territory received Statehood in 1890. In Utah it was abolished by a Federal statute, because thought to be exercised by the Mormon wives at the bidding of their polygamous husbands, and thus to strengthen the polygamic party. In Washington Territory the law which conferred it in 1883 was declared invalid by the courts in 1887, because its nature had not been properly described in the title, was re-enacted immediately afterwards, and was in 1888 again declared invalid by the U. S. Territorial Court, on the ground that the Act of Congress organizing the Territorial legislature did not empower it to extend the suffrage to women. In enacting their State Constitution (1889) the people of Washington pronounced against female suffrage by a majority of two to one; and a good authority declared to me that most of the women were well pleased to lose the privilege. In 1893 the legislature of Colorado submitted to the voters (in virtue of a provision in the Constitution) a law extending full franchise for all purposes to women, and it was carried by a majority of 6,347. . . . In Michigan in 1893, women received the suffrage in all municipal elections. In Michigan, however, the law has since been declared unconstitutional. . . . In Connecticut, the latest State which has extended school suffrage to women (1893), it would appear that the women have not, so far, shown much eagerness to be registered. However, while the advanced women leaders and Prohibitionists started a campaign among the women voters, the husbands and brothers of conservative proclivities urged their wives and sisters to register, and not without success. In Wyoming (while it was still a Territory) women served as jurors for some months till the judges discovered that they were not entitled by law to do so, and in Washington (while a Territory) they served from 1884 to 1887, when the legislature, in regranting the right of voting, omitted to grant the duty or privilege of jury service. . . . As respects the suffrage in Wyoming, the evidence I have collected privately is conflicting. . . . No opposition was offered in the Convention of 1889, which drafted the present Constitution, to the enactment of woman suffrage for all purposes. The opinion of the people at large was not duly ascertained, because the question was not separately submitted to them at the polls, but there can be little doubt that it would have been favourable. . . . The whole proceedings of the Convention of 1889 leave the impression that the equal suffrage in force since 1869 had worked fairly, and the summing up of the case by a thoughtful and dispassionate British observer (Mr. H. Plunkett) is to the same effect." — J. Bryce, *The American Commonwealth* (*3d ed.*), *ch.* 96 (*v.* 2).—"No complete and reliable statistics have ever been obtained of the number of women who register and vote on school questions. This varies greatly in different localities, and in the same localities in different years. With women, as with men, the questions connected with the schools do not suffice to bring out many voters as a rule. Those few who have voted hitherto have been of more than average character and ability, and influenced wholly by public spirit. But comparatively few, even of suffragists, have as yet availed themselves of the privilege. To secure any general participation of women in elections, a wider range of subjects must be thrown open to them. Wherever, as in Kansas, party issues and moral questions are involved, the women show a greater interest. In several States, as in Kansas, Iowa, and Rhode Island, prohibition amendments are said to have been carried by the efforts of women-workers at the polls, although not themselves voters."— *The Nation, Apr.* 28, 1887, *p.* 362.

WRANGLERS, Senior.—At Oxford and Cambridge Universities, "by a strange relic of the logical and disputatory studies of the Middle Ages, the candidates for University honors maintained in public some mathematical thesis, about which they disputed in Latin, never, as it may be supposed, of the best. To keep up the illusion of the monkish time, and the seven liberal arts, a little metaphysics and a good deal of theology were thrown in at the time of the examination; but the real business of the 'schools' at Cambridge was mathematics. The disputing, however, was so important a part of the performances that the first division of those to whom were awarded honors were called by distinction, 'the wranglers'; and the head man — the proud recipient of all the glory which at the end of a four years' course the ancient University showered on the son she possessed most distinguished in her favorite studies — was called the senior wrangler. In process of time, the disputations and Latin were all done away with. An examination from printed papers was made the test. Yet, still, every year, at the end of the arduous eight days' trial, the undergraduate who takes his bachelor's degree in virtue of passing the best examination in mathematics, is called the senior wrangler; and attains the proudest position that Cambridge has to bestow."— W. Everett, *On the Cam, lect.* 2.

YAKOOB BEG, The Dominion of.—The Chinese obtained possession of Kashgar or Chinese Turkestan (see TURKESTAN) about 1760, and held it for a century, overcoming much revolt during the last forty years of that period. In 1862, the revolt assumed a more formidable character than it had borne before. Its beginning was among a neighboring people called, variously, the Tungani, Dungani, or Dungans. These were "a Mahomedan people settled in the north-west province of Kansuh and in a portion of Shensi. Many of them had migrated westward at the time of the wars of Keen Lung, and had colonized various parts of the Chinese conquests. During a century this movement westward had continued, and in 1862 the Tungani represented the majority of the population, not only in parts of Kansuh, but also in the country to the west, as far as Ili and the city of Turfan. Although Mahomedans, they had acted as the soldiers of the Chinese. They had won their battles, laid down their roads, and held the Tartar population in check. From the Tungani the Chinese never for an instant expected danger. They were certainly heretics; but then they were part and parcel of themselves in every other respect. They hated the Khokandians and the people of Kashgar with a hatred that was more bitter than that they bore to the Khitay or Buddhist Chinese. In all essentials the Tungani were treated exactly like the most favoured children of the empire. . . . The only cause that it is possible to assign for their rebellion is that vague one of the religious revival which was then manifesting itself among the Mahomedans all over the world. But whatever the cause, the consequences were clear enough. In 1862 a riot occurred at a village in Kansuh. Order was restored with some small loss of life; and the momentary alarm which had been caused by it passed away. The alarm was, however, only too well founded. A few weeks afterwards a more serious riot took place at the town of Houchow or Salara. This was the signal for the rising of the Tungani in all directions. The unanimity shown by the various Tungani settlements proved that there had been a preconcerted arrangement amongst them; but the Chinese had known nothing of it. . . . The few Imperial troops remaining in the province of Kansuh were unable to withstand the desperate and unanimous assault of the Mahomedans. They were swept out of existence, and with them the larger portion of the Khitay population as well. The Mahomedan priests took the lead in this revolt, and the atrocities which they and their followers enacted were of the most horrible and bloodthirsty character. The butchery of tens of thousands of their Buddhist subjects in Kansuh appealed loudly to the Chinese Government for revenge; and it was not long before their troops restored Kansuh to its allegiance. Those of the Tungani who were captured were given over to the executioner. But a large number escaped, fleeing westward to those cities beyond the desert, where other Mussulmans had imitated, with like success, the deeds of their kinsmen in Kansuh. . . . No sooner then did the tidings of the events in Kansuh reach Hamil and Barkul, Turfan and Manas, than risings at once took place against the Khitay. In all cases the movement was successful. The Manchus were deposed: the 'mollahs' were set up in their stead. After a short interval the other cities of Karashar, Kucha, and Aksu, followed the example, with an identical result. The Tungan revolt proper had then reached its limit. . . . The communications between Pekin and Jungaria were cut, and a hostile territory of nearly 2,000 miles intervened. To restore those communications, to reduce that hostile country, would demand a war of several campaigns; and China was not in a condition to make the slightest effort. All that her statesmen could hope for was, that she would not go irretrievably to pieces. The Tungani flourished on the misfor-

tunes of the empire. . . . During some months after the first successes of the Tungani, the people of Kuldja and Kashgaria remained quiet, for the prestige of China's power was still great. But when it became evident to all, that communication was hopelessly cut off between the Chinese garrisons and the base of their strength in China, both the Tungan element and the native population began to see that their masters were ill able to hold their own against a popular rising. This opinion gained ground daily, and at last the whole population rose against the Chinese and massacred them. . . . But no sooner had the Chinese been overthrown, than the victors, the Tungani and the Tarantchis, began to quarrel with each other. Up to the month of January, 1865, the rising had been carried out in a very irregular and indefinite manner. . . . It was essentially a blind and reckless rising, urged on by religious antipathy; and, successful as it was, it owed all its triumphs to the embarrassments of China. The misfortunes of the Chinese attracted the attention of all those who felt an interest in the progress of events in Kashgaria. Prominent among these was a brother of Wali Khan, Buzurg Khan [heir of the former rulers, the exiled Khojas], who resolved to avail himself of the opportunity afforded by the civil war for making a bold attempt to regain the place of his ancestors. Among his followers was Mahomed Yakoob, a Khokandian soldier of fortune, already known to fame in the desultory wars and feuds of which Central Asia had been the arena. His previous career had marked him out pre-eminently as a leader of men, and he now sought in Eastern Turkestan that sphere of which Russian conquests had deprived him in its Western region. There is little to surprise us in the fact that, having won his battles, Yakoob deposed and imprisoned his master Buzurg. In several campaigns between 1867 and 1873 he beat back the Tungani from his confines, and established an independent government in the vast region from the Pamir to beyond Turfan, and from Khoten and the Karakoram to the Tian Shan. He treated on terms of dignity with the Czar, and also with the Government of India. He received English envoys and Russian ambassadors, and his palace was filled with presents from London and St. Petersburg. . . . Urged on by some vague ambition, he made war upon the Tungani, when every dictate of prudence pointed to an alliance with them. He destroyed his only possible allies, and in destroying them he weakened himself both directly and indirectly. In the autumn of 1876 Yakoob Beg had indeed pushed forward so far to the east that he fancied he held Barkul and Hamil in his grasp; and the next spring would probably have witnessed a further advance upon these cities had not fate willed it otherwise. With the capture of the small village of Chightam, in 92° E. longitude, Yakoob's triumphs closed. Thus far his career had been successful; it may then be said to have reached its limit. In the autumn of 1876, the arrival of a Chinese army on his eastern frontier changed the current of his thoughts. . . . From November, 1876, until March, 1877, the Chinese generals were engaged in massing their troops on the northern side of the Tian Shan range. . . . Yakoob's principal object was to defend the Devan pass against the Chinese; but, while they attacked it in front, another army under General Chang Yao was approaching from Hamil. Thus outflanked, Yakoob's army retreated precipitately upon Turfan, where he was defeated, and again a second time at Toksoun, west of that town. The Chinese then halted. They had, practically speaking, destroyed Yakoob's powers of defence. That prince retreated to the town of Korla, where he was either assassinated or poisoned early in the month of May. . . . Korla was occupied on the 9th of October without resistance; and towards the end of the same month, Kucha, once an important city, surrendered. The later stages of the war were marked by the capture of the towns of Aksu, Ush Turfan, and Kashgar. With the fall of the capital, on the 17th of December, 1877, the fighting ceased. The Chinese authority was promptly established in the country as far south as Yarkand, and after a brief interval in Khoten."—D. C. Boulger, *Central Asian Questions, ch.* 12.

YANACONAS.—MAMACONAS.—"The Yanaconas were a class existing [in Peru] in the time of the Incas, who were in an exceptional position. They were domiciled in the houses of their masters, who found them in food and clothing, paid their tribute, and gave them a piece of land to cultivate in exchange for their services. But to prevent this from degenerating into slavery, a decree of 1601 ordered that they should be free to leave their masters and take service elsewhere on the same conditions." The Mamaconas of Peru were a class of domestic servants.—C. R. Markham (*Narrative and Critical Hist. of Am., v.* 8, *p.* 296).

YANAN FAMILY, The. See AMERICAN ABORIGINES: YANAN FAMILY.

YANG-TZE BASIN, The. See CHINA.

YANKEE: Origin of the term.—"The first name given by the Indians to the Europeans who landed in Virginia was 'Wapsid Lenape' (white people); when, however, afterwards, they began to commit murders on the red men, whom they pierced with swords, they gave to the Virginians the name 'Mechanschican' (long knives), to distinguish them from others of the same colour. In New England they at first endeavoured to imitate the sound of the national name of the English, which they pronounced 'Yengees.'" After about the middle of the Revolutionary War the Indians applied the name "Yengees" exclusively to the people of New England, "who, indeed, appeared to have adopted it, and were, as they still are, generally through the country called 'Yankees,' which is evidently the same name with a trifling alteration. They say they know the 'Yengees,' and can distinguish them by their dress and personal appearance, and that they were considered as less cruel than the Virginians or 'long knives.' The proper English they [for 'they' read 'the Chippeways and some other nations.' —*Editor's foot-note*] call 'Saggenash.'"—J. Heckewelder, *Hist., Manners, and Customs of the Indian Nations* (*Penn. Hist. Soc. Memoirs, v.* 12) *pp.* 142–143.—"The origin of this term [Yankees],

so frequently employed by way of reproach to the New England people, is said to be as follows. A farmer, by name Jonathan Hastings, of Cambridge, about the year 1713, used it as a cant, favorite word, to express excellency when applied to any thing; as a Yankee good horse, Yankee cider, &c., meaning an excellent horse and excellent cider. The students at college, having frequent intercourse with Mr. Hastings, and hearing him employ the term on all occasions, adopted it themselves, and gave him the name of Yankee Jonathan; this soon became a cant word among the collegians to express a weak, simple, awkward person, and from college it was carried and circulated through the country, till, from its currency in New England, it was at length taken up and unjustly applied to the New Englanders in common, as a term of reproach. It was in consequence of this that a particular song, called 'Yankee doodle,' was composed in derision of those scornfully called Yankees."—J. Thatcher, *Military Journal during the Revolutionary War, p.* 19.—"Dr. William Gordon, in his Hist. of the American War, ed. 1789, vol. i., pp. 324, 325, says it was a favourite cant word in Cambridge, Mass., as early as 1713, and that it meant 'excellent.' . . . Cf. Lowland Sc. 'yankie,' a sharp, clever, forward woman; 'yanker,' an agile girl, an incessant speaker; 'yanker,' a smart stroke, a great falsehood; 'yank,' a sudden and severe blow, a sharp stroke; 'yanking,' active, pushing (Jamieson). . . . If Dr. Gordon's view be right, the word 'yankee' may be identified with the Sc. 'yankie,' as above; and all the Scotch words appear to be of Scand. origin, due, ultimately Icel. 'jaga,' to move about. . . . The fundamental idea is that of 'quick motion'; see 'yacht.' But the word cannot be said to be solved."—W. W. Skeat, *Etymolog. Dict.*—"The best authorities on the subject now agree upon the derivation of this term from the imperfect effort made by the Northern Indians to pronounce the word 'English.'"—M. Schele de Vere, *Americanisms, p.* 22.

YEOMEN.—"A 'yeoman' is defined by Sir Tho. Smith (Rep. Anglor. lib. 1, c. 24) as he whom our law calls 'legalem hominem,' a free-born man that may dispend of his own free land in yearly revenues to the sum of forty shillings. But it had also a more general application, denoting like 'valet' a higher kind of service, which still survives in the current phrase to do 'yeoman's service.' In the household of the mediæval knight or baron the younger sons of yeomen would form a large proportion of the servitors, and share with the younger sons of knight or squire the common name of 'valetti.' The yeomen too who lived on their own land, but wore the 'livery of company' of some baron or lesser territorial magnate, would also be his 'valets.' The mediæval 'yeoman' was the tenant of land in free socage. The extent of his holding might be large or small."—T. P. Taswell-Langmead, *Eng. Const. Hist., p.* 343, *foot-note.*—"At the period when the higher gentry began to absorb what remained of the feudal nobility, and established themselves definitely as an upper class, the small landowners — freeholders holding estates of inheritance or for life — long leaseholders and the larger copyholders made corresponding progress, and the yeomen (the common term applied to all of them) began in their turn to fill the position and take the rank of an agricultural middle class. The reign of Henry VI. had marked the zenith of their influence; they had by that time fully realized the fact of their existence as a body. The inferior limit of their class was approximately determined by the electoral qualification of the forty-shilling freeholder (under the Act of 1430), or by the £4 qualification for the office of juror. The superior limit was marked from a legal point of view by the property qualification of a magistrate, but socially there was not on this side any definite boundary line. In 1446 it was considered necessary to forbid the county electors to return 'valetti,' that is yeomen, to the House of Commons, a proof that custom and opinion left to themselves did not look upon the higher section of their class as unworthy of a seat in Parliament, an honour originally confined to the knights. Fortescue testifies almost with triumph to the fact that in no country of Europe were yeomen so numerous as in England."—E. Boutmy, *The English Constitution, pt.* 2, *ch.* 4.—In later English use the word "yeoman" has signified "a man of small estate in land, not ranking among the gentry."

YEOMEN OF THE GUARD.—"This corps was instituted by Henry VII. in 1485. It now consists of 100 men, six of whom are called Yeomen Hangers, and two Yeomen Bedgoers; the first attending to the hangings and tapestries of the royal apartments, and the second taking charge of all beds during any royal removals. The yeomen of the guard carry up the royal dinner, and are popularly designated as 'beef-eaters,' respecting the origin of which name some differences of opinion exist, for many maintain that they never had any duties connected with the royal beaufet. A yeoman usher and a party of yeomen attend in the great chamber of the palace on drawing-room and levee days, to keep the passage clear."—C. R. Dodd, *Manual of Dignities, pt.* 2, *sect.* 1.

YOUNG MEN'S CHRISTIAN ASSOCIATIONS.—Although other and earlier movements for the religious association of young men are known to have been made, the existing widespread organization of Young Men's Associations appears to have started from work undertaken in London, England, in 1841, by a young man named George Williams, who went that year to London from Bridgewater, and found employment in a drapery or dry goods house. The story is told in a sketch of the London Association, published in the first volume of the Exeter Hall lectures, by W. E. Shipton, from which the following is derived: "In 1841 this young man, not yet twenty-one years of age, left Bridgewater and went to London, where he obtained a situation as junior assistant in the dry goods establishment of Messrs. Hitchcock & Co., St Paul's Church Yard. . . . He found among his fellow clerks a few professed followers of Christ. These he gathered, for prayer and Bible study, into one of the bed-rooms on the premises, after the business of the day was over. One by one they invited their careless associates to join them. Many were converted and the bed-room soon became too small to hold those desiring to attend. . . . 'To obtain the permanent and undisturbed use of another room, application to the principal [Mr. Hitchcock] became necessary, and this was a matter of some difficulty. Able and energetic as a man of business, he had shown no signs of religious feeling, he had done nothing to secure the comfort or welfare of his young men, nor did he check the evils which attended the conduct of business in his establishment, in common with many others, at the time. He was only known as the employer, and in that capacity, though no worse, was not better than the rest of his class. But the young men had waited on God for His direction and help, and in the strength of faith they went forward with their application. To their surprise it was received with sympathy, with tenderness. . . . The room was granted, the young men were thanked for their past efforts and prayers on behalf of the establishment, and the master became from that hour the father of his household, joining with his godly servants in solicitude for its spiritual welfare, reforming every arrangement inconsistent with the conscientious discharge of the duties or the personal comfort of those he employed, and in all things seeking to make that household an abode of peace, a pattern of godliness, a centre of Christian usefulness.' 'During the period of Mr. Hitchcock's religious anxiety, he had sought the advice of Mr. W. D. Owen, the principal of another large drapery house, whose religious character and benevolent efforts on behalf of their trade had made him generally respected, and to him he described the work of God which had begun amongst his assistants. Mr. Owen mentioned the fact to his principal assistant,' Mr. James Smith, 'who immediately commenced similar meetings for prayer and the study of the Holy Scripture amongst their young men.' In the early stages of this movement the late Mr. Edward Beaumont, one of the little band who had been converted in the bed-room meeting, wrote that one Sunday evening, in the latter part of May, 1844, he accompanied Mr. Williams to Surrey Chapel, and that, on the way, Mr. Williams told him that he was deeply impressed with the importance of introducing religious services, such as they were enjoying, into every large establishment in London. This conversation resulted in a conference between a few of the Christian young men in Mr. Hitchcock's establishment, at the close of one of their meetings. They then decided to call a meeting of all the Christian young men of the house for Thursday, June 6, 1844, to consider the importance and practicability of establishing such an association. . . . Mr. Williams attended the meeting and, in response to his invitation, Mr. James Smith was present at the meeting held in the former's bed-room, June 6, 1844. At this meeting it was decided to organize the Young Men's Christian Association. . . . Information of the organization of the London Association soon reached America. The first Association organized on the London basis was that of Montreal, Dec. 9, 1851. . . . Two years elapsed before any systematic effort was made to bring the 26 American Associations, which had by that time been organized, into communication with one another. . . . The first circular, which was issued February 28, 1854, and signed by Oscar Cobb, of Buffalo, and William Chauncy Langdon, of Washington,". . . asked "whether the Associations to which it was issued would favor the proposition to hold a convention of the American societies. Sixteen favorable and four negative replies were received. . . . Buffalo was selected as the place of meeting, and the convention assembled in that city June 7, 1854. Mr. Langdon, in an address delivered at the convention, showed that, as far as ascertained, 250 Associations were in existence, distributed as follows: Germany, 100; Holland, 4; France, 39; Switzerland, 21; Australasia, 3; Turkey, 2; Great Britain and Ire-

land, 42; Canada, 4; United States, 35. This convention at Buffalo, in 1854, was the first . . . conference of the Associations of any kind held in the English-speaking world."—R. R. McBurney, *Historical Sketch of the Y. M. C. A. (Year Book of the Y. M. C. A. of the U. S. and Canada, for* 1884–5).—The remarkable spread and growth of the Young Men's Christian Associations from those beginnings, half a century ago, are shown by the following statistics, published in the "Year Book of the Young Men's Christian Associations of North America" for 1899: Total number of Y. M. C. Associations in various countries of the world, 5,075; with a total membership numbering 465,902; owning and occupying 619 buildings, valued (with ground) at $24,542,000. In every one of these items the United States and Canada held the lead, with 1429 Associations, 228,568 members, and owning 344 buildings, valued at $19,847,930. For England, Ireland and Wales, the number of Associations reported is 371; members, 66,554; buildings, 97; value, $2,304,410. For Scotland, Associations, 262; members, 25,413; buildings, 28; value, $740,000. For Germany, Associations, 1405; members, 85,000; buildings, 57; value, $250,000. For Switzerland, Associations, 457; members, 10,000; buildings, 10; value, $50,000. For the Netherlands, Associations, 282; members, 7,723; buildings, 40, value, not given. For India, Associations, 102; members, 5,500; buildings, 7; value, $153,660. For Australia and New Zealand, Associations, 11; members, 2,200; buildings, 6; value, $335,000. For South Africa, Associations, 7; members, 2,310; buildings, 3; value, $240,000.

ZEMSTVO, The.—"The Zemstvo [in Russia] is a kind of local administration which supplements the action of the rural communes [see MIR], and takes cognizance of those higher public wants which individual communes cannot

possibly satisfy. Its principal duties are to keep the roads and bridges in proper repair, to provide means of conveyance for the rural police and other officials, to elect the justices of peace, to look after primary education and sanitary affairs, to watch the state of the crops and take measures against approaching famine, and in short to undertake, within certain clearly-defined limits, whatever seems likely to increase the material and moral well-being of the population. In form the institution is parliamentary — that is to say, it consists of an assembly of deputies which meets at least once a year, and of a permanent executive bureau elected by the assembly from among its members. . . . Once every three years the deputies are elected in certain fixed proportions by the landed proprietors, the rural communes, and the municipal corporations. Every province (guberniya) and each of the districts (uyezdi) into which the province is subdivided has such an assembly and such a bureau."—D. M. Wallace, *Russia, ch.* 14.

ZOAN.— TANIS. — SAN.— These are the names which, at different periods, have been given to an ancient city near the northeastern borders of Egypt, the ruins of which have been identified and are being explored, on the east bank of the canal that was formerly the Tanitic branch of the Nile. Both in Egyptian history and Biblical history Zoan was an important place. "The whole period of the Hebrew sojourn is closely interwoven with the history of Zoan. Here ruled the king in whose name Egypt was governed by the Hebrew, who was no less than regent; here ruled those who still favoured the people of Israel. Under the great Oppression, Zoan was a royal residence."—R. S. Poole, *Cities of Egypt, ch.* 5.

Also in: W. M. F. Petrie, *Tanis* (*2d Mem., Egypt Expl. Fund*). See, also, Jews: The Children of Israel in Egypt.

ZOBAH, Kingdom of.—A kingdom of brief importance, extending from the Orontes to the Euphrates, which appears among the allies of the Ammonites, in their war with David King of Israel.—H. Ewald, *Lect's on the Hist. of Israel, v.* 3, *pp.* 150–152.

ZOROASTRIANS.— MAGIANS. — PARSEES.—"The Iranians were in ancient times the dominant race throughout the entire tract lying between the Suliman mountains and the Pamir steppe on the one hand, and the great Mesopotamian valley on the other. . . . At a time which it is difficult to date, but which those best skilled in Iranian antiquities are inclined to place before the birth of Moses, there grew up, in the region whereof we are speaking, a form of religion marked by very special and unusual features. . . . Ancient tradition associates this religion with the name of Zoroaster. Zoroaster, or Zarathrustra, according to the native spelling, was, by one account, a Median king who conquered Babylon about B. C. 2458. By another, which is more probable, and which rests, moreover, on better authority, he was a Bactrian, who, at a date not quite so remote, came forward in the broad plain of the middle Oxus to instil into the minds of his countrymen the doctrines and precepts of a new religion. . . . His religion gradually spread from 'happy Bactra,' 'Bactra of the lofty banner,' first to the neighbouring countries, and then to all the numerous tribes of the Iranians, until at last it became the established religion of the mighty empire of Persia, which, in the middle of the 6th century before our era, established itself on the ruins of the Assyrian and Babylonian kingdoms, and shortly afterwards overran and subdued the ancient monarchy of the Pharaohs. In Persia it maintained its ground, despite the shocks of Grecian and Parthian conquest, until Mohammedan intolerance drove it out at the point of the sword, and forced it to seek a refuge further east, in the peninsula of Hindustan. Here it still continues, in Guzerat and in Bombay, the creed of that ingenious and intelligent people known to Anglo-Indians — and may we not say to Englishmen generally ? — as Parsees [see Parsees]. The religion of the Parsees is contained in a volume of some size, which has received the name of 'the Zendavesta.'. . . Anquetil Duperron introduced the sacred book of the Parsees to the knowledge of Europeans under this name; and the word thus introduced can scarcely be now displaced. Otherwise, 'Avesta-

Zend' might be recommended as the more proper title. 'Avesta' means 'text,' and Zend means 'comment.' 'Avesta u Zend,' or 'Text and Comment,' is the proper title, which is then contracted into 'Avesta-Zend.' . . . Subjected for the last fifty years to the searching analysis of first-rate orientalists — Burnouf, Westergaard, Brockhaus, Spiegel, Haug, Windischmann, Hübschmann,— this work has been found to belong in its various parts to very different dates, and to admit of being so dissected as to reveal to us, not only what are the tenets of the modern Parsees, but what was the earliest form of that religion whereof theirs is the remote and degenerate descendant. Signs of a great antiquity are found to attach to the language of certain rhythmical compositions called Gâthâs or hymns; and the religious ideas contained in these are found to be at once harmonious, and also of a simpler and more primitive character than those contained in the rest of the volume. From the Gâthâs chiefly, but also to some extent from other, apparently very ancient, portions of the Zendavesta, the characteristics of the early Iranian religion have been drawn out by various scholars, particularly by Dr. Martin Haug. . . . The most striking feature of the religion, and that which is generally allowed to be its leading characteristic, is the assertion of Dualism. By Dualism we mean the belief in two original uncreated principles, a principle of good and a principle of evil. . . . Both principles were real persons, possessed of will, intelligence, power, consciousness, and other personal qualities. To the one they gave the name of Ahura-Mazda, to the other that of Angro-Mainyus. . . . The names themselves sufficiently indicated to those who first used them the nature of the two beings. Ahura-Mazda was the 'all-bountiful, all-wise, living being' or 'spirit,' who stood at the head of all that was good and lovely, beautiful and delightful. Angro-Mainyus was the 'dark and gloomy intelligence' that had from the first been Ahura-Mazda's enemy, and was bent on thwarting and vexing him. And with these fundamental notions agreed all that the sacred books taught concerning either being. . . . The two great beings who thus divided between them the empire of the universe were neither of them content to be solitary. Each had called into existence a number of inferior spirits, who acknowledged their sovereignty, fought on their side, and sought to execute their behests. At the head of the good spirits subject to Ahura-Mazda stood a band of six dignified with the title of Amesha-Spentas, or 'Immortal Holy Ones.' . . . In direct antithesis to these stood the band, likewise one of six, which formed the council and chief support of Angro-Mainyus. . . . Besides these leading spirits there was marshalled on either side an innumerable host of lesser and subordinate ones, called respectively 'ahuras' and 'devas,' who constituted the armies or attendants of the two great powers, and were employed by them to work out their purposes. The leader of the angelic hosts, or 'ahuras' was a glorious being, called Sraosha or Serosh — 'the good, tall, fair Serosh,' who stood in the Zoroastrian system where Michael the Archangel stands in the Christian. . . . Neither Ahura-Mazda nor the Amesha-Spentas were represented by the early Iranians under any material forms. The Zoroastrian system was markedly anti-idolatrous: and the utmost that was allowed the worshipper was an emblematic representation of the Supreme Being by means of a winged circle, with which was occasionally combined an incomplete human figure, robed and wearing a tiara. . . . The position of man in the cosmic scheme was determined by the fact that he was among the creations of Ahura-Mazda. Formed and placed on earth by the Good Being, he was bound to render him implicit obedience, and to oppose to the utmost Angro-Mainyus and his creatures. His duties might be summed up under the four heads of piety, purity, industry, and veracity. Piety was to be shown by an acknowledgment of Ahura-Mazda as the One True God, by a reverential regard for the Amesha-Spentas and the Izeds, or lower angels, by the frequent offering of prayers, praises, and thanksgivings, the recitation of hymns, the occasional sacrifice of animals, and the performance from time to time of a curious ceremony known as that of the Haoma or Homa [see SOMA.— HAOMA]. . . . The purity required of the Iranians was inward as well as outward. . . . The duty of veracity was inculcated perhaps more strenuously than any other. . . . If it be asked what opinions were entertained by the Zoroastrians concerning man's ultimate destiny, the answer would seem to be, that they were devout and earnest believers in the immortality of the soul, and a conscious future existence. . . . The religion of the early Iranians became corrupted after a time by an admixture of foreign superstitions. The followers of Zoroaster, as they spread themselves from their original seat upon the Oxus over the regions lying south and south-west of the Caspian Sea, were brought into contact with a form of faith considerably different from that to which they had previously been attached, yet well adapted for blending with it. This was Magism, or the worship of the elements [see MAGIANS]. The early inhabitants of Armenia, Cappadocia, and the Zagros mountain-range, had, under circumstances that are unknown to us, developed this form of religion, and had associated with its tenets a priest-caste. . . . The four elements, fire, air, earth, and water, were recognised as the only proper objects of human reverence. . . . When the Zoroastrians came into contact with Magism, it impressed them favourably. . . . The result was that, without giving up any part of their previous creed, the Iranians adopted and added on to it all the principal points of the Magian belief, and all the more remarkable of the Magian religious usages. This religious fusion seems first to have taken place in Media. The Magi became a Median tribe, and were adopted as the priest-caste of the Median nation." This "produced an amalgam that has shown a surprising vitality, having lasted above 2,000 years — from the time of Xerxes, the son of Darius Hystaspis (B. C. 485–465) to the present day."—G. Rawlinson, *Religions of the Ancient World, ch.* 3.—"As the doctrines of Zoroaster bear in several points such a striking resemblance to those of Christianity, it is a question of grave importance to ascertain the age in which he lived. . . . Since there can be no doubt that . . . we must assign to Zarathustra Spitama a date prior to the Median conquest of Babylon by a Zoroastrian priest king, the only question remaining to be solved

is, whether he lived only a short time, or long, before that event. I am inclined to believe that he lived only about 100 or 200 years before that time, and that the conquest of Babylon was one of the last consequences of the great religious enthusiasm kindled by him. He preached, like Moses, war and destruction to all idolaters and wicked men. . . . According to this investigation we cannot assign to Zarathustra Spitama a later date than about 2300 B. C. Thus he lived not only before Moses, but even, perhaps, before Abraham. . . . He was the first prophet of truth who appeared in the world, and kindled a fire which thousands of years could not entirely extinguish."—M. Haug, *Lect. on an Original Speech of Zoroaster* (*Yasna* 45), *pp.* 17, 26.—The same, *Essays on the Sacred Language, Writings and Religion of the Parsees.*—"Prof. Darmesteter has published a new translation [of the Zend Avesta] with a most ably written introduction, in which he maintains the thesis that not a line of our Avesta text is older than the time of Alexander's conquest, while the greater part belongs to a much later date. We may briefly remind our readers that, according to the traditional view, the old Zoroastrian books, which belong to the times of the Achæmenidæ, were destroyed at the Macedonian conquest, but that portions were preserved by the people, who retained the old faith, during the long period of the Arsacidan rule, though the Court favoured Greek civilization. . . . According to this view, we still possess the genuine remains of the old pre-Alexandrine literature, mutilated and corrupted during the period of Arsacidan indifference, but yet, so far as they go, a faithful representative of the sacred text of the Achæmenian time. . . . Prof. Darmesteter, on the contrary, maintains that all our texts are post-Alexandrine in form and in substance. Some may belong to the 1st century B. C. or A. D., and some, as the legislative parts of the Vendidad, may be founded on older texts now lost; but a large portion was composed by the priests of Ardashir's Court in the 3d century. The Gâthâs, which till now have been generally considered as the ancient nucleus of the whole system and ascribed to Zoroaster himself, are, in the Professor's opinion, certainly modern, and are relegated to the 1st century of our era."—*The Athenæum, June* 30, 1894.

ZOUAVES, The.—During the wars of the French in Algeria, there arose a body of soldiers "who, both in the campaign in Algeria and in the contest in the Crimea, have acquired the very highest renown. The name of the Zouaves will never be forgotten as long as the story of the siege of Sebastopol endures. . . . They were originally intended to be regiments composed of Frenchmen who had settled in Algeria, or their descendants; but the intermixture of foreigners in their ranks ere long became so considerable, that when they were transported to the shores of the Crimea, though the majority were French, they were rather an aggregate of the 'Daredevils' of all nations. In their ranks at Sebastopol were some that held Oxford degrees, many those of Göttingen and Paris, crowds who had been ruined at the gaming-table, not a few who had fled from justice, or sought escape from the consequences of an amorous adventure. Yet had this motley crowd, composed of the most daring and reckless of all nations, become, in the rude school of the wars in Algeria, an incomparable body of soldiers, second to none in the world in every military duty, perhaps superior to any in the vehemence and rush of an assault."—Sir A. Alison, *Hist. of Europe*, 1815–1852, *ch.* 45.

APPENDICES.

APPENDIX A.

NOTES TO ETHNOGRAPHICAL MAP, PLACED AT THE BEGINNING OF VOLUME I.

TO THE eye of modern scholarship "language" forms the basis of every ethnic distinction. Physical and exterior features like the stature, the color of the skin, the diversity of habits and customs, the distinctions which once formed in great part the basis of ethnic research have all in our own day been relegated to a subordinate place.

The "language" test is of course subject to very serious limitations. The intermingling of different peoples, more general to be sure in our own day than in past ages, has nevertheless been sufficiently great in every age to make the tracing of linguistic forms a task of great difficulty. In special cases where both the civilization and language of one people have become lost in that of another the test must of course fail utterly.

With all these restrictions however the adoption of the linguistic method by modern criticism has been practically universal. Its defence, if it requires any, is apparent. It is the only method of ethnic study the deductions of which, where successful at all, approach anything like certainty. The points wherein linguistic criticism has failed have been freely admitted; on the other hand the facts which it has established are unassailable by any other school of criticism.

Taking language then as the only tangible working basis the subject resolves itself from the start into a two-fold division: the debatable and the certain. It is the purpose to indicate in the course of these notes, what is merely conjecture and what may be safely accepted as fact.

The ethnology of Europe, studied on this basis, has for its central feature the *Indo-Germanic* (*Indo-European*) or *Aryan* race. The distinction between the races clearly Aryan and those doubtful or non-Aryan forms the primary division of the subject. As the map is intended to deal only with the Europe of the present, a historical distinction must be made at the outset between the doubtful or non-Aryan peoples who preceded the Aryans and the non-Aryan peoples who have appeared in Europe in comparatively recent times.

The simple formula, *pre-Aryan, Aryan, non-Aryan*, affords the key to the historical development of European ethnology.

PRE-ARYAN PEOPLES.

Of the presumably pre-Aryan peoples of western Europe the *Iberians* occupy easily the first place.

The seat of this people at the dawn of history was in Spain and southern France; their ethnology belongs entirely to the realm of conjecture. They are of much darker complexion than the Aryans and their racial characteristic is conservatism even to stubbornness, which places them in marked contrast to their immediate Aryan neighbors, the volatile Celts. Among the speculations concerning the origin of the Iberians a plausible one is that of Dr. Bodichon, who assigns to them an African origin making them, indeed, cognate with the modern Berbers (see R. H. Patterson's "Ethnology of Europe" in "Lectures on History and Art"). This generalization is made to include also the *Bretons* of the north west. It is clear however that the population of modern Brittany is purely Celtic: made up largely from the immigrations from the British Isles during the fifth century.

To the stubbornness with which the Iberians resisted every foreign aggression and refused intermingling with surrounding races is due the survival to the present day of their descendants, the *Basques*.

The mountain ranges of northern Spain, the Cantabrians and Eastern Pyrenees have formed the very donjon-keep of this people in every age. Here the *Cantabri* successfully resisted the Roman arms for more than a century after the subjugation of the remainder of Spain, the final conquest not occurring until the last years of Augustus. While the *Iberian* race as a whole has become lost in the greater mass of Celtic and Latin intruders, it has remained almost pure in this quarter. The present seat of the *Basques* is in the Spanish provinces of Viscaya, Alava, Guipuzcoa, and Navarre and in the French department of Basses Pyrénées. The *Ivernians* of Ireland, now lost in the Celtic population, and the *Ligurians* along the shores of the Genoese gulf, later absorbed by the Romans, both belong likewise to this pre-Aryan class. (Modern research concerning these pre-Aryan peoples has in large part taken its inspiration from the "Untersuchungen" of Humboldt, whose view concerning the connection between the Basques and Iberians is substantially the one stated.)

Another early non-Aryan race now extinct were the *Etruscans* of Italy. Their origin was manifestly different from that of the pre-Aryan peoples just mentioned. By many they have been regarded as a branch of the great Ural-Altaic family. This again is conjecture.

ARYAN PEOPLES.

In beginning the survey of the *Aryan* peoples it is necessary to mention the principal divisions of the race. As generally enumerated there are seven of these, viz., the *Sanskrit* (Hindoo), *Zend* (Persian), *Greek*, *Latin*, *Celtic*, *Germanic* and *Slavic*. To these may be added two others not definitely classified, the *Albanian* and the *Lithuanian*. These bear the closest affinity respectively to the *Latin* and the *Slavic*.

Speculation concerning the origin of the Aryans need not concern us. It belongs as yet entirely to the arena of controversy. The vital question which divides the opposing schools is concerning their European or Asiatic origin. Of the numerous writers on this subject the two who perhaps afford the reader of English the best view of the opposing opinions are, on the Asiatic side, Dr. Max Müller (Lectures on the Science of Language); on the other, Prof. A. H. Sayce (Introduction to the Science of Language).

APPENDIX A.

Of the divisions of the Aryan race above enumerated the first two do not appear in European ethnology. Of the other branches, the *Latin, Germanic* and *Slavic* form by great odds the bulk of the European population.

THE LATIN BRANCH.

The *Latin* countries are France, Spain, Portugal, Italy and the territory north of the Danube, between the Dniester and the Theiss. In the strictest ethnic sense however the term Latin can be applied only to Italy and then only to the central part. As Italy first appears in history it is inhabited by a number of different races: the *Iapygians* and *Oenotrians* of the south who were thrown in direct contact with the Greek settlers; the *Umbrians, Sabines, Latins, Volscians* and *Oscans* in the centre; the *Etruscans* on the west shore north of the Tiber; while in the north we find the *Gauls* in the valley of the Po, with the *Ligurians* and *Venetians* respectively on the west and east coasts. Of this motley collection the central group bore a close affinity to the Latin, yet all alike received the Latin stamp with the growing power of Rome.

The ethnic complexion of Italy thus formed was hardly modified by the great Germanic invasions which followed with the fall of the West-Roman Empire.

This observation applies with more or less truth to all the Latin countries, the Germanic conquerors becoming everywhere merged and finally lost in the greater mass of the conquered. Only in Lombardy where a more enduring Germanic kingdom existed for over two centuries (568–774), has the Germanic made any impression, and this indeed a slight one, on the distinctly Latin character of the Italian peninsula.

In Spain an interval between the Iberian period and the Roman conquest appears to have existed, during which the population is best described as *Celt-Iberian.* Upon this population the Latin stamp was placed by the long and toilsome, but for that reason more thorough, Roman conquest. The ethnic character of Spain thus formed has passed without material change through the ordeal both of Germanic and Saracenic conquest. The *Gothic* kingdom of Spain (418–714) and the *Suevic* kingdom of northern Portugal (406–584) have left behind them scarcely a trace. The effects of the great Mohammedan invasion cannot be dismissed so lightly.

Conquered entirely by the Arabs and Moors in 714, the entire country was not freed from the invader for nearly eight centuries. In the south (Granada) where the Moors clung longest their influence has been greatest. Here their impress on the pure Aryan stock has never been effaced.

The opening phrase of Caesar's Gallic war, "all Gaul is divided into three parts," states a fact as truly ethnic as it is geographical or historical. In the south (Aquitania) we find the *Celtic* blending with the *Iberian;* in the northeast the *Cimbrian Belgae*, the last comers of the Celtic family, are strongly marked by the characteristics of the Germans; while in the vast central territory the people "calling themselves Galli" are of pure Celtic race. This brief statement of Caesar, allowing for the subsequent influx of the German, is no mean description of the ethnic divisions of France as they exist at the present day, and is an evidence of the remarkable continuity of ethnological as opposed to mere political conditions.

The four and a half centuries of Roman rule placed the Latin stamp on the Gallic nation, a preparation for the most determined siege of Germanic race influence which any Latin nation was fated to undergo.

In Italy and Spain the exotic kingdoms were quickly overthrown; the *Frankish* kingdom in northern Gaul was in strictness never overthrown at all.

In addition we soon have in the extreme north a second Germanic element in the Scandinavian *Norman.* Over all these outside elements, however, the Latin influence eventually triumphed. While the *Franks* have imposed their name upon the natives, the latter have imposed their language and civilization on the invaders.

The result of this clashing of influences is seen, however, in the present linguistic division of the old Gallic lands. The line running east and west through the centre of France marks the division between the *French* and the *Provençal* dialects, the *langued'oil* and the *langued'oc.* It is south of this line in the country of the *langued'oc* that the Latin or Romance influence reigns most absolute in the native speech.

In the northeast, on the other hand, in the *Walloon* provinces of Belgium, we have, as with the Belgae of classic times, the near approach of the Gallic to the Germanic stems.

Our survey of the Latin peoples must close with a short notice of its outlying members in the Balkan and Danubian lands. The *Albanians* (*Skipetars*) and the *Roumans* (*Vlachs* or *Wallachs*) represent as nearly as ethnology can determine the ancient populations respectively of Illyricum and Thrace. The ethnology of the Albanians is entirely uncertain. Their present location, considerably to the south of their supposed pristine seat in Illyricum, indicates some southern migration of the race. This migration occurred at an entirely unknown time, though it is generally believed to have been contemporary with the great southward movement of the Slavic races in the seventh century.

The *Albanian* migrations of the time penetrated Attica, Aetolia and the entire Peloponnesus; with the *Slavs* and *Vlachs* they formed indeed a great part of the population of Greece during the Middle Ages. While the Slavic stems have since been merged in the native Greek population, and the *Vlachs* have almost entirely disappeared from these southern lands, the Albanians in Greece have shown a greater tenacity. Their part in later Greek history has been a prominent one and they form to-day a great part of the population of Attica and Argolis.

The *Roumans* or *Vlachs*, the supposed native population of Thrace, are more closely identified than the Albanians with the other Latin peoples. They occupy at present the vast country north of the Danube, their boundary extending on the east to the Dniester, on the west almost to the Theiss.

Historically these people form a perplexing yet interesting study. The theory once general that they represented a continuous Latin civilization north of the Danube, connecting the classic Dacia by an unbroken chain to the present, has now been generally abandoned. (See Roesler's "Romänische Studien" or Freeman's "Hist. Geog. of Europe," p. 435.)

APPENDIX A.

The present geographical location of the Vlach peoples is probably the result of a migration from the Thracian lands south of the Danube, which occurred for unexplained causes in the twelfth and thirteenth centuries. The kernel of the race at the present day is the separate state of Roumania; in the East and West they come under the respective rules of Russia and Hungary.

In mediaeval times the part played by them south of the Balkans was an important one, and to this day they still linger in considerable numbers on either side of the range of Pindus. (For a short dissertation on the Vlach peoples, see Finlay, "Hist. of Greece," vol. 3, pp. 224–230.)

THE GERMANIC BRANCH.

The *Germanic* nations of modern Europe are *England, Germany, Holland, Denmark, Norway* and *Sweden.* The Germanic races also form the major part of the population of Switzerland, the Cis-Leithan division of the Austrian Empire, and appear in isolated settlements throughout Hungary and Russia.

Of the earlier Germanic nations who overthrew the Roman Empire of the West scarcely a trace remains.

The population of the British Isles at the dawn of history furnishes a close parallel to that of Gaul. The pre-Aryan *Ivernians* (the possible *Iberians* of the British Isles) had been forced back into the recesses of Scotland and Ireland; next to them came the *Celts*, like those of Gaul, in two divisions, the *Goidels* or *Gaels* and the *Britons.*

In Britain, contrary to the usual rule, the Roman domination did not give the perpetual Latin stamp to the island; it is in fact the only country save the Pannonian and Rhaetian lands south of the upper Danube, once a Roman possession, where the Germanic element has since gained a complete mastery. The invasion of the Germanic races, the *Angles, Saxons* and *Jutes*, from the sixth to the eighth centuries, were practically wars of extermination. The Celtic race is to-day represented on the British Isles only in *Wales* and the western portions of *Scotland* and *Ireland.* The invasions of the *Danes*, and later the *Norman* conquest, bringing with them only slight infusions of kindred Germanic nations, have produced in England no marked modification of the *Saxon* stock.

The *German* Empire, with the smaller adjoining realms, Holland and Switzerland and the Austrian provinces of Austria, Styria, Carinthia, Salzburg and Tyrol, contain the great mass of the Germanic peoples of the continent.

During the confusion following the overthrow of the West-Roman Empire the *Germanic* peoples were grouped much further westward than they are at present; the eastward reaction involving the dispossession of the *Slavic* peoples on the Elbe and Oder, has been going on ever since the days of Charlemagne. Germany like France possesses a linguistic division, *Low German* (*Nieder-Deutsche*) being generally spoken in the lands north of the cross line, *High German* (*Hoch-Deutsche*) from which the written language is derived, to the south of it. Holland uses the *Flemish*, a form of the Nieder-Deutsche; Belgium is about equally divided between the *Flemish* and the *Walloon.*

Switzerland, though predominantly German, is encroached upon by the French in the western cantons, while in the southeast is used the Italian and a form allied to the same, the Romance speech of the Rhaetian (Tyrolese) Alps. This form also prevails in Friuli and some mountainous parts of northern Italy.

The present population of the German Empire is almost exclusively Germanic, the exceptions being the Slavic *Poles* of Posen, Pomerellen, southeastern Prussia and eastern Silesia, the remnant of the *Wends* of Lusatia and the French element in the recently acquired Imperial lands of Alsace and Lorraine. Beyond the Empire we find a German population in the Austrian territories already noted, in the border lands of Bohemia, and in isolated settlements further east. The great settlement in the Siebenbürgen was made by German emigrants in the eleventh century and similar settlements dot the map both of Hungary and Russia. On the Volga indeed exists the greatest of them all.

Denmark, Norway and Sweden are peopled by the *Scandinavian* branch of the Germanic race. Only in the extreme north do we find another and non-Aryan race, the *Lapps.* On the other hand a remnant of the *Swedes* still retain a precarious hold on the coast line of their former possession, the Russian Finland.

THE SLAVIC BRANCH.

The *Slavs*, though the last of the Aryan nations to appear in history, form numerically by far the greatest branch of the Indo-European family. Their present number in Europe is computed at nearly one hundred million souls.

At the time of the great migrations they extended over nearly all modern Germany; their slow dispossession by the Germanic peoples, beginning in the eighth century, has already been noticed. In the course of this dispossession the most westerly Slavic group, the *Polabic*, between the Elbe and the Oder, were merged in the German, and, barring the remnant of *Wends* in Lusatia (the *Sorabi* or *Northern Serbs*), have disappeared entirely from ethnic geography.

The great *Slavic* nation of the present day is Russia, but the great number of Slavic peoples who are not Russian and the considerable Russian population which is not Slavic renders impossible the study of this race on strictly national lines.

The Slavic peoples are separated, partly by geographical conditions, into three great divisions: the *Eastern*, the *Western* and the *Southern.* The greatest of these divisions, the Eastern, lies entirely within the boundaries of the Russian Empire. The sub-divisions of the Eastern group are as follows: The *Great Russians* occupying the vast inland territory and numbering alone between forty and fifty millions, the *Little Russians* inhabiting the entire south of Russia from Poland to the Caspian, and the *White Russians*, the least numerous of this division, in Smolensk, Wilna, and Minsk, the west provinces bordering on the Lithuanians and Poles.

The *West Slavic* group, omitting names of peoples now extinct, are the *Poles, Slovaks, Czechs* and the remnants of the Lusatian *Wends.* The *Poles*, excepting those already mentioned as within the German empire, and the Austrian *Poles* of Cracow, are all under the domination of Russia. Under the sovereignty of Austria are the *Slovaks, Moravians* and *Czechs* of Bohemia, the latter the most westerly as well as historically the

oldest of the surviving Slavic peoples, having appeared in their present seats in the last years of the fifth century.

In connection with this West Slavic group we should also refer to the *Lithuanians* whose history, despite the racial difference, is so closely allied with that of Poland. Their present location in the Russian provinces of Kowno, Kurland and Livland has been practically the same since the dawn of history.

The *South Slavic* peoples were isolated from their northern kinsmen by the great *Finno-Tatar* invasions.

The invasion of Europe by the Avars in the sixth century clove like a wedge the two great divisions of the Slavic race, the southernmost being forced upon the confines of the East-Roman Empire. Though less imposing as conquests than the Germanic invasions of the Western Empire, the racial importance of these Slavic movements is far greater since they constitute, in connection with the *Finno-Tatar* invasions which caused them, the most important and clearly defined series of ethnic changes which Europe has experienced during the Christian Era. During the sixth and seventh centuries these Slavic emigrants spread over almost the entire Balkan peninsula, including Epirus and the Peloponnesus. In Greece they afterwards disappeared as a separate people, but in the region between the Danube, the Save and the Balkans they immediately developed separate states (Servia in 641, Bulgaria in 678). As they exist at present they may be classed in three divisions. The *Bulgarians*, so called from the *Finno-Tatar* people whom they absorbed while accepting their name, occupy the district included in the separate state of Bulgaria and Eastern Roumelia, with a considerable territory to the south of it in Macedonia and Thrace. It was this last named territory or one very nearly corresponding to it that was actually ceded to Bulgaria by the peace of San Stefano, though she unfortunately lost it by the subsequent compromise effected at the Congress of Berlin. The second division includes the *Servians, Montenegrans, Bosnians* and *Croatians*, the last two under Austrian control; the third and smallest are the *Slovenes* of Carniola, likewise under Austrian sovereignty. (Schafarik's "Slawische Alterthümer" is the greatest single authority on the early history and also comparative ethnology of the *Slavs*.)

The territory occupied by the *Greek* speaking people is clearly shown on the accompanying map. As in all history, it is the coast lands where they seem to have formed the strongest hold. In free Greece itself and in the Turkish territories immediately adjoining, the *Greek* population overwhelmingly preponderates.

Nevertheless there is still a considerable Albanian element in Attica and Argolis, a *Vlach* element in Epirus while the *Turk* himself still lingers in certain quarters of Thessaly. All these are remnants left over from the successive migrations of the Middle Ages. The *Slavs*, who also figured most prominently in these migrations, have disappeared in Greece as a distinct race. The question as to the degree of Slavic admixture among the modern Greeks is however another fruitful source of ethnic controversy. The general features of the question are most compactly stated in Finlay, vol. 4, pp. 1–37.

APPENDIX A.

NON-ARYAN PEOPLES.

The *Non-Aryan* peoples on the soil of modern Europe, excepting the *Jews* and also probably excepting those already placed in the unsolved class of pre-Aryan, all belong to the *Finno-Tatar* or *Ural-Altaic* family, and all, possibly excepting the *Finns*, date their arrival in Europe from comparatively recent and historic times. The four principal divisions of this race, the *Ugric, Finnic, Turkic* and *Mongolic*, all have their European representatives.

Of the first the only representatives are the *Hungarians* (*Magyars*). The rift between the North and South Slavic peoples opened by the *Huns* in the fifth century, reopened and enlarged by the *Avars* in the sixth, was finally occupied by their kinsmen the *Magyars* in the ninth. The receding of this wave of Asiatic invasion left the *Magyars* in utter isolation among their Aryan neighbors. It follows as a natural consequence that they have been the only one of the *Ural-Altaic* peoples to accept the religion and civilization of the West. Since the conversion of their king St. Stephen in the year 1000, their geographical position has not altered. Roughly speaking, it comprises the western half of Hungary, with an outlying branch in the Carpathians.

More closely allied to the *Magyars* than to their more immediate neighbors of the same race are the *Finnic* stems of the extreme north. Stretching originally over nearly the whole northern half of Scandinavia and Russia they have been gradually displaced, in the one case by their Germanic, in the other by their Slavic neighbors. Their present representatives are the *Ehsts* and *Tschudes* of Ehstland, the *Finns* and *Karelians* of Finland, the *Tscheremissians* of the upper Volga, the *Siryenians* in the basin of the Petchora and the *Lapps* in northern Scandinavia and along the shores of the Arctic ocean.

East of the *Lapps*, also bordering the Arctic ocean, lie the *Samojedes*, a people forming a distinct branch of the Ural-Altaic family though most closely allied to the Finnic peoples.

The great division of the Ural-Altaic family known indifferently as *Tatar* (*Tartar*) or *Turk*, has, like the Aryan Slavs, through the accidents of historical geography rather than race divergence been separated into two great divisions: the northern or Russian division commonly comprised under the specific name of *Tartar;* and the southern, the *Turk*.

These are the latest additions to the European family of races. The *Mongol-Tartar* invasion of Russia occurred as late as the thirteenth century, while the *Turks* did not gain their first foothold in Europe through the gates of Gallipoli until 1353. The bulk of the Turks of the present day are congregated in Asia-Minor.

Barring the *Armenians*, the *Georgians* of the northeast, the *Greeks* of the seacoast and the scattered *Circassians*, the whole peninsula is substantially Turkish.

In Europe proper the Turks as a distinct people never cut a great figure. Even in the grandest days of Osmanli conquest they were always outnumbered by the conquered nations whose land they occupied, and with the decline of their power this numerical inferiority has become more and more marked. At the present day there are very few portions of the Balkan peninsula where the Turkish population actually pre-

APPENDIX A.

dominates; their general distribution is clearly shown on the map.

The *Tartars* or *Russian Turks* represent the siftings of the Asiatic invasions of the thirteenth century.

Their number has been steadily dwindling until they now count scarcely three millions, a mere handful in the mass of their former Slavic subjects.

The survivors are scattered in irregular and isolated groups over the south and east. Prominent among them are the *Crim Tartars*, the kindred *Nogais* of the west shores of the Caspian, the *Kirghis* of the north shore and Ural valley, and the *Bashkirs* between the upper Ural and the Volga, with an isolated branch of *Tartars* in the valley of the Araxes south of the Caucasus.

The great Asiatic irruption of the thirteenth century has been commonly known as the Mongol invasion. Such it was in leadership, though the residuum which it has left behind in European Russia proves that the rank and file were mostly Tartars. One Mongol people however, the *Kalmucks*, did make their way into Europe and still exist in the steppes between the lower Don and the lower Volga.

The ethnology of the Caucasian peoples is the most difficult part of the entire subject. On the steppes of the Black and Caspian seas up to the very limit of the Caucasus we have two races between whom the ethnic distinction is clearly defined, the Mongol-Tartar and the Slav. Entering the Caucasus however we find a vast number of races differing alike from these and from each other.

To enumerate all the different divisions of these races, whose ethnology is so very uncertain, would be useless. Grouped in three general divisions however they are as follows: the so-called *Circassians* who formerly occupied the whole western Caucasus with the adjoining Black sea coast but who, since the Russian conquest of 1864, have for the most part emigrated to different quarters of the Turkish Empire; the *Lesghians*, under which general name are included the motley crowd of peoples inhabiting the eastern Caucasus; and the *Georgians*, the supposed descendants of the ancient *Iberians* of the Caucasus, who inhabit the southern slope, including all the Tiflis province and the Trapezuntine lands on the southeast coast of the Black sea.

The *Tartars* are hardly found in the Caucasus though they reappear immediately south of it in the lower basin of the Kura and the Araxes. Here also appear the various *Iranian* stems of the Asiatic Aryans, the *Armenians*, the *Persians* and the *Kurds*.

R. H. Latham's works on "European Ethnology" are the best general authority in English. Of more recent German guides, map and otherwise, the following are noteworthy: Bastain's "Ethnologisches Bilderbuch," "Das Beständige in den Menschenrassen," "Allgemeine Grundzüge der Ethnologie," Kiepert's "Ethnographische Uebersichtskarte des Europäischen Orients," Menke's "Europa nach seinen Ethnologischen Verhältnissen in der Mitte des 19. Jahrhundert," Rittich's "Ethnographie des europäischen Russland," Sax's "Ethnographische Karte der europäischen Turkei," Berghaus's "Ethnographische Karte vom österreichischen Kaiserstaat," Wendt's "Bilder Atlas der Länder und Völkerkunde," Andree's "Allgemeiner Handatlas (Ethnographischen Karten)," Gerland's "Atlas der Ethnographie."—A. C. Reiley.

APPENDIX B.

Notes to Four Maps of the Balkan Peninsula. (Twelfth to the Fifteenth Century.)

THERE exists to-day upon the map of Europe no section whose historical geography has a greater present interest than the Danubian, Balkan and Levantine states. It is these and the Austro-Hungarian lands immediately adjoining which have formed one of the great fulcrums for those national movements which constitute the prime feature of the historical geography of the present age.

Upon the present map of Europe in this quarter we discover a number of separate and diminutive national entities, the *Roumanian, Bulgarian, Servian* and *Montenegrin*, the *Greek* and *Albanian*, all struggling desperately to establish themselves on the debris of the crumbling Turkish Empire.

What the issue will be of these numerous and mutually conflicting struggles for separate national existence it is out of our province to forecast.

It is only intended in this map series to throw all possible light on their true character from the lessons and analogies of the past. At first sight the period treated in the four Levantine maps (from the last of the twelfth to the middle of the fifteenth century) must appear the most intricate and the most obscure in the entire history of this region. The most intricate it certainly is, and possibly the most obscure, though the obscurity arises largely from neglect. Its importance, however, arises from the fact that it is the only past period of Levantine history which presents a clear analogy to the present, not alone in its purely transitionary character, but also from the several national movements which during this time were diligently at work.

During the Roman and the earlier Byzantine periods, which from their continuity may be taken as one, any special tendency was of course stifled under the preponderant rule of a single great empire.

The same was equally true at a later time, when all of these regions passed under the rule of the *Turk*. These four maps treat of that most interesting period intervening between the crumbling of the Byzantine power and the Turkish conquest. That in our own day the crumbling in turn of the Turkish power has repeated, in its general features, the same historical situation, is the point upon which the interest must inevitably centre.

What the outcome will be in modern times forms the most interesting of political studies. Whether the native races of the Danube, the Balkans and the southern peninsula are to work out their full national development, either federately or independently, or whether they are destined to pass again, as is threatened, under the domination of another and greater empire, is one of the most important of the questions which agitates the mind of the modern European statesman. That the latter outcome is now the less likely is due to the great unfolding of separate national spirit which marks so strongly the age in which we live. The reason why the previous age treated in this map series ended in nothing better than foreign and Mohammedan conquest may perhaps be sought in the imperfect development of this same national spirit.

THE BYZANTINE EMPIRE.

The first map (Asia Minor and the Balkans near the close of the twelfth century) is intended to show the geographical situation as it existed immediately prior to the dismemberment of the Byzantine Empire. The Byzantine Empire of this period is in itself an important study. It must be regarded more as the offspring than the direct continuation of the great East-Roman Empire of Arcadius and Justinian; for with the centuries which had intervened the great changes in polity, internal geography, external neighbors and lastly the continual geographical contraction, present us with an entirely new series of relations. It is this geographical contraction which concerns us most vitally, for with it the frontiers of the empire conform more and more closely to the ethnic limits of the *Greek* nation.

The later Byzantine Empire was, therefore, essentially a Greek Empire, and as such it appeals most vividly to the national consciousness of the Greek of our own time. The restoration of this empire, with the little kingdom of free Greece as the nucleus, is the vision which inspires the more aggressive and venturesome school of modern Greek politicians.

In the twelfth century the bulk of Asia Minor had been wrested from the Byzantine Empire by the *Turks*, but it was the Crusaders, not the *Turks*, who overthrew the first empire. In one view this fact is fortunate, otherwise there would have been no transition period whose study would be productive of such fruitful results.

Owing to the artful policy of the Comnenian emperors, the Byzantine Empire actually profited by the early crusades and was enabled through them to recover a considerable part of Asia Minor from the *Turks*. This apparent success, however, was only the prelude to final disaster.

Isolated from western Christendom by the schism, the *Greeks* were an object of suspicion and hatred to the Latin Crusaders and it only required a slight abatement of the original crusading spirit for their warlike ardor to be diverted from Jerusalem to Constantinople. Cyprus was torn away from the Greek Empire and created a separate kingdom under Latin rule, in 1191. Finally, the so-called Fourth Crusade, controlled by Venetian intrigue, ended in the complete dismemberment of the Byzantine Empire (1204).

This nefarious enterprise forms a dark spot in history: it also ushers in the greatest period of geographical intricacy in Levantine annals. The

geography which immediately resulted from it is not directly shown in this Levantine map series, but can be seen on the general map of Europe at the opening of the thirteenth century. Briefly stated, it represented the establishment of a fragmentary and disjointed Latin Empire in the place of the former Greek Empire of Constantinople. Known as the Latin Empire of Romania, this new creation included the Empire of Constantinople proper and its feudal dependencies, the kingdom of Thessalonica, the duchy of Athens, and the principality of Achaia.

Three orphan *Greek* states survived the fall of the parent power: in Europe, the despotat of Epirus, and in Asia, the empires of Nicæa and Trebizond.

The Latin states of the East are scarcely worthy the historian's notice. They have no place whatever in the natural development, either political or geographical, of the Levantine states. They were not only forced by foreign lances upon an unwilling population, but were clumsy feudalisms, established among a people to whom the feudal idea was unintelligible and barbarous. Like their prototypes, the Crusading states of Syria, they resembled artificial encroachments upon the sea, standing for a time, but with the ordinary course of nature the ocean reclaims its own.

Even the weak little *Greek* states were strong in comparison and immediately began to recover ground at their expense. The kingdom of Thessalonica was overthrown by the despot of Epirus in 1222; the Latin Empire of Constantinople itself fell before the Greek Emperor of Nicæa in 1261; while the last of the barons of the principality of Achaia submitted to the Byzantine despots of the Morea in 1430.

The duchy of Athens alone of all these *Latin* states survived long enough to fall at last before the *Turkish* conquest. The Levantine possessions won by Venice at this and later times were destined, partly from their insular or maritime location, and partly from the greater vitality of trade relations, to enjoy a somewhat longer life.

To the Nicæan emperors of the house of Paleologus belongs the achievement of having restored the Byzantine Empire in the event of 1261. The expression Restored Byzantine Empire has been employed, since it has the sanction of usage, though a complete restoration never occurred. The geography of the Restored Empire as shown on the second map (1265 A. D.) fails to include the greater part of what we may term the cradle of the Greek race. The only subsequent extension was over the balance of the Morea. In every other quarter the frontiers of the Restored Empire soon began to recede until it included only the city of Constantinople and an ever decreasing portion of Thrace. With the commencement of the fourteenth century the *Turks*, having thrown off the Mongol-Tartar dominion, began under the house of Osmanlis their final career of conquest. This, of course, was the beginning of the end. Their first foothold in Europe was gained in 1353, but over a century was destined to elapse before the completion of their sovereignty in all the lands south of the Danube. There remains, therefore, a considerable period during which whatever separate national tendencies existed had full opportunity to work.

APPENDIX B.

THE FIRST AND SECOND BULGARIAN KINGDOMS.

It was this age which saw not only the high est point in the national greatness of Bulgaria and Servia, but also witnessed the evolution of the Wallachian principalities in the lands north of the Danube.

The separate states of Bulgaria and Servia, born in the seventh century of the great southward migration of the *Slavic* peoples, had in after times risen or fallen according to the strength or weakness of the Byzantine Empire. Bulgaria had hitherto shown the greatest power. At several different periods, notably under Simeon (883–927), and again under Samuel (976–1014), it developed a strength which fairly overawed the Empire itself. These *Slavic* states had, however, been subjected by the Byzantine Empire in the first half of the eleventh century, and, though Servia enjoyed another period of independence (1040–1148), it was not until the final crumbling of the Byzantine Empire, the premonition of the event of 1204, that their expansion recommences.

The Wallachian, or Second Bulgarian kingdom, which came into existence in 1187 in the lands between the Balkans and the Danube, has been the subject of an ethnic discussion which need not detain us. That it was not purely *Slavic* is well established, for the great and singular revival of the *Vlach* or *Rouman* peoples and their movement from the lands south of Haemus to their present seats north of the Danube, which is one of the great features of this age, had already begun. (The country between the Danube and the Balkans, the seat of the Second Bulgarian kingdom, appears as Aspro or White-Wallachia in some Byzantine writings. So also north of the Danube the later Moldavia and Great Wallachia are known respectively as Mavro [Black] and Hungarowallachia. Still the fact of a continuous Rouman civilization north of the Danube is not established. The theory of a great northward movement of the *Vlach* peoples is the one now generally accepted and is ably advocated in Roesler's "Romänische Studien.")

At the present day this movement has been so long completed that scarcely the trace of a *Vlach* population remains in the lands south of the Danube. These emigrants appear, as it were, in passing, to have shared with the native Bulgarians in the creation of this Second Bulgarian kingdom. This realm achieved a momentary greatness under its rulers of the house of Asau. The dismemberment of the Byzantine Empire in 1204 enabled them to make great encroachments to the south, and it seemed for a time that to the Bulgarian, not the Greek, would fall the task of overthrowing the Latin Empire of Roumania (see general map of Europe at the opening of the thirteenth century). With the reëstablishment, however, of the Greek Empire of Constantinople, in 1261, the Bulgarian kingdom began to lose much of its importance, and its power was finally broken in 1285 by the Mongols.

SERVIA.

In the following century it was the turn of Servia to enjoy a period of preëminent greatness. The latter kingdom had recovered its independence under the house of Nemanja in 1183.

Under the great giant conqueror Stephen Dushan (1321–1355) it enjoyed a period of greater power than has ever before or since fallen to the

APPENDIX B.

lot of a single Balkan state. The Restored Byzantine Empire had sustained no permanent loss from the period of Bulgarian greatness: it was by the sudden Servian conquest that it was deprived forever of nearly all its European possessions (see Balkan map III). A Byzantine reaction might have come under other conditions, but already another and greater enemy was at her gates. Dushan died in 1355; and already, in 1353, two years before, the Turk at Gallipoli had made his entrance into Europe. From this time every Christian state of the East grew steadily weaker until Bulgaria, Servia, the Greek Empire, and finally even Hungary, had passed under the Turkish dominion.

THE VLACHS.

Passing on from these Slavic peoples, another national manifestation of the greatest importance belonging to this period, one which, unlike the Greek and Slavic, may be said in one sense to have originated in the period, was that of the *Vlachs*. This *Latin* population, which ethnologists have attempted to identify with the ancient *Thracians*, was, previous to the twelfth century, scattered in irregular groups throughout the entire Balkan peninsula. During the twelfth century their great northward migration began. A single result of this movement has already been noticed in the rise of the Second Bulgarian kingdom. South of the Danube, however, their influence was transitory. It was north of the river that the evolution of the two principalities, Great Wallachia (Roumania) and Moldavia, and the growth of a *Vlach* population in the Transylvanian lands of Eastern Hungary, has yielded the ethnic and in great part the political geography of the present day.

The process of this evolution may be understood from a comparative study of the four Balkan maps. Upon the first map the *Cumanians*, a Finno-Tatar people, who in the twelfth century had displaced a kindred race, the *Patzinaks* or *Petschenegs*, occupy the whole country between the Danube and the Transylvanian Alps. These were in turn swept forever from the map of Europe by the Mongols (1224). With the receding of this exterminating wave of Asiatic conquest the great wilderness was thrown open to new settlers. The settlements of the *Vlachs* north of the Danube and east of the Aluta became the principality of Great Wallachia, the nucleus of the modern Roumania. West of the Aluta the district of Little Wallachia was incorporated for a long period, as the banat of Severin, in the Hungarian kingdom.

Finally, the principality of Moldavia came into existence in 1341, in land previously won by the Hungarians from the Mongols, between the Dniester and the Carpathians. Both the principalities of Great Wallachia and Moldavia were in the fourteenth century dependencies of Hungary. The grasp of Hungary was loosened, however, towards the close of the century and after a period of shifting dependence, now on Hungary, now on Turkey, and for a time, in the case of Moldavia, on Poland, we come to the period of permanent Turkish supremacy.

With the presence and influence of the *Vlachs* south of the Balkans, during this period, we are less interested, since their subsequent disappearance has removed the subject from any direct connection with modern politics. The only quarter where they still linger and where this influence led to the founding of an independent state, was in the country east of the range of Pindus, the Great Wallachia of the Byzantines. Here the principality of Wallachian Thessaly appeared as an offshoot of the Greek despotat of Epirus in 1259 (see map II).

This state retained its independent existence until 1308, when it was divided between the Catalan dukes of Athens and the Byzantine Empire.

ALBANIANS.

The *Skipetars* (*Albanians*) during this period appear to have been the slowest to grasp out for a separate national existence. The southern section of Albania formed, after the fall of Constantinople, a part of the despotat of Epirus, and whatever independence existed in the northern section was lost in the revival, first of the Byzantine, then, in the ensuing century, of the Servian power. It was not until 1444 that a certain George Castriot, known to the Turks as Iskander-i-beg, or Scanderbeg, created a Christian principality in the mountain fastnesses of Albania.

This little realm stretched along the Adriatic from Butrinto almost to Antivari, embracing, further inland, Kroja and the basin of the Drin (see map IV).

It was not until after Scanderbeg's death that Ottoman control was confirmed over this spirited Albanian population.

THE TURKISH CONQUEST.

The reign of Mohammed II. (1451–1481) witnessed the final conquest of the entire country south of the Danube and the Save. The extent of the Turkish Empire at his accession is shown on map IV. The acquisitions of territory during his reign included in Asia Minor the old Greek Empire of Trebizond (1461) and the Turkish dynasty of Karaman; in Europe, Constantinople, whose fall brought the Byzantine Empire to a close in 1453, the duchy of Athens (1456), the despotats of Patras and Misithra (1460), Servia (1458), Bosnia (1463), Albania (1468), Epirus and Acarnania, the continental dominion of the Counts of Cephalonia (1479), and Herzegovina (1481). In the mountainous district immediately south of Herzegovina, the principality of Montenegro, situated in lands which had formed the southern part of the first Servian kingdom, alone preserved its independence, even at the height of the Turkish domination.

The chronicle of Turkish history thereafter records only conquest after conquest. The islands of the Ægean were many of them won during Mohammed's own reign, the acquisition of the remainder ensued shortly after. Venice was hunted step by step out of all her Levantine possessions save the Ionian Islands; the superiority over the *Crim Tartars*, Wallachia, Moldavia and Jedisan followed, finally, the defeat at Mohacs (1526), and the subsequent internal anarchy left nearly all Hungary at the mercy of the Ottoman conqueror.

The geographical homogeneity thus restored by the Turkish conquest was not again disturbed until the present century. The repetition of almost the same conditions in our own time, though with the process reversed, has been referred to in the sketch of Balkan geography of the present day. The extreme importance of the period just described, for the purposes of minute historical

APPENDIX B.

analogy, will be apparent at once wherever comparison is attempted.

The thirteenth, fourteenth, and fifteenth centuries were of course periods of far greater geographical intricacy, but the purpose has been rather to indicate the nature of this intricacy than to describe it in detail. The principal feature, namely, the national movements, wherever they have manifested themselves, have been more carefully dwelt upon. The object has been simply to show that the four separate national movements, the *Greek*, the *Slavic*, the *Rouman*, and the *Albanian*, which may be said to have created the present Levantine problem, were all present, and in the case of the two last may even be said to have had their inception, in the period just traversed.

In the present century the unfolding of national spirit has been so much greater and far-reaching that a different outcome may be looked for. It is sufficient for the present that the incipient existence of these same movements has been shown to have existed in a previous age.

The best general text authority in English for the geography of this period is George Finlay's "History of Greece," vols. III. and IV.; a more exhaustive guide in German is Hopf's "Geschichte Griechenlands." For the purely geographical works see the general bibliography of historical geography.—A. C. Reiley.

APPENDIX C.

NOTES TO THE MAP OF THE BALKAN PENINSULA. (PRESENT CENTURY.)

THE present century has been a remarkable one for the settlement of great political and geographical questions. These questions resolve themselves into two great classes, which indicate the political forces of the present age, —the first, represented in the growth of democratic thought, and the second arising from the awakening of national spirit. The first of these concerns historical geography only incidentally, but the second has already done much to reconstruct the political geography of our time.

RECENT NATIONAL MOVEMENTS.

Within a little over thirty years it has changed the map of central Europe from a medley of small states into a united Italy and a united Germany; it has also led to a reconstruction of the Austro-Hungarian Empire, In Italy, Germany and Austria-Hungary, the national questions may, however, be regarded as settled; and if, in the case of Austria-Hungary, owing to exactly reverse conditions, the settlement has been a tentative one, it has at least removed the question from the more immediate concern of the present. In a different quarter of Europe, however, the rise of the national movements has led to a question, infinitely more complicated than the others, and which, so far from being settled, is becoming ever more pressing year by year. This reference is to the great Balkan problem.

That this question has been delayed in its solution for over four centuries, is due, no doubt, to the conquests of the Turk, and it is still complicated by his presence. In the notes to the four previous Balkan maps (1191–1451), attention was especially directed to the national movements, so far as they had opportunity to develop themselves during this period. These movements, feeble in their character, were all smothered by the Turkish conquest. With the decline of this power in the present century these forces once more have opportunity for reappearance. In this regard the history of the Balkans during the nineteenth century is simply the history of the fourteenth and fifteenth centuries read backwards.

The Turkish Empire had suffered terrible reverses during the eighteenth century. Hungary (1699), the Crim Tartars (1774), Bukovina (1777), Jedisan (1792), Bessarabia and Eastern Moldavia (1812) were all successively wrested from the Ottomans, while Egypt on one side and Moldavia and Wallachia on another recovered practical autonomy, the one under the restored rule of the Mamelukes (1766), the other under native hospodars.

THE SERVIAN AND GREEK REVOLTS.

All of these losses, though greatly weakening the Ottoman power, did not destroy its geographical integrity. It was with the Servian revolt of 1804 that the series of events pointing to the actual disruption of the Turkish Empire may be said to have begun. The first period of dissolution was measured by the reign of Mahmoud II. (1808–1839), at once the greatest and the most unfortunate of all the later Turkish sultans. Servia, first under Kara Georg, then under Milosch Obrenovitch, the founder of the present dynasty, maintained a struggle which led to the recognition of Servian local autonomy in 1817. The second step in the process of dissolution was the tragic Greek revolution (1821–1828). The Sultan, after a terrible war of extermination, had practically reduced Greece to subjection, when all his work was undone by the intervention of the great powers.

The Turkish fleet was destroyed by the combined squadrons of England, France and Russia at Navarin, October 20, 1827, and in the campaign of the ensuing year the Moscovite arms for the first time in history penetrated south of the Balkans. The treaty of Adrianople, between Russia and Turkey (September 14, 1829), gave to the Czar the protectorate over Moldavia and Wallachia. By the treaty of London earlier in this year Greece was made autonomous under the suzerainty of the Sultan, and the protocol of March 22, 1829, drew her northern frontier in a line between the gulfs of Arta and Volo. The titular sovereignty of the Sultan over Greece was annulled later in the year at the peace of Adrianople, though the northern boundary of the Hellenic kingdom was then curtailed to a line drawn from the mouth of the Achelous to the gulf of Lamia. With the accession of the Bavarian king Otho, in 1833, after the failure of the republic, the northern boundary was again adjusted, returning to about the limits laid down in the March protocol of 1829. Greece then remained for over fifty years bounded on the north by Mount Othrys, the Pindus range and the gulf of Arta. In 1863, on the accession of the Danish king George I., the Ionian Isles, which had been under English administration since the Napoleonic wars, were ceded to the Greek kingdom, and in May, 1881, almost the last change in European geography to the present day was accomplished in the cession, by the Sultan, of Thessaly and a small part of Epirus.

The agitation in 1886 for a further extension of Greek territory was unsuccessful.

THE TREATY OF UNKIAR SKELESSI.

A series of still greater reverses brought the reign of the Sultan Mahmoud to a close. The chief of these were the defeats sustained at the hands of his rebellious vassal Mehemet Ali, pacha of Egypt, a man who takes rank even before the Sultan himself as the greatest figure in the Mohammedan world during the present century. The immediate issue of this struggle was the practical independence of Egypt, where the descendants of Mehemet still rule, their title having been changed in 1867 from viceroy to that of khedive. An event incidental to the strife between Mehemet Ali and the Sultan is of far

APPENDIX C.

greater importance in the history of European Turkey. Mahmoud in his distress looked for aid to the great powers, and the final issue of the rival interests struggling at Constantinople was the memorable treaty of Unkiar Skelessi (July, 1833) by which the Sultan resigned himself completely to the interests of his former implacable foe, the Czar of Russia. In outward appearance this treaty was an offensive and defensive alliance; in practical results it gave the Moscovite, in exchange for armed assistance, when needed, the practical control of the Dardanelles. It is no extravagance of statement to say that this treaty forms absolutely the high watermark of Russian predominance in the affairs of the Levant. During the subsequent sixty years, this influence, taken as a whole, strange paradox as it may seem, has rather receded than advanced. The utter prostration of the Turkish Empire on the death of Mahmoud (1839) compelled Russia to recede from the conditions of Unkiar Skelessi while a concert of the European powers undertook the task of rehabilitating the prostrate power; the Crimean war (1854–1855) struck a more damaging blow at the Russian power, and the events of 1878, though they again shattered the Turkish Empire, did not, as will be shown, lead to corresponding return of the Czar's ascendency.

THE CRIMEAN WAR AND TREATY OF PARIS.

The Crimean War was brought on by the attempt of the Czar to dictate concerning the internal affairs of the Ottoman Empire — a policy which culminated in the occupation of Moldavia and Wallachia (1853). All Europe became arrayed against Russia on this question,— Prussia and Austria in tacit opposition, while England, France, and afterwards Piedmont, drifted into war with the northern power.

By the treaty of Paris (1856), which terminated the sanguinary struggle, the Danube, closed since the peace of Adrianople (1829), was reopened; the southern part of Bessarabia was taken from Russia and added to the principality of Moldavia; the treaty powers renounced all right to interfere in the internal affairs of the Porte; and, lastly, the Black Sea, which twenty years before, by the treaty of Unkiar Skelessi, had become a private Russian pond, was swept of the Russian fleets and converted into a neutral sea. The latter condition however was abrogated by the powers (March 13, 1871).

Despite the defeat of Russia, the settlement effected at the congress of Paris was but tentative. The most that the allied powers could possibly have hoped for, was so far to cripple Russia as to render her no longer a menace to the Ottoman Empire. They succeeded only in so far as to defer the recurrence of a Turkish crisis for another twenty years.

The chief event of importance during this interval was the birth of the united Roumania. In 1857 the representative councils of both Moldavia and Wallachia voted for their union under this name. This personal union was accomplished by the choice of a common ruler, John Cuza (1859), whose election was confirmed by a new conference at Paris in 1861. A single ministry and single assembly were formed at Bucharest in 1862. Prince Karl of Hohenzollern-Sigmaringen was elected hospodar in 1866, and finally crowned as king in 1881.

THE REVIVED EASTERN QUESTION OF 1875-78.

The Eastern question was reopened with all its perplexities in the Herzegovinian and Bosnian revolt of August, 1875. These provinces, almost cut off from the Turkish Empire by Montenegro and Servia, occupied a position which rendered their subjugation almost a hopeless task.

Preparations were already under way for a settlement by joint action of the powers, when a wave of fanatical fury sweeping over the Ottoman Empire rendered all these efforts abortive. Another Christian insurrection in Bulgaria was suppressed in a series of wholesale and atrocious massacres. Servia and Montenegro in a ferment declared war on Turkey (July 2, 1876). The Turkish arms, however, were easily victorious, and Russia only saved the Servian capital by compelling an armistice (October 30). A conference of the representatives of the powers was then held at Constantinople in a final effort to arrange for a reorganization of the Empire, which should include the granting of autonomy to Bosnia, Herzegovina and Bulgaria. These conditions, though subsequently embodied in a general ultimatum, the London protocol of March 31, 1877, were rejected by the Porte, and Russia, who had determined to proceed alone in the event of this rejection, immediately declared war (April 24). Into this war, owing to the horror excited in England by the Bulgarian massacres, and the altered policy of France, the Turk was compelled to go without allies, and thus unassisted his defeat was assured. Then followed the sanguinary campaigns in Bulgaria, the memories of which are still recent and unobscured. Plevna, the central point of the Turkish resistance, fell on December 10th; Adrianople was occupied by the Russians on January 20th, 1878; and on January 31st, an armistice was granted.

Great Britain now seemed roused to a sense of the danger to herself in the Russian approach to Constantinople, and public opinion at last permitted Lord Beaconsfield to send a fleet to the Bosporus.

By the Russo-Turkish peace of San Stephano (March 3, 1878) Turkey recognized the complete independence of Servia, Roumania and Montenegro, while Bulgaria became what Servia and Roumania had just ceased to be, an autonomous principality under nominal Turkish sovereignty. Russia received the Dobrutcha in Europe, which was to be given by the Czar to Roumania in exchange for the portion of Bessarabia lost in 1856. Servia and Montenegro received accessions of territory, the latter securing Antivari on the coast, but the greatest geographical change was the frontier assigned to the new Bulgaria, which was to include all the territory bounded by an irregular line beginning at Midia on the Black Sea and running north of Adrianople, and, in addition, a vast realm in Macedonia, bounded on the west only by Albania, approaching Salonica, and touching the Ægean on either side of the Chalcidice.

It was evident that the terms of this treaty involved the interests of other powers, especially of Great Britain. An ultimate settlement which involved as parties only the conqueror and conquered was therefore impossible. A general congress of the Powers was seen to be the only solvent of the difficulty; but before such a congress was possible it was necessary for Great

APPENDIX C.

Britain and Russia to find at least a tangible basis of negotiation for the adjustment of their differences.

By the secret agreement of May 30th, Russia agreed to abandon the disputed points — chief among these the creation of a Bulgarian seaboard on the Ægean — and the congress of Berlin then assembled (June 13 — July 13, 1878).

ARRANGEMENTS OF THE TREATY OF BERLIN.

Great Britain was represented at the congress by the Marquis of Salisbury and the premier, the Earl of Beaconsfield. The treaty of Berlin modified the conditions of San Stephano by reducing the Russian acquisitions in Asia Minor and also by curtailing the cessions of territory to Servia and Montenegro. A recommendation was also made to the Porte to cede Thessaly and a part of Epirus to Greece, a transfer which was accomplished in 1881. A more important provision was the transfer of the administrative control of the provinces of Bosnia and Herzegovina to Austria. This cession was the outcome of the secret agreement between Russia and Austria at Reichstadt, in July of the previous year, by which the former had secured from her rival a free hand in the Turkish war. These districts were at once occupied by Austria, despite the resistance of the Mohammedan population, and the sanjak of Novibazar, the military occupation of which was agreed to by the Porte, was also entered by Austrian troops in September of the following year. England secured as her share of the spoil the control of the island of Cyprus.

The greatest work accomplished at Berlin, however, was the complete readjustment of the boundaries of the new Bulgarian principality.

This result was achieved through the agency of Great Britain. The great Bulgarian domain, which by the treaty of San Stephano would have conformed almost to the limits of the Bulgarian Empire of the tenth century, was, with the exception of a small western strip including the capital, Sofia, pushed entirely north of the Balkans. This new principality was to enjoy local autonomy; and immediately south of the Balkans was formed a new province, Eastern Roumelia, also with local autonomy, although under the military authority of the Sultan.

The result of the Berlin Congress was the apparent triumph of the Beaconsfield policy. It is doubtful, however, if the idea of this triumph has been fully sustained by the course of subsequent events. The idea of Beaconsfield appears to have been that the new Bulgaria could not become other than a virtual dependency of Russia, and that in curtailing its boundaries he was checking by so much the growth of Russian influence. If he could have foreseen, however, the unexpected spirit with which the Bulgarians have defended their autonomy, not from Turkish but from Russian aggression, it is doubtful if he would have lent himself with such vigor to that portion of his policy which had for its result the weakening of this "buffer" state. The determination to resist Russian aggression in the Balkans continues to form the purpose of English politicians of nearly all schools; but the idea that this policy is best served by maintaining the integrity of the Ottoman Empire in Europe has been steadily losing adherents since Beaconsfield's day. The one event of importance in Balkan history since 1878 has served well to illustrate this fact.

LATER CHANGES.

In September, 1885, the revolt of Eastern Roumelia partially undid the work of the Berlin treaty. After the usual negotiations between the Powers, the question at issue was settled by a conference of ambassadors at Constantinople in November, by which Eastern Roumelia was placed under the rule of the Bulgarian prince as vassal of the Sultan. This result was achieved through the agency of England, and against the opposition of Russia and other continental powers. England and Russia had in fact exchanged policies since 1878, now that the real temper of the Bulgarian people was more generally understood.

The governments of Greece and Servia, alarmed at the predominance thus given to Bulgaria among the liberated states, sought similar compensation, but were both foiled.

Servia, which sought this direct from Bulgaria, was worsted in a short war (Nov.—Dec. 1885), and Greece was checked in her aspiration for further territorial aggrandizement at the expense of Turkey by the combined blockade of the Powers in the spring of 1886.

Since then, no geographical change has taken place in the old lands of European Turkey. Prince Alexander of Bulgaria was forced to abdicate by Russian intrigue in September 1886; but under his successor, Prince Ferdinand of Saxe-Coburg (crowned in 1887), and his able minister Stambouloff, Bulgaria has successfully preserved its autonomy.

THE PRESENT-DAY PROBLEM.

A general statement of the Balkan problem as it exists to-day may be briefly given. The non-*Turkish* populations of European Turkey, for the most part Christian, are divided ethnically into four groups: the *Roumans* or *Vlachs*, the *Greeks*, the *Albanians* and the *Slavs*. The process of liberation, as it has proceeded during the present century, has given among these people the following separate states. The *Vlachs* are represented in the present kingdom of Roumania ruled by a Hohenzollern prince; the *Greeks* are represented in the little kingdom of Greece ruled by a prince of the house of Denmark; while the *Slavs* are represented by three autonomous realms: Bulgaria under Ferdinand of Saxe-Coburg, Servia under the native dynasty of Obrenovitch, and the little principality of Montenegro, the only one of all which had never yielded to Turkish supremacy, under the Petrovic house, which is likewise native.

The *Albanians* alone of the four races, owing in part, perhaps, to their more or less general acceptance of Mohammedanism, have not as yet made a determined effort for separate national existence.

To these peoples, under any normal process of development, belongs the inheritance of the Turkish Empire in Europe. The time has long passed when any such process can be effectually hindered on the Turkish side. It will be hindered, if at all, either by the aggressive and rival ambitions of their two great neighbors, Austria and Russia, or by the mutual jealousies and opposing claims of the peoples themselves.

The unfortunate part which these jealousies are likely to play in the history of the future

APPENDIX C.

was dimly foreshadowed in the events of 1885. It is indeed these rival aspirations, rather than the collapse of the Turkish power, which are most likely to afford Russia and even Austria the opportunity for territorial extension over the Balkan lands. A confederation, or even a tacit understanding between the Balkan states, would do much to provide against this danger; but the idea of a confederation, though often suggested and even planned, belongs at present only to the realm of possibilities. On the one hand Servia, menaced by the proximity of Austria, leans upon Russian support; on the other, Bulgaria, under exactly reverse conditions, yields to the influence of Austria. It will be seen at once that these are unfavorable conditions on which to build up any federative action. If at the next crisis, however, the liberated states are fated to act independently, it will be seen at once that Greece and Bulgaria possess the better chance. Not only are they the most remote from any of the great powers, but they alone possess a geography which is entirely open on the Turkish side.

Moreover, what is of still greater consequence, it is they who, from an ethnic standpoint, have the most legitimate interest in the still unliberated population of European Turkey. The unliberated *Greek* population predominates in southern Macedonia, the Chalcidian peninsula and along almost the entire seaboard, both of Thrace and Asia Minor; on the other hand the ethnographical limits of the *Bulgarian* people conform almost exactly to the boundaries of Bulgaria as provided for at San Stephano. The creation of a political Bulgaria to correspond to the ethnic Bulgaria was indeed the purpose of the Russian government in 1878, though with the repetition of the same conditions it would hardly be its purpose again.

Barring, therefore, the *Albanians* of the west, who as yet have asserted no clearly defined national claim, the *Greeks* and the *Bulgarians* are the logical heirs to what remains of European Turkey.

These observations are not intended as a forecast; they merely indicate what would be an inevitable outcome, were the question permitted a natural settlement.

Concerning the *Turks* themselves a popular fallacy has ever been to consider their destiny as a whole. But here again an important division of the subject intrudes itself.

In Asia Minor, where the *Turkish* population overwhelmingly preponderates, the question of their destiny, barring the ever threatened Russian interference, ought not to arouse great concern in the present. But in European Turkey the utter lack of this predominance seems to deprive the Ottoman of his only legitimate title. The *Turkish* population in Thrace and the Balkans never did in fact constitute a majority; and with its continual decline, measured indeed by the decline of the Ottoman Empire itself, the greatest of all obstacles to an equitable and final settlement has been removed. (See the ethnic map of Europe at the present day.)

The historical geography of the Balkans during the present century is not so intricate that it may not be understood even from the current literature of the subject. The best purely geographical authority is E. Hertslet's "Map of Europe by Treaty." Of text works A. C. Fyffe's "History of Modern Europe," and J. H. Rose's "A Century of Continental History" afford excellent general views. The facts concerning the settlement of the first northern boundary of free Greece are given in Finlay's "History of Greece," Vol. VII. Of excellent works dealing more or less directly with present Balkan politics there is hardly an end. It is necessary to mention but a few: E. de Laveleye's "The Balkan Peninsula," E. A. Freeman's "The Ottoman Power in Europe," the Duke of Argyll's "The Eastern Question," and James Baker's "Turkey." See also the general bibliography of historical geography.—A. C. Reiley.

APPENDIX D.

Notes to the Development Map of Christianity.

THE subject matter contained in this map is of a character so distinct from that of the other maps of this series that the reader must expect a corresponding modification in the method of treatment.

The use of historical maps is confined, for the most part, to the statement of purely political conditions.

This is in fact almost the only field which admits of exact portrayal, within the limits of historical knowledge, by this method. Any other phase of human life, whether religious or social, which concerns the belief or the thought of the people rather than the exact extent of their race or their government, must remain, so far as the limitations of cartography is concerned, comparatively intangible.

Again, it should be noted that, even in the map treatment of a subject as comparatively exact as political geography, it is one condition of exactness that this treatment should be specific in its relation to a date, or at least to a limited period.

The map which treats a subject in its historical development has the undoubted merit of greater comprehensiveness; but this advantage cannot be gained without a certain loss of relation and proportion. Between the "development" map and the "date" map there is this difference: In the one, the whole subject passes before the eye in a sort of moving panorama, the salient points evident, but with their relation to external facts often obscured: in the other, the subject stands still at one particular point and permits itself to be photographed. A progressive series of such photographs, each forming a perfect picture by itself, yet each showing the clear relation with what precedes and follows, affords the method which all must regard as the most logical and the most exact. But from the very intangible nature of the subject treated in this map, the date method, with its demand for exactness, becomes impracticable. These observations are necessary in explaining the limitations of cartography in dealing with a subject of this nature. The notes that follow are intended as a simple elucidation of the plan of treatment.

The central feature in the early development of Christianity is soon stated. The new faith spread by churches from city to city until it became the religion of the Roman Empire; afterwards this spread was continued from people to people until it became the religion of Europe. The statement of the general fact in this crude and untempered form might in an ordinary case provoke criticism, and its invariable historic truth with reference to the second period be open to some question; but within the limits of map presentation it is substantially accurate. It forms, indeed, the key upon which the entire map is constructed.

THE ANTE-NICENE CHURCHES.

During the first three centuries of the Christian era, up to the Constantinian or Nicene period, there is no country, state or province which can be safely described as Christian; yet as early as the second century there is hardly a portion of the Empire which does not number some Christians in its population. The subject of the historical geography of the Christian church during the ante-Nicene period is confined, therefore, to the locating of these Christian bodies wherever they are to be found. On this portion of the subject the map makes its own statement. It is possible merely to elucidate this statement, with the suggestion, in addition, of a few points which the map does not and cannot contain.

Concerning the ante-Nicene churches there is only one division attempted. This division, into the "Apostolic" and "post-Apostolic," concerns merely the period of their foundation. Concerning the churches founded in the Apostolic period (33–100), our knowledge is practically limited to the facts culled from the Acts, the Epistles and the Apocalypse. The churches of the post-Apostolic period afford a much wider field for research, although the materials for study bearing upon them are almost as inadequate. According to the estimate of the late Prof. R. D. Hitchcock, there were in the Roman Empire at the close of the persecutions about 1,800 churches, 1,000 in the East and 800 in the West. Of this total, the cities in which churches have been definitely located number only 525. They are distributed as follows: Europe 188, Asia 214, Africa 123 (see v. I, p. 456). Through the labors of Prof. Henry W. Hulbert, the locations of these 525 cities, so far as established, have been cast in available cartographic form.

It is much to be regretted that, despite the sanction of the author, it has been found impossible, owing to the limitations of space, to locate all of these cities in the present map. The attempt has been limited therefore to the placing of only the more prominent cities, or those whose location is subject to the least dispute.

The Apostolic and post-Apostolic churches, as they appear upon the map, are distinguished by underlines in separate colors. A special feature has been the insertion of double underlines to mark the greater centres of diffusion, so far as their special activity in this respect can be safely assumed. In this class we have as centres in Apostolic times *Jerusalem*, *Antioch*, *Ephesus*, *Philippi*, *Thessalonica* and *Corinth*; in post-Apostolic times, when the widening of the field necessitates special and limited notices, we may name *Alexandria*, *Edessa*, *Rome* and *Carthage*.

The city of *Rome* contains a Christian community in Apostolic times, but its activity as a great diffusion centre, prior to early post-Apostolic times, is a point of considerable historical

controversy. In this respect it occupies a peculiar position, which is suggested by the special underlines in the map.

CONVERSION OF THE EMPIRE.

The above method of treatment carries us in safety up to the accession in the West of the first Christian Emperor (311). The attempt, however, to pursue the same method beyond that period would involve us at once in insurmountable difficulties.

The exact time of the advent of the Christian-Roman world it is indeed impossible to define with precision. The Empire after the time of Constantine was predominantly Christian, yet paganism still lingered in formidable though declining strength. A map of religions designed to explain this period, even with unlimited historical material, could hardly be executed by any system, for the result could be little better than a chaos, the fragments of the old religion everywhere disappearing or blending with the new. The further treatment of the growth of Christianity by cities or churches is now impossible; for the rapid increase of the latter has carried the subject into details and intricacies where it cannot be followed: on the other hand, to describe the Roman world in the fourth century as a Christian world would be taking an unwarranted liberty with the plain facts of history.

The last feeble remnants of paganism were in fact burned away in the fierce heat of the barbaric invasions of the fifth century. After that time we can safely designate the former limits of the Roman Empire as the Christian world. From this point we can resume the subject of church expansion by the "second method" indicated at the head of this article. But concerning the transition period of the fourth and fifth centuries, from the time Christianity is predominant in the Roman world until it becomes the sole religion of the Roman world, both methods fail us and the map can tell us practically nothing.

BARBARIANS OF THE INVASION.

Another source of intricacy occurring at this point should not escape notice. It was in the fourth century that Christianity began its spread among the barbarian Teutonic nations north of the Danube. The *Goths*, located on the Danube, between the Theiss and the Euxine, were converted to Christianity, in the form known as Arianism, by the missionary bishop Ulphilas, and the faith extended in the succeeding century to many other confederations of the Germanic race. This fact represented, for a time, the Christianization, whole or partial, of some peoples beyond the borders of the Empire. With the migrations of the fifth and sixth centuries, however, these converts, without exception, carried their new faith with them into the Empire, and their deserted homes, left open to new and pagan settlers, simply became the field for the renewed missionary effort of a later age. It is a historical fact, from a cartographic standpoint a fortunate one, that, with all the geographic oscillations of this period between Christianity and paganism, the Christian world finally emerged with its boundaries conforming, with only a few exceptions, to the former frontiers of the Roman Empire.

Whether or not this is a historical accident it nevertheless gives technical accuracy from the geographic standpoint to the statement that Christianity first made the conquest of the Roman world; from thence it went out to complete the conquest of Europe.

APPENDIX D.

CONVERSION OF EUROPE.

With the view, as afforded on the map, of the extent of Christianity at the commencement of the seventh century, we have entered definitely upon the "second method." Indeed, in Ireland, Wales and Scotland, where the Celtic church has already put forth its missionary effort, the method has, in point of date, been anticipated; but this fact need cause no confusion in treatment. Henceforth the spread of Christianity is noted as it made its way from "people to people." At this point, however, occurs the greatest intangibility of the subject. The dates given under each country represent, as stated in the key to the map, "the approximate periods of conversion." It is not to be inferred, however, that Christianity was completely unknown in any of these countries prior to the periods given, or that the work of conversion was in each case entirely completed within the time specified. But it is an absolute necessity to give some definiteness to these "periods of conversion"; to assign with all distinctness possible the time when each land passed from the list of pagan to the list of Christian nations. The dates marking the limits to these periods are perhaps chosen by an arbitrary method. The basis of their selection, however, has been almost invariably some salient point, first in the introduction and finally in the general acceptance of the Christian faith. In order that the reader may possess the easy means of independent opinion or critical judgment, the explanation is appended of the dates thus used, concerning which a question might legitimately arise.

Goths.— *Converted to Arian Christianity by Ulphilas*, 341–381.—These dates cover the period of the ministry of Ulphilas, whose efforts resulted in the conversion of the great body of the Danubian Goths. He received his ordination and entered upon his work in 341, and died at Constantinople in 381. (See C. A. A. Scott's "Ulfilas.")

Suevi, Burgundians and Lombards.—These people, like the Goths, passed from paganism through the medium of Arian Christianity to final Orthodoxy. Concerning the first process, it is possible to establish nothing, save that these Teutonic peoples appeared in the Empire in the fifth century as professors of the Arian faith. The exact time of the acceptance of this faith is of less consequence. The second transition from Arianism to Orthodoxy occurred at a different time in each case. The Suevi embraced the Catholic faith in 550; the Visigoths, through their Catholic king Reccared, were brought within the church at the third council of Toledo (589). Further north the Burgundians embraced Catholicism through their king Sigismond in 517, and, finally, the Lombards, the last of the Arians, accepted Orthodoxy in the beginning of the seventh century. The Vandals, another Arian German nation of this period, figured in Africa in the fourth century.

They were destroyed, however, by the arms of Belisarius in 534, and their early disappearance renders unnecessary their representation on the present map.

Franks.— *Christianity introduced in* 496.— This is the date of the historic conversion of Clovis and his warriors on the battlefield of

APPENDIX D.

Tolbiac. The Franks were the first of the Germanic peoples to pass, as a nation, to orthodoxy direct from paganism, and their conversion, as we have seen, was soon followed by the progress from Arianism to Orthodoxy of the other Germanic nations within the borders of the Empire.

Ireland.— *Christianity introduced by Patrick,* 440–493.—St. Patrick entered upon his missionary work in Ireland in 440; he died on the scene of his labors in 493. This period witnessed the conversion of the bulk of the Irish nation.

Picts.—*Christianity introduced from Ireland by Columba,* 563–597.—These dates cover the period of St. Columba's ministry. The work of St. Ninian, the "apostle of the Lowlands" in the previous century, left very few enduring results. The period from 563, the date of the founding of the famous Celtic monastery of Iona, to the death of Columba in 597, witnessed, however, the conversion of the great mass of the Pictish nation.

Strathclyde.—*Christianity introduced by Kentigern,* 550–603.—These dates, like the two preceding, cover the period of the ministry of a single man, Kentigern, the "apostle of Strathclyde." The date marking the commencement of Kentigern's labors is approximate. He died in 603.

England.—The Celtic church had been uprooted in England by the Anglo-Saxon invasions of the fifth and sixth centuries. While its missionary efforts were now being expended on Scotland, Strathclyde, and Cornwall, its pristine seat had thus fallen away to complete paganism. The Christianization of England was the work of the seventh century, and in this work the Celtic church, though expending great effort, was anticipated and ultimately outstripped by the church of Rome.

Kent.—*Christianity introduced by Augustine,* 597–604.—These dates cover the ministry of St. Augustine, the apostle of Kent. This was the first foothold gained by the Roman church on the soil of Britain.

Northumbria.—627–651.—Edwin (Eadwine), king of Northumbria, received baptism from the Kentish missionary Paulinus on Easter Eve, 627.

The process of conversion was continued by the Celtic missionary, Aidin, who died in 651. The Christianity of Northumbria had begun before the latter date, however, to influence the surrounding states.

East Anglia.—630–647.—East Anglia had one Christian king prior to this period; but it was only with the accession of Sigebert (630) that great progress was made in the conversion of the people. The reign of king Anna witnesses the practical completion of this work. In 647 the efforts of this sovereign led to the baptism of Cenwalch, king of the West Saxons.

Wessex.—634–648.—The conversion of the West Saxons was begun by the missionary Birinus in 634. The year 648 witnessed the restoration of the Christian king Cenwalch.

Mercia.—654–670.—Mercia was one of the last of the great English kingdoms to accept the faith. Their king, Penda, was indeed the most formidable foe the church encountered in the British Isles. The conversion of Penda's son Peada admitted the gospel to the Middle Angles, who accepted Christianity in 653. The East Saxons embraced the faith at about the same time. Finally in 654 the defeat and death of Penda at the hand of Oswy, the Christian king of Northumbria, opened the doors of Mercia as well. The conversion of the realm was practically accomplished during the next few years.

Sussex.—681.—The leaders of the South Saxons received baptism at the hands of the apostle Wilfred in 681. Sussex was the last retreat of paganism on the English mainland, and five years later the conversion of the inhabitants of the Isle of Wight completed the spread of Christianity over every portion of the British Isles.

Frisians.—*Christianity introduced by Willibrord,* 690–739.—The work of St. Willibrord among the Frisians was one of many manifestations of the missionary activity of the Celtic church. Willibrord introduced Christianity among these people during the years of his ministry, but to judge by the subsequent martyrdom of Boniface in Friesland (755) the work of conversion was not fully completed in all quarters until a later time.

Mission Field of Boniface.—722–755.—The object of the map is not merely to locate the mission field of the great "apostle of Germany," but also to give the location and date of the various bishoprics which owed their foundation to his missionary efforts.

Saxons.—787–805.—Of all the nations converted to Christianity up to this time the Saxons were the first conquest of the sword. The two most powerful Saxon chiefs were baptized in 787; but it was not until their complete defeat and subjugation by Charlemagne in 805 that the work of conversion showed a degree of completeness. With the Christianization of the Saxons the cordon of the church was completed around the Germanic nations.

Moravia.—*Christianity introduced by Cyrillus and Methodius,* 863–900.—St. Cyrillus, the "apostle of the Slavs," entered upon his mission in Moravia in 863. The political Moravia of the ninth century, under Rastislav and Sviatopluk, exceeded greatly the limits of the modern province; but the missionary labor of the brothers Cyrillus and Methodius seems to have produced its principal results in the modern Moravian territory, as indicated on the map. Methodius, the survivor of the brothers, died about 900. In the tenth century Moravia figures as Christian.

Czechs.—880–1039.—The door to Bohemia was first opened from Moravia in the time of Sviatopluk. The reactions in favor of paganism were, however, unusually prolonged and violent. Severus, Archbishop of Prague, finally succeeded in enforcing the various rules of the Christian cultus (1039).

Poles.—966–1034.—The Polish duke Mieczyslav was baptized in 966. Mieczyslav II. died in 1034. These dates cover the active missionary time when, indeed, the efforts of the clergy were backed by the strong arm of the sovereign. Poland did not, however, become completely Christian until a somewhat later period.

Bulgarians.—863–900.—The Bulgarian prince Bogoris was baptized in 863. Again, as in so many other cases, the faith was compelled to pass to the people through the medium of the sovereign. The second date is arbitrary, although Bulgaria appears definitely as a Christian country at the commencement of the tenth century.

Magyars.—950–1050.—Missionaries were admitted into the territory of the magyars in 950.

APPENDIX D.

The coronation of St. Stephen, the "apostolic king," (1000) marked the real triumph of Christianity in Hungary. A number of pagan reactions occurred, however, in the eleventh century, so that it is impossible to place the conversion of the Magyars at an earlier date than the last one assigned.

Russians.—988–1015.—The Russian grand-duke Vladimir was baptized on the occasion of his marriage to the princess Anne, sister of the Byzantine Emperor, in 988. Before his death in 1015 Christianity had through his efforts become the accepted religion of his people.

Danes.—*Converted by Ansgar and his successors*, 827–1035.—The Danes had been visited by missionaries prior to the ninth century, but their work had left no permanent result. The arrival of Ansgar, the "apostle of the North" (827), marks the real beginning of the period of conversion. This period in Denmark was an unusually long one. It was not fully complete until the reign of Canute the Great (1019–1035).

Swedes (Gothia).—*Christianity introduced by Ansgar and his successors*, 829–1000.—Ansgar made his first visit to Sweden in 829, two years after his arrival in Denmark. The period of conversion, as in Denmark, was a long one; but by the year 1000 the southern section, Gothia or Gothland, had become Christian. The conversion of the northern Swedes was not completed for another century.

Norwegians.—935–1030.—The period of conversion in Norway began with the reign of the Christian king Hakon the Good. The faith made slow progress, however, until the reign of Olaf Trygveson, who ascended the throne near the end of the tenth century. The work of conversion was completed in the reign of Olaf the Saint (1014–1030).

Pomeranians.—*Christianity introduced by Otho of Bamberg*, 1124–1128.—The attempt of the Poles to convert the Pomeranians by the sword prior to these dates had proven unavailing, and missionaries had been driven from the country. Within the short space of four years, however, Otho of Bamberg succeeded in bringing the great mass of the people within the pale of the church.

Abotrites.—1125–1162.—The conversion of these people was clearly the work of the sword. It was accomplished within the time specified by Albert the Bear, first margrave of Brandenburg, and Henry the Lion, duke of Saxony. The last heathen king became the first Christian duke of Mecklenburg in 1162. Further south the kindred Wend nations between the Elbe and the Oder had been the object of German effort, both missionary and military, for over two centuries, but had generally come within the church before this time.

Lives and Prussians.—*Christianity introduced by the Sword Brothers*, 1202–1236, *and by the Teutonic Knights*, 1230–1289.—These conversions, the work of the transplanted military orders of Palestine, were direct conquests of the sword, and as such possess a definiteness which is so unfortunately lacking in so many other cases.

So much for the character and the purpose of the dates which appear on this map. In the employment of the colors, the periods covered are longer, and as a consequence the general results are somewhat more definite. The use of a color system directly over a date system is intended to afford an immediate though general view. From this to the special aspects presented by the date features is a simple step in the development of the subject.

Another feature of the map which may not escape notice is the different systems used, respectively, in the Roman and Mediæval period for the spelling of urban names. A development map covering a long period of history cannot be entirely free from anachronisms of this nature; but a method has nevertheless been followed in the spelling of these place names:—to give in each case the spelling current at the period of conversion. The fact that the labors of the Christian missionaries were confined mostly to the Roman world in the Roman period, and did not extend to non-Roman lands until the Middle Ages, enables us to limit our spelling of civic names to a double system. The cities of the Roman and of the Mediæval period are shown on the map and in the key in two different styles of type. Only in the cases of cities like Rome, Constantinople and Antioch, where the current form has the absolute sanction of usage even for classic times, has there been any deviation from the strict line of this method.

In conclusion, the general features of the subject present themselves as follows: Had the advance of Christianity, like Mohammedanism, been by conquest, had the bounds of the Christian faith been thus rendered ever conterminous with the limits of a people or an empire, then, indeed, the subject of church expansion would possess a tangibility and coherency concerning which exact statement would be possible. The historical geography of the Christian church would then partake of some of the precision of political division. But the non-political element in the Christian cultus deprives us, in the study of the subject, of this invaluable aid. At a later time, when the conquests of the soul were backed by the strong arm of power, and when the new faith, as often happened, passed to the people from the sovereign, a measure of this exactness is perhaps possible.

We have witnessed an indication of these tendencies in many cases, as we approached the termination of the period covered by this map. But the fact remains that the fundamental character of the Christian faith precludes, in the main, the possibility of its growth being measured by the rules which govern ordinary political expansion.

This being then a subject on which definiteness is well nigh impossible, it has been treated by a method correspondingly elastic. A working basis for the study of the subject is, however, afforded by this system. This basis secured, the student may then systematically pursue his theme.

BIBLIOGRAPHY.

The historical geography of the Christian church, if studied only within narrow limits, can be culled from the pages of general church history. All of these accounts, however, are brief—those in the smaller histories extremely so. If studied thus, the reader will derive the most help from Neander's "History of the Christian Religion and Church," vol. I, pp. 68–86, vol. II, pp. 1–84, 93–129; Schaff's "History of the Christian Church," vol. I, pp. 224–406, vol. II, pp. 13–84, vol. III, pp. 10–71, vol. IV, pp. 17–142, and Moeller's "History of the Christian Church."

APPENDIX D.

These works may be supplemented by a vast number of books treating of special phases of church history, though the number in English dealing specifically with geographical expansion is very small.

The most recent, dealing with the ante-Nicene period, is Ramsey's "Church in the Roman Empire before A. D. 170," to which the same author's "Historical Geography of Asia Minor" forms a most indispensible prelude.

Entering the mediæval period, the best general guides are the little books of G. F. Maclear, entitled respectively the conversion of the Celts, English, Continental Teutons, Northmen and Slavs. These works may be supplemented by Thomas Smith's "Mediæval Missions," and for special subjects by G. T. Stokes' "Ireland and the Celtic Church," W. F. Skene's "Celtic Scotland" (vol. II), and S. Baring Gould's "The Church in Germany."

The texts of the Councils as contained in Harduin, Labbe, and Mansi are indispensible original aids in the study of church geography.

Of German Works, J. E. T. Wiltsch's "Atlas Sacer," and the same author's "Church Geography and Statistics," translated by John Leitch, have long remained the standard guides for a study of the historical geography of the church. The Atlas Sacer, containing five large plates, is the only pure atlas guide to the subject. The "Church Geography and Statistics," being an ecclesiastical work, dwells with great fulness on the internal facts of church geography, but the outward expansion, barring the early growth of the church, is not so concisely treated. For the history of mediæval missions the reader will be better served elsewhere. To the reader using German, C. G. Blumhardt's "Die Missionsgeschichte der Kirche Christi" (3 vols., 1828–1837), and a later work, "Handbuch der Missionsgeschichte und Missionsgeographie" (2 vols., 1863), may be noted.

For modern missions there is a very full literature. Comprehensive works on this subject are Grundemann's "Allgemeine Missions Atlas," Burkhardt and Grundemann's "Les Missions Evangéliques" (4 vols.), and in English the "Encyclopædia of Missions." Several articles in the "Encyclopædia of Missions" should not escape notice. Among them are "Mediæval Missions," and the "Historical Geography of Missions," the latter by Dr Henry W. Hulbert. The writer is glad at this point to return his thanks to Dr. Hulbert for the valued aid extended in the location of the Church of the ante-Nicene period.—A. C. Reiley.

APPENDIX E.

THE FOLLOWING NOTES AND CORRECTIONS TO MATTER RELATING TO AMERICAN ABORIGINES, IN VOL. I., HAVE BEEN KINDLY MADE BY MAJOR J. W. POWELL AND MR. J. OWEN DORSEY, OF THE BUREAU OF ETHNOLOGY.

Adai.—This tribe, formerly classed as a distinct family—the Adaizan—is now regarded by the Bureau of Ethnology as but a part of the Caddoan or Pawnee.

Apache Group.—Indians of different families are here mentioned together: (A) the Comanches, etc., of the Shoshonean Family; (B) the Apaches (including the Chiricaguis, or Chiricahua, Coyoteros, etc., but excluding the Tejuas who are Tañoan) of the Athapascan Family, the Navajos of the same family; and (C) the Yuman Family, including the Cosninos, who are not Apache (Athapascan stock).

Athapascan Family.—Not an exact synonym of "Chippewyans, Tinneh and Sarcees." The whole family is sometimes known as Tinneh, though that appellation is more frequently limited to part of the Northern group, the Chippewyans. The Sarcees are an offshoot of the Beaver tribe, which latter form part of one of the subdivisions of the Northern group of the Athapascan Family. The Sarcees are now with the Blackfeet.

Atsinas (Caddoes).—The Atsinas are not a Caddoan people, but they are Algonquian, as are the Blackfeet (Sik-sik-a). The Atsinas are the "Fall Indians," "Minnetarees of the Plains," or "Gros Ventres of the Plains," as distinguished from the Hidatsa, who are sometimes called the "Minnetarees of the Missouri," "Gros Ventres of the Missouri."

Blackfeet or Siksikas.—The Sarcee are a Tinneh or Athapascan tribe, but they are not *the* Tinneh (see above). The "Atsina" are not a Caddo tribe (see above).

Cherokees.—These people are now included in the Iroquoian Family. See Powell, in *Seventh Annual Rept., Bureau of Ethnology, p.* 79.

Flatheads (Salishan Family).—The "Cherakis," though included among the Flatheads by Force, are of the Iroquoian Family. The "Chicachas" or Chickasaws, are not Salishan, but Muskhogean. See Powell, *Seventh Annual Rept., Bureau of Ethnology, p.* 95. The Totiris of Force, are the Tutelos, a tribe of the Siouan Family. See Powell, *Seventh Annual Rept., Bureau of Ethnology, p.* 116. The Cathlamahs, Killmucks (i. e., Tillamooks), Clatsops, Chinooks and Chilts are of the Chinookan Family. See Powell, *Seventh Annual Rept., Bureau of Ethnology, pp.* 65, 66.

Gros Ventres (Minnetaree; Hidatsa).—There are two distinct tribes which are often confounded, both being known as the Gros Ventres or Minnetarees. 1. The Atsina or Fall Indians, an Algonquian tribe, the "Gros Ventres of the Plains," or the "Minnetarees of the Plains." 2. The Hidatsa, a Siouan tribe, the "Gros Ventres of the Missouri," or the "Minnetarees of the Missouri." The former, the Atsina, have been wrongly styled "Caddoes" on p. 88.

Hidatsa, or Minnetaree, or Gros Ventres.—Often confounded with the Atsina, who belong to the Algonquian Family, the Hidatsa being a tribe of the Siouan Family. The Hidatsa have been called Gros Ventres, "Big Paunches," but this nickname could have no reference to any personal peculiarities of the Hidatsa. It seems to have originated in a quarrel between some Indians over the big paunch of a buffalo, resulting in the separation of the people into the present tribes of Hidatsas and Absarokas or Crows, the latter of whom now call the Hidatsa, "Ki-khatsa," from ki-kha, a paunch.

Hupas.—They belong to the Athapascan Family: the reference to the Modocs is misleading.

Iroquois Tribes of the South.—"The Meherrins or Tuteloes."—These were not identical, the Tutelos being a Siouan tribe, the Meherrins being now identified with the Susquehannocks.

Kenai or Blood Indians.—The Kenai are an Athapascan people inhabiting the shores of Cook's Inlet and the Kenai Peninsula, Southern Alaska; while the Blood Indians are a division of the Blackfeet (Siksika), an Algonquian tribe, in Montana.

Kusan Family.—The villages of this family were on Coos River and Bay, and on both sides of Coquille River, near the mouth. See Powell, *Seventh Annual Rept., Bureau of Ethnology, p.* 89.

ALSO IN: J. Owen Dorsey, *The Gentile System of the Siletz Tribes, in Jour. Amer. Folk-Lore, July—Sept.*, 1890, *p.* 231.

Minnetarees. See above, ATSINA and HIDATSA.

Modocs (Klamaths) and their California and Oregon neighbors.—The Klamaths and Modocs are of the Lutuamian Family; the Shastas of the Sastean; the Pit River Indians of the Palaihnihan; the Eurocs of the Weitspekan; the Cahrocs of the Quoratean; the Hoopahs, Tolewas, and the lower Rogue River Indians of the Athapascan; the upper Rogue River Indians of the Takilman.

Muskhogean Family.—The Biloxi tribe is not Muskhogean but Siouan. See Dorsey (James Owen), "*The Biloxi Indians of Louisiana,*" *reprinted from v.* 42, *Proc. Amer. Assoc. Adv. Sci., Madison meeting*, 1893.

Natchitoches.—A tribe of the Caddoan Family. —Dorsey (J. Owen), *MS. in the Bureau of Ethnology*, 1882.

ALSO IN: Powell, *Seventh Annual Rept., Bureau of Ethnology, p.* 61.

Pueblos.—"That Zuni was Cibola it is needless to attempt to prove any further."—A. F. Bandelier, *Journal of Am. Eth. and Arch., v.* 3, *p.* 19, 1892.

Rogue River Indians.—This includes tribes of various families: the upper Rogue River In-

APPENDIX E.

dians being the Takelma, who are assigned to a special family, the Takilman; and the lower Rogue River Indians, who are Athapascan tribes. See Dorsey (J. Owen), "*The Gentile System of the Siletz Tribes,*" *in Jour. Amer. Folk-Lore, July —Sept.*, 1890, *pp.* 228, 232–236.

Santees.—Two divisions of the Siouan Family are known by this name: 1. The I sau-ya-ti or Dwellers on Knife Lake, Minnesota, identical with the Mdewakantonwan Dakota. These figured in the Minnesota outbreak of 1862. The survivors are in Knox County, Nebraska, on what was once the Santee reservation, and near Flandreau, South Dakota. 2. The Santees of South Carolina were part of the Catawba confederacy. The Santee river is named after them.

Sarcee.—These are not all of the Tinneh, nor are they really Blackfeet, though living with them. The Sarcees are an offshoot of the Beaver Indians, a tribe of one of the divisions of the Northern group of the Athapascan Family.

Siouan Family.—All the tribes of this family do not speak the Sioux language, as is wrongly stated on p. 110. Those who speak the "Sioux" language are the Dakota proper, nicknamed Sioux, and the Assiniboin. There are, or have been, nine other groups of Indians in this family: to the Cegiha or Dhegiha group belong the Omahas, Ponkas, Osages, Kansas or Kaws, and Kwapas or Quapaws; to the Tchiwere group belong the Iowas, Otos, and Missouris; the Winnebago or Hochangara constitute another group; the fifth group consists of the survivors of the Mandan nation; to the sixth group belong the Hidatsa and the Absarokas or Crows; the Tutelos, Keyauwees, Aconeechis, etc., constituted the seventh group; the tribes of the Catawba confederacy, the eighth; the Biloxis, the ninth; and certain Virginia tribes the tenth group. The Winnebagos call themselves Hochangara, or First Speech (not "Trout Nation"), they are not called Horoje ("fish-eaters") by the Omahas, but Hu-tan-ga, Big Voices, a mistranslation of Hochangara. The Dakotas proper sometimes speak of themselves as the "O-che-ti sha-ko-win," or the Seven Council-fires. Their Algonquian foes called them Nadowe-ssi-wak, the Snake-like ones, from nadowe, a snake; this was corrupted by the Canadian French to Nadouessioux, of which the last syllable is Sioux. The seven primary divisions of the Dakota are as follow: Mdewakantonwan, Wakhpekute, Sisitonwan or Sisseton, Wakhpetonwan or Warpeton, Ihanktonwan or Yankton, Ihanktonwanna or Yanktonnai, and Titonwan or Teton.

The Sheyennes or Cheyennes, mentioned in connection with the Sioux by Gallatin and Carver, are an Algonquian people. Gallatin styles the "Mandanes" a Minnetaree tribe; but as has just been stated, the survivors of the Mandan nation, a people that formerly inhabited many villages (according to Dr. Washington Matthews and others) belong to a distinct group of the Siouan Family, and the Hidatsa (including the Amakhami or "Annahawas" of Gallatin) and the Absaroka, Upsaroka or Crows constitute the sixth group of that family. The "Quappas or Arkansas" of Gallatin are the Kwapas or Quapaws of recent times. The Osages call themselves, not "Wausashe," but Wa-sha-she.

Takilman Family.—"The Takilma formerly dwelt in villages along upper Rogue River, Oregon, all the latter, with one exception, being on the south side, from Illinois River on the southwest, to Deep Rock, which was nearer the head of the stream. They are now included among the 'Rogue River Indians,' and they reside on the Siletz Reservation, Tillamook County, Oregon, where Dorsey found them in 1884."—Powell, *Seventh Annual Rept., Bureau of Ethnology, p.* 121.—They call themselves, Ta-kelma.—Dorsey.—Dorsey had their chief make a map showing the locations of all their villages.

APPENDIX F.

CHRONOLOGY OF IMPORTANT AND INDICATIVE EVENTS.

TO THE CHRISTIAN ERA.

B. C. 4777. Beginning of the Egyptian dynasties as given by Manetho, according to the latest computations.*
2250. Beginning of the reign of Hammurabi, or Chammurabi, the first important king of Babylonia.*
1500. Independence of Assyria as a kingdom separate from Babylonia, and rise of Nineveh.*
1330. Beginning of the reign in Egypt of Ramses II., the Sesostris of the Greeks.*
1260. Death of Ramses II., king of Egypt, and accession of Merneptah or Merenptah, supposed by many writers to be the Pharaoh of the Oppression.*
1200. Exodus of the Children of Israel from Egypt.*
1120. Beginning of the reign of Tiglathpileser I., king of Assyria.*
1000. Beginning of the reign of King David.*
960. Death of David and beginning of the reign of Solomon.*
776. Beginning of the Olympiads.
753. The founding of Rome.*
745. First war between Sparta and Messenia.
734. Founding of Syracuse by Greeks from Corinth.
725. End of first Messenian War.
722. Overthrow of the kingdom of Israel by the Assyrians.—Captivity of the Ten Tribes.
685. The second war between Messenia and Sparta.
668. End of the second Messenian war.
640. Birth of Thales.*
624. Supposed date of the legislation of Draco, at Athens.*
612. Conspiracy of Cylon at Athens.
608. Accession of Nebuchadnezzar in Babylonia.
606. Destruction of Nineveh and overthrow of the Assyrian empire by the Medes.*
601. First invasion of Palestine by Nebuchadnezzar.
598. Invasion of Palestine by Nebuchadnezzar.
594. The Constitution of Solon adopted at Athens.
586. Capture of Jerusalem by Nebuchadnezzar.—End of the kingdom of Judah and exile of the remnant of the people to Babylon.
560. Tyranny of Pisistratus established at Athens.
551. Birth of Confucius* (d. 478).
549. Overthrow of the Median monarchy by Cyrus, and founding of the Persian.
546. Overthrow of Crœsus and the kingdom of Lydia by Cyrus, king of Persia.
538. Conquest of Babylon by Cyrus.
529. Death of Cyrus and accession of Cambyses to the throne of Persia.
525. Conquest of Egypt by Cambyses, king of Persia.—Birth of Æschylus (d. 456).
521. Accession of Darius I., king of Persia.
520. Birth of Pindar.*
516. Invasion of Scythia by Darius, king of Persia.*
514. Birth of Themistocles* (d. 449*).
510. Expulsion of the Pisistratids from Athens.
509. Expulsion of the Tarquins from Rome.*—Founding of the Republic (Roman chronology).
508. Political reorganization of Athens by Cleisthenes.
506. Subjection of Macedonia to Persia.
500. Rising of the Greek colonies in Ionia, against the Persians.
495. Birth of Sophocles (d. 405*).
493. League of the Romans and Latins.
492. First secession of the Roman Plebs.—Creation of the Tribunes of the People.
490. First Persian expedition against Greece.—Destruction of Naxos by the Persians.—Their overwhelming defeat at Marathon.
489. Condemnation and death of Miltiades at Athens.*
486. Accession of Xerxes to the throne of Persia.
484. Birth of Herodotus.*
480. Second Persian invasion of Greece.—Thermopylæ.—Artemisium.—Salamis.—Retreat of Xerxes.—Carthaginian invasion of Sicily.—Battle of Himera.—Birth of Euripides.*
479. Battles of Platæa and Mycale and end of the Persian invasion of Greece.
478. Beginning of the tyranny of Hieron at Syracuse.
477. Formation of the Confederacy of Delos, under Athens.
471. Exile of Themistocles from Athens.—Birth of Thucydides (d. 401*).

* Uncertain date.

469. Birth of Socrates* (d. 399*).
466. Naval victory of the Greeks over the Persians at Eurymedon.—Outbreak of the Plague at Rome.—Revolt of Naxos from the Delian Confederacy.—Fall of the tyrants at Syracuse.
465. Murder of Xerxes I., and accession of Artaxerxes I. to the throne of Persia.
464. Great earthquake at Sparta.—Rising of the Helots, or beginning of the third Messenian War.
460. Birth of Hippocrates.
458. Commencement of the Long Walls of Athens.
457. Beginning of war of Corinth, Sparta, and Ægina with Athens.—Battle of Tanagra.
456. Athenian victory at Œnophyta.
455. End of the third Messenian War.
450. End of war against Athens.—Framing of the Twelve Tables of the Roman Law.—The Decemvirs at Rome.—Birth of Alcibiades* (d. 404).
447. Defeat of the Athenians by the Bœotians at Coronea.
445. Conclusion of the Thirty Years Peace between Athens and Sparta and their allies.—Ascendancy of Pericles at Athens.—Peace of Callias between Greece and Persia.—Birth of Xenophon.*
444. Creation of Consular Tribunes at Rome.—Exile of Thucydides from Athens.
435. War between Corinth and Corcyra.
432. Complaints against Athens.—Peloponnesian Congress at Sparta.—Revolt of Potidæa.
431. Beginning of the Peloponnesian War.—Invasion of Attica.
430. Second invasion of Attica.—The Plague at Athens.
429. Death of Pericles at Athens.—Capture of Potidæa.—Birth of Plato (d. 347).
427. Destruction of Platæa by the Peloponnesians.—Massacre at Corcyra.
425. Surrender of Spartans to the Athenians at Sphacteria.—Accession of Xerxes II., king of Persia.
421. Peace of Nicias between Athens and Sparta.—End of the first period of the Peloponnesian War.
415. Expedition of the Athenians against Syracuse.—Mutilation of the Hermæ at Athens.—Accusation and flight of Alcibiades.
413. Disaster to the Athenians before Syracuse.—Renewal of the Peloponnesian War.
411. Oligarchical revolution at Athens.—The Four Hundred and their fall.—Recall of Alcibiades.
409. Carthaginian invasion of Sicily.
406. Victory of the Athenians over the Peloponnesians in the battle of Arginusæ.—Execution of the generals at Athens.
405. Defeat of the Athenians at Aigospotamoi.—Successful revolt of the Egyptians against the Persians, and independence established.
404. Fall of Athens.— End of the Peloponnesian War.
401. Expedition of Cyrus the Younger.
400. Retreat of the Ten Thousand under Xenophon.—Birth of Timoleon* (d. 337).
399. Condemnation and death of Socrates at Athens.—War of Sparta with Persia.
395. League of Greek cities against Sparta.—The Corinthian War.
390. Rome destroyed by the Gauls.
389. Birth of Æschines* (d. 314).
387. Peace of Antalcidas between the Greeks and Persians.
385. Birth of Demosthenes* (d. 322).
384. Birth of Aristotle (d. 322).
383. Betrayal of Thebes to Sparta.—War of Syracuse with Carthage.
379. Overthrow of the Olynthian League by Sparta.—Deliverance of Thebes.
371. Defeat of Sparta at Leuctra.—Ascendancy of Thebes.—Arcadian Union.
370. Peloponnesian expedition of Epaminondas.
367. Adoption of the Licinian Laws at Rome.
362. Victory and death of Epaminondas at Mantinea.
359. Accession of Philip to the throne of Macedonia.
357. Outbreak of the Ten Years Sacred War in Greece.
356. Burning of the Temple of Diana at Ephesus.—Birth of Alexander the Great (d. 323).
353. Final conquest of Egypt by the Persians.
352. Interference of Philip of Macedonia in the Greek Sacred War.—First Philippic of Demosthenes.
343. Deliverance of Syracuse by Timoleon.—First Samnite War in Italy.
341. End of first Samnite War.
340. Adoption of the Publilian Laws at Rome.
338. League of Greek cities against Philip of Macedonia.—His victory at Chæronea.—His domination established.—Subjugation of the Latins by Rome.
336. Assassination of Philip of Macedonia, and accession of Alexander the Great.
335. Revolt of Thebes.—Alexander's destruction of the city.
334. Alexander's expedition against Persia.—His victory at the Granicus.
333. Alexander's victory over the Persians at Issus.
332. Alexander's sieges of Tyre and Gaza.—His conquest of Egypt and founding of Alexandria.
331. Alexander's victory at Arbela.—Overthrow of the Persian empire.

* Uncertain date.

330. Alexander's destruction of Persepolis.
326. Alexander in India.—Defeat of Porus.—Beginning of second Samnite War in Italy.
323. Death of Alexander the Great at Babylon.—Partition of his dominion among the generals.—Revolt in Greece.—The Lamian War.
322. Subjugation of Athens by the Macedonians.—Death of Demosthenes.
321. Beginning of the Wars of the Successors of Alexander.—Founding of the kingdom of the Ptolemies in Egypt.—Defeat of the Romans by the Samnites at the Caudine Forks.
317. Execution of Phocion at Athens.
307. Athens under the rule of Demetrius Poliorcetes.
306. Royal titles assumed by Antigonus (as king of Asia), Ptolemy, in Egypt, Seleucus Nicator, in Syria, Lysimachus, in Thrace, and Cassander, in Macedonia.
305. Siege of Rhodes by Demetrius Poliorcetes.
304. End of the second Samnite War in Italy.
301. Battle of Ipsus.—Overthrow and death of Antigonus.
298. Beginning of third Samnite War.
295. Roman defeat of the Gauls at Sentinum.
290. End of the third Samnite War.
287. Birth of Archimedes* (d. 212).
286. Adoption of the Hortensian Laws at Rome.
280. Invasion of Italy by Pyrrhus, king of Epirus.—Invasion of Greece by the Gauls.—Rise of the Achaian League.
278. Pyrrhus in Sicily, in war against Carthage.
275. Defeat of Pyrrhus at Beneventum.
264. Beginning of the first Punic War between Rome and Carthage.
263. Athens captured by Antigonus Gonatus.
255. Defeat and capture of Regulus in Africa.
250. Founding of the kingdom of Parthia by Arsaces.*
247. Birth of Hannibal* (d. 183).
241. End of the first Punic War.—Roman conquest of Sicily.—Revolt of the Carthaginian mercenaries.
234. Birth of Cato the Elder (d. 149).—Birth of Scipio Africanus the Elder* (d. 183).
227. War of Sparta with the Achaian League.
222. Roman conquest of Cisalpine Gaul completed.
221. Battle of Sellasia.—Sparta crushed by the king of Macedonia.
218. Beginning of the second Punic War between Rome and Carthage.—Hannibal in Italy.
217. Hannibal's defeat of the Romans at the Trasimene Lake.—Cœle-Syria and Palestine ceded to Egypt by Antiochus the Great.
216. Great defeat of the Romans by Hannibal at Cannæ.
214. Beginning of war between Rome and Macedonia.
212. Siege and reduction of Syracuse by the Romans.
211. Hannibal at the Roman gates.
210. Ægina taken by the Romans and the inhabitants reduced to slavery.
207. Defeat of Hasdrubal on the Metaurus.
206. Birth of Polybius.*
205. End of first Macedonian War.
202. Scipio's decisive victory at Zama, in Africa, ending the second Punic War.
201. Subjection of the Jews to the Seleucid monarchy.
200. Roman declaration of war against the king of Macedonia.
197. Decisive Roman victory over the Macedonians at Cynoscephalæ.
196. Freedom of the Greeks proclaimed by the Roman general Flamininus.
195. Birth of Terence* (d. 158*).
191. Romans defeat Antiochus of Syria at Thermopylæ in Greece.—Final subjugation of Cisalpine Gaul by the Romans.
190. Decisive defeat of Antiochus at Magnesia, by the Romans.—Beginning of Roman conquest in Asia.
189. Fall of the Ætolian League.
185. Birth of Scipio Africanus the Younger (d. 129).
171. The third war between Rome and Macedonia.
168. Roman victory at Pydna; extinction of the Macedonian kingdom.—Birth of Tiberius Gracchus* (d. 133).
167. Revolt of the Jews under Judas Maccabæus, against Antiochus, king of Syria.
165. Judas Maccabæus in Jerusalem; the Temple purified.
161. Defeat and death of Judas Maccabæus.
157. Birth of Marius (d. 86).
149. Opening of the third Punic War between Rome and Carthage.
146. Roman destruction of Carthage and Corinth.—Greece absorbed in the dominion of Rome.
138. Birth of Sulla (d. 78).
135. Assassination of Simon Maccabæus; accession of John Hyrcanus to the High Priesthood.
133. Outbreak of the Servile War in Sicily.—Attempted reforms and death of Tiberius Gracchus at Rome.—Reduction of Numantia.
121. Death of Caius Gracchus at Rome.
111. Beginning of the Jugurthine War between Rome and Numidia.

* Uncertain date.

106. Birth of Cicero (d. 43).—Birth of Pompey the Great (d. 48).
105. Great defeat of the Romans by the Cimbri at Arausio.—Royal title taken by Aristobulus in Judea.
104. Ending of the Jugurthine War by Marius.
102. Destruction of the Teutones at Aquæ Sextiæ by the Romans under Marius.
101. Destruction of the Cimbri by Marius.
100. Adoption of the Apuleian Law at Rome.—Birth of Julius Cæsar (d. 44).
95. Birth of Lucretius (d. 55).
90. Outbreak of the Social War, or struggle of the Italians.
88. Beginning of the first civil war (Marius and Sulla) at Rome, and of war with Mithridates, king of Pontus.—Unsuccessful siege of Rhodes by Mithridates.
87. Campaigns of the Romans under Sulla against Mithridates in Greece.—Marian proscriptions at Rome.—Birth of Catullus* (d. 47*).
86. Sulla's capture of Athens and victory at Chæronea.—Death of Marius.—Birth of Sallust (d. 34*).
84. End of the first Mithridatic War.
83. Return of Sulla to Italy; burning of the Temple of Jupiter; civil war at Rome.
82. Sulla master of Rome; the Sullan reign of terror.
80. War with Sertorius in Spain.
79. Sulla's resignation of the dictatorship.
78. Death of Sulla.
74. Opening of third Mithridatic War between Rome and the king of Pontus.
73. Rising of the Roman gladiators under Spartacus.
72. Assassination of Sertorius in Spain; Pompey in command.
71. Defeat of the gladiators and death of Spartacus.
70. Consulship of Pompey and Crassus at Rome.—Cicero's impeachment of Verres.
67. Pompey's campaign against the pirates of Cilicia.
66. Command of Pompey in the East.—Overthrow of Mithridates.
65. Birth of Horace (d. 8).
64. Extinction of the Seleucid kingdom by Pompey.
63. Consulship of Cicero at Rome; Conspiracy of Catiline.—Pompey's siege and conquest of Jerusalem; the Asmonean kingdom made tributary to Rome.
60. The first Triumvirate at Rome.
59. Consulship of Cæsar at Rome.
58. Beginning of Cæsar's campaigns in Gaul.—Exile of Cicero from Rome.
57. Recall of Cicero.
56. Roman conquest of Aquitaine.
55. Cæsar's first invasion of Britain.
53. Roman war with Parthia; defeat and death of Crassus at Carrhæ.
51. Cæsar's conquest of Gaul completed.
50. Beginning of the second Civil War at Rome; Cæsar's passage of the Rubicon.
49. Cæsar's campaign against the Pompeians in Spain; his conquest of Massilia.
48. Cæsar's victory at Pharsalia; death of Pompey in Egypt; Cæsar in Alexandria.
46. Cæsar's victory at Thapsus; death of Cato.
45. Cæsar's victory in Spain.
44. Assassination of Cæsar at Rome.
43. The second Triumvirate at Rome; murder of Cicero.—Birth of Ovid (d. A. D. 18).
42. Battles of Philippi; destruction of the Liberators.
40. Herod proclaimed King of Judea.
37. Conquest of Jerusalem by Herod.
31. War of Antony and Octavius; victory of Octavius at Actium, establishing his supremacy.
30. Death of Antony and Cleopatra; annexation of Egypt to the Roman dominion.
29. Triumph of Octavius celebrated at Rome; title of Imperator given to him; closing of the Temple of Janus.
27. Title of Augustus assumed by Octavius at Rome.
12. Expedition of the Romans under Drusus into Germany.
9. Last German campaign and death of Drusus.
8. First campaign of Tiberius (afterward Roman emperor) in Germany.
4. Probable date of the birth of Jesus.—Death of Herod, king of Judea.

CHRISTIAN ERA.

First Century.

1. Beginning of the Christian Era.
4. Campaign of the Emperor Tiberius in Germany.
6. Deposition of the Herodian ethnarch Archelaus; Judea made a district of the Roman prefecture of Syria.
9. Destruction of Varus and his Roman legions by the Germans under Arminius.
14. Death of Augustus; Tiberius made Emperor of Rome.—Expedition of Germanicus into Germany.
23. Birth of Pliny the Elder (d. 79).
26. Pontius Pilate, Roman procurator in Judea.

* Uncertain date.

27. Completion of the Pantheon at Rome.
29. Crucifixion of Jesus.*—Martyrdom of Saint Stephen.
35. Conversion of Saint Paul.*
37. Death of the Emperor Tiberius.—Accession of Caius, called Caligula.—Birth of Agricola (d. 93).—Birth of Josephus (d. 95*).
40. Birth of Martial.*
41. Murder of the Emperor Caligula; elevation of Claudius to the throne.—Restoration of the Herodian kingdom of Judea under Herod Agrippa.
43. Roman invasion of Britain by Aulius Plautius and the Emperor Claudius.
44. Death of Herod Agrippa; extinction of the kingdom of Judea.

GEIGER, W. Civilization of the Eastern Iranians in ancient times; with an introduction on the Avesta religion. London: H. Frowde. 1885. 2 v.

GRAETZ, H. History of the Jews, from the earliest times to the present day. London: D. Nutt. 1891. 5 v.

Sketches the ancient history of the Jews very slightly, but is full from the Roman period down to 1870.

GRANT, *Sir* ALEXANDER. Xenophon. (Ancient Classics for English Readers.) Edinburgh: W. Blackwood & Sons. Phil.: Lippincott & Co. 1871.

HARPER, HENRY A. The Bible and modern discoveries. Boston: Houghton, Mifflin & Co. 1890.

HERODOTUS. Stories of the East from Herodotus; by A. J. Church. London: Seeley & Co. 1881.

The story of the Persian War from Herodotus; by A. J. Church. London: Seeley & Co. 1882.

HERODOTUS. History; a new English version; ed. with notes, etc., by George Rawlinson and J. G. Wilkinson. London: J. Murray. 1858. 4 v.

A work of great value, in which Canon Rawlinson and Mr. Wilkinson were assisted by Sir Henry Rawlinson, the Assyriologist. "It is not every reader who has leisure to master such a book as Rawlinson's English 'Herodotus' But something of this fountain of history all may know Even in such a pleasant boy's book as Mr. Church's 'Stories from the East' and 'Stories from Herodotus' we get some flavour of the fine old Greek traveller. There are three great sections of Herodotus which are of special interest: 1, the history of the foundation of Cyrus' kingdom; 2, the books on the history, antiquities and customs of Egypt; 3, the immortal story of Marathon, Thermopylæ and Salamis."—Frederic Harrison, *The Meaning of History*, p. 90.

JOSEPHUS, FLAVIUS. Works; Whiston's translation, rev. by A. R. Shilleto. London: Bell & Sons. 1889.

LACOUPERIE, TERRIEN DE. Western origin of the early Chinese civilization. London: Asher & Co. 1894.

A definite presentation of the view long urged by Dr. Lacouperie, that the Akkadian or primitive Babylonian culture was communicated at an early day to the Chinese.

LEWIN, THOMAS. The siege of Jerusalem by Titus. London: Longmans. 1863.

LOCKYER, J. N. The dawn of Astronomy; a study of the temple-worship and mythology of the ancient Egyptians. London and N. Y.: Macmillan & Co.

McCURDY, JAMES FREDERICK. History, Prophecy and the Monuments. London and N. Y.: Macmillan & Co. 1894.

A work in which the latest researches and studies in the East are made fruitful.

MARIETTE, AUGUSTE. Outlines of ancient Egyptian history. London: Gilbert & Rivington. 1890.

MASPERO, G. The dawn of Civilization: Egypt and Chaldæa; ed. by A. H. Sayce. London: S. P. C. K. 1894.

Egyptian archæology; trans. from the French by Amelia B. Edwards. London: H. Grevel & Co.

Histoire ancienne des peuples de l'Orient. Paris: Hachette. 1886.

MILMAN, HENRY HART. History of the Jews. London: J. Murray. 3 v.

Bringing the modern account of the Jews throughout the world down to about 1860.

MORRISON, W. D. The Jews under Roman rule. N.Y.: G. P. Putnam's Sons. London: T. F. Unwin. 1890.

In the series of "The Story of the Nations."

MYERS, P. V. N. Eastern nations and Greece. (Ancient history for colleges and high schools.) Boston: Ginn & Co. 1890.

NEWMAN, FRANCIS W. History of the Hebrew Monarchy, from the administration of Samuel to the Babylonish captivity. 2d ed. London: J. Chapman. 1853.

PERROT, GEORGES, *and* CHARLES CHIPIEZ. History of Art in ancient Egypt; trans. from the French. London: Chapman & Hall. 1883. 2 v.

History of Art in Chaldea and Assyria. London. 1884. 2 v.

History of Art in Phœnicia and its dependencies. London. 1885. 2 v.

History of Art in primitive Greece. London. 1894.

PETRIE, W. M. FLINDERS. History of Egypt from the earliest times to the XVIth dynasty. London: Methuen & Co. 1894.

"This volume is but the first of a series which is intended to embrace the whole history of Egypt down to modern times. It is expected that three volumes will treat of the period of the Pharaohs, one volume of the Ptolemies, one volume of the Roman age, and one volume of Arabic Egypt. So far as practicable, the same system will be maintained throughout, though by different writers; and the aim of all will be to provide a general history, with such fulness and precision as shall suffice for the use of students."—*From the Author's Preface.*

SELECTED BIBLIOGRAPHY.

A republication of the article "Israel" contributed to the Encyclopædia Britannica.

WENDEL, F. C. H. History of Egypt. N. Y.: D. Appleton & Co. 1890.

An extremely condensed and not very readable sketch of the history of ancient Egypt, but one which specialists have commended for correctness of knowledge

WILKINSON, *Sir* J. GARDNER. Manners and customs of the ancient Egyptians. New ed., rev. and cor. by Samuel Birch. London: J. Murray. 1878. 2 v.

WRIGHT, W. B. Ancient cities; from the dawn to the daylight. Boston: Houghton, Mifflin & Co. 1886.

ANCIENT HISTORY: GREECE AND ROME.

ABBOTT, EVELYN. History of Greece. London: Rivingtons. 1888. v. 1-2.

The first volume carries the narrative to the Ionian revolt; the second to the Thirty Years Peace. "When completed, it will supply a want long felt, that of a good history of Greece of a size intermediate between Thirlwall, Grote, and Curtius, on the one hand, and the smaller text books and manuals on the other."—*English Historical Rev., Jan.*, 1889

Pericles and the Golden Age of Athens. N. Y.: G. P. Putnam's Sons. 1891.

In the series entitled "Heroes of the Nations."

ARCHÆOLOGICAL INSTITUTE OF AMERICA. Papers: Classical Series. Boston. 1882.

Including "Papers of the American School of Classical Studies at Athens."

ARISTOTLE. On the Constitution of Athens; trans. by E. Poste. London: Macmillan & Co. 1891.

A translation of the lately-found treaties believed to be by Aristotle. "While putting us in possession of more facts concerning the constitutional history of Athens than have been known hitherto, this treatise presents very great difficulties, both critical and historical. . . . We must receive the new information with caution, and far from looking on it as superseding our older authorities, we must remember that much of it may not be the work of Aristotle or of Aristotle's time."—E. Abbott, *Hist. of Greece, pt. 2, appendix 2.*

Politics; trans. by B. Jowett; with essays, notes, etc. Oxford: Clar. Press. 1885. 2 v.

ARNOLD, THOMAS. History of Rome; new ed. London: T. Fellowes. 1871. 3 v.

Dr. Arnold's History is founded on Niebuhr's. The fact is frankly stated in his preface: "When Niebuhr died, and there was now no hope of seeing his great work completed in a manner worthy of its beginning, I was more desirous than ever of executing my original plan, of presenting in a more popular form what he had lived to finish, and of continuing it afterwards with such advantages as I have derived from a long study and an intense admiration of his example and model." It was Dr. Arnold's hope to cover the whole stretch of Roman history, to Charlemagne; but he had only reached the narrative of the second Punic War when death arrested his work.

BARTHÉLEMY, *Abbé*. Travels of Anacharsis the younger in Greece, 4th century, B. C.

BLÜMNER, H. The home life of the ancient Greeks; trans. from the Ger. London: Cassell Co. 1890.

BURY, J. B. History of the later Roman Empire, from Arcadius to Irene. (395 to 800 A. D.) London: Macmillan & Co. 1889. 2 v.

A work written with more knowledge and carefulness than literary art

BUTCHER, S. H. Some aspects of Greek genius. London: Macmillan & Co. 1891.

CÆSAR, CAIUS JULIUS. Commentaries on the Gallic and Civil Wars, with the supplementary books attributed to Hirtius; literally trans., with notes [Bohn edition].

FOWLER, W. WARDE. The city-state of the Greeks and Romans. London: Macmillan & Co. 1893.

Julius Cæsar and the foundation of the Roman imperial system. N. Y.: G. P. Putnam's Sons. 1892.

In the series entitled "Heroes of the Nations."

FREEMAN, EDWARD A. History of Federal Government. v. 1. General Introduction.—History of the Greek Federations. London: Macmillan & Co. 1863.

"This noble work, in some respects the grandest of the author's conceptions, was never completed. . . . The war of 1866 between Prussia and Austria marked the beginning of organic changes in Germany which Mr. Freeman was anxious to watch for a while before finishing his book. He therefore turned aside and took up the third of his three great works [the History of Sicily being the second] – the only one that he lived to complete – the History of the Norman Conquest of England."—J. Fiske. *Edward Augustus Freeman (Atlantic Monthly, January,* 1893).

History of Sicily. Oxford: Clarendon Press. 1891. v. 1–4.

Left unfinished at Professor Freeman's death. The fourth volume, prepared by other hands, from the materials that he had made ready, carries the history to the death of Agathokles.

FROUDE, JAMES ANTHONY. Cæsar: a sketch. London: Longmans. 1879.

A brilliant and fascinating piece of historical writing, but tainted with Carlylean hero-worship.

FUSTEL DE COULANGES, N. D. The ancient city: a study of the religion, laws and institutions of ancient Greece and Rome; trans. from the French. Boston: Lee & Shepard. 1874.

GARDNER, PERCY. New chapters in Greek history: historical results of recent excavations in Greece and Asia Minor. London: J. Murray. 1892.

GIBBON, EDWARD. History of the decline and fall of the Roman Empire; with notes by Milman, Guizot, and Dr William Smith.

"We may correct and improve in detail from the stores which have been opened since Gibbon's time; we may write again large parts of his story from other, and often truer and more wholesome, points of view. But the work of Gibbon, as a whole, as the encyclopædic history of thirteen hundred years, as the grandest of historical designs carried out alike with wonderful power and with wonderful accuracy, must ever keep its place. Whatever else is read, Gibbon must be read too."—E. A. Freeman, *Historical Essays, pp.* 307-308. "It is no personal paradox, but the judgment of all competent men, that the 'Decline and Fall' of Gibbon is the most perfect historical composition that exists in any language: at once scrupulously faithful in its facts; consummate in its literary art; and comprehensive in analysis of the forces affecting society over a very long and crowded epoch."—Frederic Harrison. *The Meaning of History, p.* 101.

GLADSTONE, WILLIAM E. Juventus Mundi; the gods and men of the heroic age. London: Macmillan. 1869.

GROTE, GEORGE. History of Greece, to the close of the generation contemporary with Alexander the Great. London: J. Murray. 12 v.

"A business man, foreign to university life and its traditions, a skeptic in religion, a positivist in philosophy, and, above all, an advanced Radical in politics," Grote "was persuaded that the great social and political results of Greek history were because of, and not in spite of, the prevalence of democracy among its States, and because of the number and variety of these States. He would not accept the verdict of all the old Greek theorists who voted for the rule of the one or the enlightened few; and he wrote what may be called a great political pamphlet in twelve volumes in vindication of democratic principles. It was this idea which not only marshalled his facts, but lent its fire to his argument; and when combined with his Radicalism in religion and philosophy, produced a book so remarkable, that, however much it may be corrected and criticised, it will never be superseded. It is probably the greatest history among the many great histories produced in this century; and though very inferior in style to Gibbon's 'Decline and Fall,' will rank next to it as a monument of English historical genius."—J. P. Mahaffy, *Problems in Greek History, ch.* 1.

GUHL, E. *and* W. KONER. The life of the Greeks and Romans; trans. from the German. N. Y.: D. Appleton & Co. 1875.

The story of Alexander's Empire. N. Y.: G. P. Putnam's Sons. London: T. F. Unwin. 1887.

One of the very good books in the series of "The Story of the Nations."

MERIVALE, CHARLES. The fall of the Roman Republic; a short history of the last century of the Commonwealth. London: Longmans.

History of the Romans under the Empire. London: Longmans. 8 v. N. Y.: D. Appleton & Co. 7 v.

"His [Merivale's] history is a great work in itself, and it must be a very great work indeed which can outdo it within its own range. In days of licensed blundering like ours, it is delightful indeed to come across the sound and finished scholarship, the unwearied and unfailing accuracy, of Mr. Merivale. . . . On some points we hold that Mr. Merivale's views are open to dispute; but it is always his views, never his statements."—E. A. Freeman, *Historical Essays, p.* 309.

SELECTED BIBLIOGRAPHY.

MOMMSEN, THEODOR. History of Rome; trans. by W. P. Dickson; new ed. rev. throughout and embodying recent additions. London: R. Bentley & Son. 1894-95. 4 v.

Same: The Provinces, from Cæsar to Diocletian. London: R. Bentley & Son. 1886.

"The Roman History of Mommsen is, beyond all doubt, to be ranked among those really great historical works which do so much honour to our own day. We can have little doubt as to calling it the best complete Roman History that we have. . . . We have now, for the first time, the whole history of the Roman Republic really written in a way worthy of the greatness of the subject."—E. A. Freeman, *Historical Essays, pp.* 239-240.

MÜLLER, C. O. History and Antiquities of the Doric race; trans. from the German by H. Tufuell and G. C. Lewis. 2d ed. rev. London: J. Murray. 1839. 2 v.

Lectures on the history of Rome, to the fall of the Western Empire. London: Walton. 3 v.

OMAN, C. W. C. History of Greece, to the Macedonian conquest. London: Rivingtons. 1890.

"This is the best school history of Greece which has appeared for many a day. While the style is never heavy, nothing of importance has been omitted."—*English Historical Rev., Oct.* 1890.

PELHAM, H. F. Outlines of Roman history. London: Percival. N. Y.: G. P. Putnam's Sons. 1893.

PLUTARCH. Lives, the translation called Dryden's corrected from the Greek and rev. by A. H. Clough. London: S. Low, Marston & Co. 1859. 5 v.

POLYBIOS. Histories; trans. from the text of Hultsch by E. S. Shuckburgh. London: Macmillan & Co. 1889. 2 v.

Polybios, "the historian of the Decline and Fall of Ancient Greece," "is like a writer of our own times; with far less of inborn genius, he possessed a mass of acquired knowledge of which Thucydides could never have dreamed. He had, like a modern historian read many books and seen many lands. . . . He had himself personally a wider political experience than fell to the lot of any historian before or after him. . . . He could remember Achaia a powerful federation, Macedonia a powerful monarchy, Carthage still free, Syria still threatening; he lived to see them all subject provinces or trembling allies of the great municipality of Rome."—E. A. Freeman, *Hist. of Federal Govt., p.* 226.

RAMSAY, WILLIAM. Manual of Roman antiquities; rev. and partly rewritten by R. Lanciani. London: C. Griffin.

SCHLIEMANN, *Dr.* H. Ilios: the city and country of the Trojans. London: J. Murray. 1880.

Troja: results of the latest researches and discoveries on the site of Homer's Troy. London: J. Murray. 1884.

Mycenæ: a narrative of researches and discoveries. London.

Tiryns, the prehistoric palace of the King of Tiryns. London: John Murray. 1885.

SCHÖMANN, G. F. A dissertation on the assemblies of the Athenians; trans. from the Latin. Cambridge: W. P. Grant. 1838.

SCHÖMANN, G. F. The antiquities of Greece; trans. from the German. London: Rivingtons. 1880.

Only the first volume, treating of "The State," has been published.

SCHUCHHARDT, C. Schliemann's excavations; an archæological and historical study; trans. from the German. London: Macmillan & Co.

SUETONIUS, C. TRANQUILLUS. Lives of the Twelve Cæsars [Bohn edition]. London: Bell & Sons.

TACITUS, C. CORNELIUS. The Annals, The History, The Germany, The Agricola, The Dialogue on Oratory; trans. by A. J. Church and W. J. Brodribb; rev. ed., with notes. London: Macmillan & Co. 1877-82. 3 v.

The annals of Tacitus extend over most of the period from the death of Augustus to Nero, with important parts lost. The fragment preserved of the History gives us only four and a half out of fourteen books which made up the original work. These books contain the history of the years 69 and 70, not quite complete, and tell the story of the Vitellian conflict.

THIRLWALL, CONNOP. History of Greece. London: Longmans. 1835. 8 v.

Bishop Thirlwall's History covers the whole national life of the Greeks, down to the Roman conquest. "The strength of Thirlwall as clearly lies in the history of Alexander and his successors as the strength of Grote lies in the political history of Athenian and Syracusan democracy, as the strength of Curtius lies in the geography, in the artistic side of things, in the general picture of that age which was the glory of Athens, but which, as the disciples of Finlay know, was an age of decline for Hellas in the wider sense."—E. A. Freeman, *The Methods of Historical Study, p.* 287.—"The student of to-day who is really intimate with Thirlwall's history may boast that he has a sound and accurate view of all the main questions in the political and social development of the Hellenic nation. But he will never have been carried away with enthusiasm."—J. P. Mahaffy, *Problems in Greek History, ch.* 1.

THUCYDIDES. History; trans. into English, with introduction and notes, by B. Jowett. Oxford: Clar. Press. 1881. 2 v.

"Thucydides is much more than a great historian; or, rather he was what every great historian ought to be—he was a profound philosopher. His history of the Peloponnesian War is like a portrait by Titian; the whole mind and character, the inner spirit and ideals, the very tricks and foibles, of the man or the age come before us in living reality. No more memorable, truthful and profound portrait exists than that wherein Thucydides has painted the Athens of the age of Pericles."—Frederic Harrison, *The Meaning of History, p.* 92.

TORR, CECIL. Rhodes in ancient times. Cambridge: University Press. 1885.

TROLLOPE, ANTHONY. Life of Cicero. London: Chapman & Hall. 1880. 2 v.

Written in vindication of Cicero against the injustice done to the great patriotic orator in Froude's Cæsar. Both books are writings of advocacy rather than history.

WHIBLEY, L. Political parties in Athens during the Peloponnesian War. Cambridge Warehouse. 1889.

XENOPHON. Works; trans. by H. G. Dakyns. London and N. Y.: Macmillan & Co. 1890. v. 1-2.

Volume I. contains books 1 and 2 of the Hellenica, and the Anabasis; vol. 2 contains books 3 to 7, with Agesilaus, The Politics, and Revenues. Two more volumes are yet to be published.

MEDIÆVAL AND MODERN EUROPE.

ADAMS, CHARLES. Great campaigns: a succinct account of the principal military operations which have taken place in Europe from 1796 to 1870. Edin.: W. Blackwood & Sons. 1877.

Edited from lectures delivered by Major C. Adams at the Royal Military and Staff Colleges, England.

ADAMS, GEORGE BURTON. Civilization during the Middle Ages, especially in relation to modern civilization. N. Y.: C. Scribner's Sons. 1894.

ADDISON, C. G. The Knights Templars. 3d ed. London: Longman. 1854.

ALISON, *Sir* ARCHIBALD. History of Europe, 1789 to 1815, and 1815 to 1852. Edin.: W. Blackwood & Sons. 1853. 28 v.

"We are not unaware . . . of the surpassing greatness of the external events of which his history is composed, nor do we complain of the minute and laborious zeal with which he has gathered every particular concerning them, ransacking archives and measuring fields of slaughter; but we do complain that he has allowed the tumult and dust of these vast contests to stop his ears and blind his eyes to every object but themselves."—Parke Godwin, *Out of the Past, p.* 207.

BALZANI, UGO. The Popes and the Hohenstaufen. London: Longmans.

In the series entitled "Epochs of Church History."

BEARD, CHARLES. The Reformation of the 16th Century in its relation to modern thought. London: Williams and Norgate. 1883.

Hibbert Lectures for 1883.

BRADLEY, HENRY. The story of the Goths, to the end of the Gothic dominion in Spain. N. Y.: G. P. Putnam's Sons. London: T. F. Unwin. 1888.

One of the better books in the series of "The Story of the Nations."

BRYCE, JAMES. The Holy Roman Empire. London: Macmillan & Co.

CAYLEY, EDWARD S. The European revolutions of 1848. London: Smith, Elder & Co. 1856. 2 v.

CHEETHAM, S. History of the Christian Church during the first six centuries. London and N. Y.: Macmillan & Co. 1894.

CHURCH, R. W. The beginning of the Middle Ages. London: Longmans. N. Y.: C. Scribner's Sons. 1877.

An admirable brief survey of early mediæval history, in the series entitled "Epochs of Modern History."

COMYN, *Sir* ROBERT. History of the western empire, from Charlemagne to Charles V. [800-1520]. London: W. H. Allen & Co. 1841. 2 v.

COX, GEORGE W. The Crusades. London: Longmans. N. Y.: C. Scribner's Sons. 1874.

In the series entitled "Epochs of History."

DILKE, *Sir* CHARLES W. Position of European politics, 1887. London: Chapman & Hall. 1887.

DÖLLINGER, JOHN IGNATIUS von. Addresses on historical and literary subjects; trans. by Margaret Warre. London: J. Murray. 1894.

Containing as follows: Universities, past and present; Founders of Religions; the Empire of Charles the Great and his Successors; Anagni; the Suppression of the Knights Templars; the History of Religious Freedom; various estimates of the French Revolution; the part taken by North America in Literature.

Studies in European history; trans. by Margaret Warre. London: John Murray. 1890.

Academical addresses on the following subjects: The significance of Dynasties in the history of the world; the House of Wittelsbach and its place in German history; the relation of the City of Rome to Germany in the Middle Ages; Dante as a Prophet; the struggle of Germany with the Papacy under the Emperor Ludwig of Bavaria; Aventin and his Times; on the Influence of Greek Literature and Culture upon the Western World in the Middle Ages; the origin of the Eastern Question; the Jews in Europe; upon the Political and Intellectual Development of Spain; the Policy of Louis XIV.; the most influential Woman of French history (Madame de Maintenon).

DUFF, MOUNTSTUART E. GRANT. Studies in European politics. Edin.: Edmonston & Douglas. 1866.

These well named "Studies" in the political history of the Continent, by an English statesman, are mostly devoted to the important but little understood period between 1815 and 1848, in Spain, Russia, Austria, Prussia, Holland, and Belgium. They are deficient in attention to the social conditions of the time.

DURUY, VICTOR. History of modern times, from the fall of Constantinople to the French Revolution; trans. and rev., with notes, by E. A. Grosvenor. N. Y.: H. Holt & Co. 1894.

History of the middle ages; trans. by E. H. and M. D. Whitney, with notes and rev. by G. B. Adams. N. Y.: Henry Holt & Co. 1891.

DYER, THOMAS HENRY. History of modern Europe, 1453–1857. London: John Murray. 4 v. Geo. Bell & Sons. 4 v.

Dyer's History of Modern Europe "represented the labour of years, and chronicled the period from the fall of Constantinople to the end of the Crimean War. It was a clear and painstaking compilation, whose main object was to expound the origin and nature of the European concert."—G. Barnett Smith. *Biographical Sketch (in the Dict. of National Biography).*

EGINHARD. Life of Charlemagne; trans. by S. E. Turner. N. Y.: Harper & Bros.

FREEMAN, EDWARD A. The Chief Periods of European History; six lectures, Oxford, 1885. London: Macmillan & Co. 1886.

The "chief periods" treated of are "those which concern the growth and the dying out" of the Roman power: "Europe before the growth of Rome—Europe with Rome, in one shape or another, as her centre—Europe since Rome has practically ceased to be."—*Author's Preface.*

Fifty years of European history: four Oxford lectures. [Also] The Teutonic conquest of Gaul and Britain. London: Macmillan & Co. 1888.

The fifty years of European history reviewed in the first four of these lectures are those that had been spanned by the reign of Queen Victoria when its jubilee was celebrated, in 1887.

General sketch of European history. London: Macmillan & Co. 1872

Historical Essays. London: Macmillan & Co. 1871–92. 4 v.

v. 1 The Mythical and Romantic Elements in early English History; the continuity of English History; Relations between the Crowns of England and Scotland; Saint Thomas of Canterbury and his Biographers; the Reign of Edward III.; the Holy Roman Empire; the Franks and the Gauls; the early Sieges of Paris; Frederick I, King of Italy; the Emperor Frederick II.; Charles the Bold; Presidential Government.

v. 2 Ancient Greece and Mediæval Italy; Mr. Gladstone's "Homer and the Homeric Age"; the Historians of Athens; the Athenian Democracy; Alexander the Great, Greece during the Macedonian Period; Mommsen's History of Rome; Sulla; the Flavian Cæsars.

v. 3. First Impressions of Rome; the Illyrian Emperors and their Land; Augusta Treverorum; the Goths at Ravenna; Race and Language; the Byzantine Empire; First Impressions of Athens; Mediæval and Modern Greece; the Southern Slaves; Sicilian Cycles; the Normans at Palermo.

v. 4. Carthage; French and English Towns; Aquæ Sextiæ; Orange; Augustodunum; Perigueux and Cahors; the Lords of Ardres; Points in the History of Portugal and Brazil; Alter Orbis; Historical Cycles; Augustan Ages; English Civil Wars.

The historical geography of Europe. London: Longmans, Green & Co. 1881. 1 v. text; 1 v. maps.

The object of this remarkably valuable work is to "trace out the extent of territory which the different states and nations of Europe and the neighbouring lands have held at different times in the world's history, to mark the different boundaries which the same country has had, and the different meanings in which the same name has been used."—*Author's Introduction.*

FROISSART, *Sir* JOHN. Chronicles [1326–1400]; trans. by T. Johnes. London: Wm. Smith. 2 v.

Same; edited for boys, with an introduction, by Sidney Lanier. N. Y.: C. Scribner's Sons. 1879.

FYFFE, C. A. History of modern Europe. London: Cassell. 1880–1889. N. Y.: Henry Holt & Co. 1881–90. 3 v.

Covers the period from the beginning of the war with revolutionary France, in 1792, to the Berlin Congress and Treaty, 1878; a well-constructed and well written piece of history.

GERARD, JAMES W. The peace of Utrecht, 1713–14. N. Y.: G. P. Putnam's Sons. 1885.

GRUBE, A. W. Heroes of history and legend. London: Griffith & Farran 1880.

A translation of the second part of Grube's "Charakterbilder aus der Geschichte und Sage."

GUIZOT, F. P. History of civilization, to the French revolution; trans. from the French. London: Geo. Bell & Sons. 3 v. N. Y.: D. Appleton & Co. 2 v.

"The originality of M. Guizot's work consists in the truly scientific spirit and character of his method. He was the first to dissect a society, in the same comprehensive, impartial, and thorough way in which an anatomist dissects the body of an animal, and the first to study the functions of the social organism in the same systematic and careful manner in which the physiologist studies the functions of the animal organism."—R. Flint, *The Philosophy of History in France and Germany, p.* 240.

HALLAM, HENRY. View of the state of Europe during the Middle Ages. London: J. Murray. 3 v. N. Y.: W. J. Widdleton. 3 v.

"He [Hallam] never thoroughly took in either the Imperial or the ecclesiastical element in history; if I say that he did not thoroughly take in the Teutonic element either, it might seem that I leave him no standing-ground at all. And whither shall he seem to vanish, if I add that he never shows that same kind of thorough knowledge of original authorities, that mastery of them, that delight in them, which stands out in every line of Kemble and Palgrave? Hallam had nothing of the spirit of the antiquary; he had not, I should say, very much of the spirit of the historian proper. Yet Hallam was a memorable writer, whose name ought to be deeply honoured, and a large part of whose writings are as valuable now as when they were first written."—E. A. Freeman, *Methods of Historical Study, p.* 282.

HÄUSSER, LUDWIG. The period of the Reformation, 1517–1648, ed. by W. Oncken; trans. by Mrs. Sturge. London: Strahan. 1873. N. Y.: Robert Carter & Bros.

Unquestionably the best comprehensive survey of the Reformation and the Reformation period that has yet been placed before English readers.

HEEREN, A. H. L. A manual of the history of the political system of Europe and its colonies; from the close of the 15th century to the fall of Napoleon; trans. from the Ger. London: H. G. Bohn. 1846.

HENDERSON, ERNEST F., *trans. and ed.* Select historical documents of the middle ages. London: Geo. Bell & Sons. 1892. N. Y.: Macmillan & Co.

HODGKIN, THOMAS. Italy and her Invaders. Oxford: Clarendon Press. 1880–85. 4 v.

A very satisfactory work, narrating that part of the barbaric avalanche of the fifth and sixth centuries which crushed the Empire in its western seat. The first volume deals with the Visigothic invasion, the second with the Hunnish Vandal and Herulian the third with the Ostrogothic, the fourth with Justinian's recovery of Italy.

Theodoric the Goth; the barbarian champion of civilization. N. Y.: G. P. Putnam's Sons. 1891.

In the series entitled "Heroes of the Nations."

JOHNSON, A. H. The Normans in Europe. London: Longmans, Green & Co. 1877. N. Y.: Chas. Scribner's Sons.

JOHNSTONE, C. F. Historical abstracts. London: C. Kegan Paul & Co. 1880.

Excellent outline sketches of the history of Denmark, Norway, Sweden, the kingdom of the Netherlands, Belgium, the Ottoman Empire, Greece, Portugal, Prussia, Russia, and the Swiss Confederation.

SELECTED BIBLIOGRAPHY.

MILMAN, HENRY HART. History of Latin Christianity, including that of the Popes to Nicholas V. London: J. Murray. 1854. 6 v.

"I know few books more delightful and more instructive to read than Milman's 'History of Latin Christianity.' And none better discharges the work of a guide, both to the original authorities and, what we cannot neglect, to modern German writers."—E. A. Freeman, *Methods of historical study*, p. 283.

MOELLER, WILHELM. History of the Christian Church, A. D. 1–600; trans. from the German. London: S. Sonnenschein. 1892.

Same, in the Middle Ages. London: S. Sonnenschein. 1893.

MONSTRELET, ENGUERRAND DE. Chronicles; trans. by T. Johnes. London: Geo. Routledge & Sons. 1867. 2 v.

A chronicle which continues that of Froissart, from 1400 to 1467, and is continued by others to 1516, especially narrating events in the Hundred Years War.

MONTALEMBERT, CHARLES F., *Count de*. The Monks of the West, from St. Benedict to St. Bernard; authorized translation. London: W. Blackwood & Sons. 1861–79. 7 v.

"His pages bring before us tales handed down by oral tradition alone for perhaps two or three generations, together with documents and letters as genuine as the despatches of the Duke of Wellington. But there is little or no effort to show that one is more valuable than the other, or to determine where the poetry which is lavish of marvellous incidents ends, and where the region of fact begins."—*Edinburgh Review*, v. 127, p. 404.

MÜLLER, W. Political history of recent times, 1816–1875; trans. [and continued to 1881] by J. P. Peters. N. Y.: Harper & Bros. 1882.

"For many years—as Professor of Modern History, first at the State University of Michigan, afterward at Cornell University—I had been seeking a work which should give to thoughtful students a view, large but concise, of the political history of Continental Europe in the nineteenth century. . . . At last I came upon the 'Politische Geschichte der Neuesten Zeit,' by Professor Wilhelm Müller, of Tubingen. . . . Three readings of it satisfied me that it is what is needed in America. . . . It is not an abridgment; it is a living history."—Andrew D. White, *Prefatory Note.*

MURDOCK, HAROLD. The reconstruction of Europe [1852–1870]. Boston: Houghton, Mifflin & Co. 1889.

NATIONAL LIFE AND THOUGHT. London: T. F. Unwin. 1891.

A volume of lectures delivered at South Place Institute, London, in 1889–90, designed "to give information, in a popular form, with regard to the national development and modes of political action among the different nations throughout the world." The lecturers were generally men specially well informed on their several subjects—such as Professor J. E. Thorold Rogers, Professor Pulszky, J. T. Bent, J. C. Cotton Minchin, Eirikr Magnusson, and others.

NEANDER, AUGUSTUS. General history of the Christian religion and Church; trans. from the German by Joseph Torrey.

"He . . . made church history a book of instruction, edification, and comfort, on the firm foundation of profound and accurate learning, critical mastery of the sources, spiritual discernment, psychological insight, and sound, sober judgment."—P. Schaff, *Saint Augustin Melanchthon, Neander*, p. 136.

PALGRAVE, *Sir* FRANCIS. History of Normandy and England. London: Macmillan & Co. 4 v.

PASTOR, LUDWIG. History of the Popes from the close of the Middle Ages; trans. from the German. London: J. Hodges.

A history written from the Roman Catholic standpoint.

PERIODS OF EUROPEAN HISTORY; ed. by Arthur Hassal. London and N. Y.: Macmillan & Co.

Period 1, A. D. 476–918; by Chas. W. C. Oman.—Period 5, A. D. 1598–1715; by Henry O. Wakeman.—Period 7, A. D. 1789–1815; by H. Morse Stephens.—Other periods not yet published.

RANKE, LEOPOLD VON. History of the Latin and Teutonic nations from 1494 to 1514; trans. from the German. London: G. Bell & Sons. 1887.

istory of the Popes in the 16th and 17th centuries; trans. from the German by Mrs. Austin. London: J. Murray. 2 v.

ROBERTSON, JAMES C. History of the Christian Church; from the Apostolic Age to the Reformation. London: J. Murray. 1875. 8 v.

WARD, A. W. The Counter-Reformation. London: Longmans. 1889.

In the series entitled "Epochs of Church History."

WOODHOUSE, F. C. The military religious orders of the Middle Ages. London: S. P. C. K. 1879.

GREAT BRITAIN: GENERAL.

BRIGHT, J. F. History of England. London: Rivingtons. 1880-1888. 4 v.

A very carefully written history, brought down to 1880; quite full in detail, and necessarily, therefore, condensed in the narrative.

BUCKLE, HENRY THOMAS. History of civilization in England. London: Longmans. N.Y.: D. Appleton & Co. 2 v.

A work which has lost the great influence that it exerted when it first appeared, but which is full of suggestion, nevertheless, to one who reads it thoughtfully.

BUCKLEY, ARABELLA B. History of England for beginners. London: Macmillan & Co. 1887.

BURROWS, MONTAGU. Commentaries on the history of England from the earliest times to 1865. Edin.: W. Blackwood & Sons. 1893.

A successful "attempt to interpret the History of England in accordance with the latest researches"; "a digest and a commentary rather than an abstract or an epitome."

BURTON, JOHN HILL. History of Scotland from Agricola's invasion to the last Jacobite insurrection; new and enlarged ed. Edin.: W. Blackwood & Sons. 8 v.

CALLCOTT, *Lady* M. Little Arthur's history of England. London: J. Murray.

Very high in the esteem of those who judge books for children most carefully.

DICEY, ALBERT V. The Privy Council: the Arnold prize essay. London: Macmillan & Co. 1887.

DUFFY, *Sir* CHARLES GAVAN. Bird's-eye view of Irish history. Dublin: J. Duffy & Son. 1882.

ENGLISH WORTHIES; ed. by Andrew Lang. London: Longmans. 1885–.

Raleigh; by Edmund Gosse. — Blake; by David Hannay. — Claverhouse; by Mowbray Morris. — Marlborough; by George Saintsbury. — Shaftesbury; by H. D. Traill. — Canning; by F. H. Hill. — Darwin; by Grant Allen.

FORSYTH, WILLIAM. History of Trial by Jury. London: J. W. Parker. 1852.

FREEMAN, EDWARD A. The growth of the English constitution. London: Macmillan & Co. 1872.

GAIRDNER, JAMES, *and* JAMES SPEDDING. Studies in English history. Edin. 1881.

A volume of collected essays on the Lollards, the Historical element in Shakespeare's Falstaff, Katharine of Aragon's first and second marriages, history of the doctrine of the Divine Right of Kings, Sundays, ancient and modern, and other topics.

GARDINER, SAMUEL RAWSON. Historical biographies. London: Longmans. 1884.

Contains brief but excellent biographies of Simon de Montfort, Edward the Black Prince, Sir Thomas More, Sir Francis Drake, Cromwell, and William III.

A student's history of England, from the earliest times to 1885. London: Longmans. 1890–1. 3 v.

Professor Gardiner, being a specialist, distinctly, in the one period of English history to which he has devoted himself — the period of the Stuarts — would not claim authority, of course, as an original investigator of other times; and some parts of this general text-book have been found open to criticism. But, on the whole, it can claim the first rank among text-books of its class.

GNEIST, RUDOLPH. History of the English Constitution; trans. from the German. London: W. Clowes & Son. 1886. 2 v.

The English Parliament in its transformations through a thousand years. London: Grevel & Co. 1886.

"The work of Gneist on the English Constitution is scarcely less indispensable to the English student than the works of Stubbs and Hallam, while, as a distinguished jurist and politician in Germany, he surveys his subject from a different standpoint."—S. R. Gardiner and J. B. Mullinger *Introduction to the study of English History*, *p.* 410.

GREEN, JOHN RICHARD. Short history of the English people. Illus. edition, ed. by Mrs. J. R. Green and Miss Kate Norgate. London: Macmillan & Co. N. Y.: Harper & Bros. 4 v.

"The success of the 'Short History' was rapid and overwhelming. Everybody read it. It was philosophical enough for scholars, and popular enough for school boys. No historical book since Macaulay's has made its way so fast. . . . The characteristic note of his [Green's] genius was also that of Gibbon's, the combination of a perfect mastery of multitudinous details with a large and luminous view of those far-reaching forces and relations which govern the fortunes of peoples and guide the course of empire."—J. Bryce, *John Richard Green* (*Macmillan's Mag.*, *May*, 1883).

History of the English people. London: Macmillan & Co. N. Y.: Harper & Bros. 1878. 4 v.

An enlargement of the "Short History."

JOYCE, P. W. Short history of Ireland, from the earliest times to 1608. London: Longmans. 1893.

KNIGHT, CHARLES. Popular history of England. London: Bradbury & Evans. 8 v.

A work of great merit as a popular history, making no pretensions to original research; liberal in spirit and admirable in tone. It was one of the first works of the kind to be pictorially illustrated in a really historical way.

LANGMEAD, THOMAS P. TASWELL-. English constitutional history, from the Teutonic conquest to the present time. 2d ed. rev., with add'ls. London: Stevens & H. 1880.

LINGARD, JOHN. History of England from the first invasion by the Romans. London: Burns & Oates. 10 v.

English history written with general fairness from the Roman Catholic standpoint.

LOFTIE, W. J. History of London. London: E. Stanford. 1883–4. 2 v. with suppl't.

MACAULAY, THOMAS BABINGTON, *Baron*. History of England from the accession of James II. London: Longmans.

A brief survey of previous events introduces the history proper, which begins with the accession of James II., in 1685. As the death of the author brought his work to an abrupt end before he had finished his account of the reign of William III. (1689-1702), the history covers a period of less than eighteen years. Its extraordinary brilliancy, on the one hand, and its defects of partisan prejudice and misjudgment on the other, are well known. "I can see Macaulay's great and obvious faults as well as any man; I know as well as any man the cautions with which his brilliant pictures must be studied; but I cannot feel that I have any right to speak lightly of one to whom I owe so much in the matter of actual knowledge, and to whom I owe more than to any man as the master of historical narrative."—E. A. Freeman, *Methods of Historical Study*, *p.* 105.

POWELL, F. YORK. History of England, to the death of Henry VII. London: F. Rivingtons.

An excellent school text-book of the early centuries of English history, presenting really one of the best succinct studies that can be found of the four centuries from the first Norman to the first Tudor. It belongs to a series of three volumes, only one other of which (the third, by Professor Tout) has appeared.

RANNIE, DAVID W. Historical outline of the English Constitution, for beginners. London: Longmans. 1882.

SKOTTOWE, B. C. A short history of Parliament. London: Sonnenschein & Co. 1892.

SMITH, G. BARNETT. History of the English Parliament; with an account of the Parliaments of Scot-

SELECTED BIBLIOGRAPHY.

land and Ireland. London: Ward, Lock, B. & Co. 1892. 2 v.

SOUTHEY, ROBERT. Lives of the British admirals; completed by Robert Bell. London: Longmans. 1833. 5 v.

TRAILL, HENRY D., *ed.* Social England; a record of the progress of the people in religion, laws, learning, arts, industry, commerce, science, literature, and manners, from the earliest times to the present day, by various writers. London: Cassell & Co. N. Y.: G. P. Putnam's Sons. 1894–5.

A work somewhat unequally executed by the different writers engaged, but generally admirable, and exceedingly interesting. Three volumes have thus far been issued.

TWELVE ENGLISH STATESMEN. London: Macmillan & Co. 1888–.

William the Conqueror; by Edward A. Freeman.—Henry the Second; by Mrs. J. R. Green.—Edward the First; by Prof. T. F. Tout.—Henry the Seventh; by James Gairdner.—Cardinal Wolsey; by Bishop Creighton.—Elizabeth; by E. S. Beesly.—Oliver Cromwell: by Frederic Harrison.—William the Third; by H. D. Traill.—Walpole; by John Morley.—Chatham [in preparation]; by John Morley.—Pitt; by Lord Rosebery.—Peel; by J. R. Thursfield.

YONGE, CHARLOTTE M. Cameos from English history. London: Macmillan. 1871–1890. Phil.: Lippincott & Co.

Seven series of clear-cut historical narratives, each quite distinct in subject, but following one another in close relations of time. Many of the subjects are from Continental events which have some close connection with English history. The periods covered by the several series are defined and entitled as follows: 1. Rollo to Edward II.—2. The wars in France.—3. The wars of the Roses.—4. Reformation times.—5. England and Spain. —6. Forty years of Stewart rule.—7. Rebellion and Restoration.

GREAT BRITAIN: EARLY AND MEDIÆVAL.

BROWNE, MATTHEW. Chaucer's England. London: Hurst & Blackett. 1869. 2 v.

CHURCH, R. W. Saint Anselm. London: Macmillan & Co. 1870.

CREIGHTON, MANDELL. Life of Simon de Montfort, Earl of Leicester. London: Rivingtons. 1876.

ELTON, CHARLES. Origins of English history. London: B. Quaritch. 1882.

"An attempt to rearrange in a convenient form what is known of the history of this country from those obscure ages which preceded the Roman invasions to the time when the English accepted the Christian religion."—*Author's opening chapter.*

ENGLISH HISTORY FROM CONTEMPORARY WRITERS: The misrule of Henry III.—Edward III. and his wars.—Strongbow's conquest of Ireland. —Simon de Montfort and his cause.—The Wars of York and Lancaster. London: D. Nutt. 5 v.

FREEMAN, EDWARD A. History of the Norman Conquest of England; its causes and its results. Oxford: Clar Press. 1870. 5 v. and index.

Old English history for children. London: Macmillan & Co. 1869.

An attempt by the late Professor Freeman to make "Old English history" interesting to children, and one in which he did not fail.

The reign of William Rufus and the accession of Henry I. Oxford: Clar. Press. 1882. 2 v.

"Taken as a whole, the seven volumes ['Norman Conquest' and 'William Rufus'] give us such a masterly philosophic analysis and such a picturesque and vivid narrative of the history of England in the eleventh century that it must be pronounced the monumental work upon which Mr. Freeman's reputation will chiefly rest."—John Fiske, *Edward Augustus Freeman* (*Atlantic Monthly, Jan. 1893*).

GAIRDNER, JAMES. History of the life and reign of Richard III. London: Longmans. 1878.

"I have, in working out this subject, always adhered to the plan of placing my chief reliance on contemporary information; and, so far as I am aware, I have neglected nothing important that is either directly stated by original authorities and contemporary records, or that can be reasonably inferred from what they say."—*Author's preface.*

The Houses of Lancaster and York, with the conquest and loss of France. London: Longmans. N. Y.: C. Scribner's Sons.

Belonging in the excellent series of the "Epochs of Modern History"—small, but satisfactory.

GREEN, J. R. The making of England. London: Macmillan & Co. 1881.

The conquest of England. London: Macmillan & Co. 1883.

In the first of these books, Mr. Green has told the story of the Saxons and Angles in England down to the union of the land under Ecgberht; the period of their settlement, "in which their political and social life took the form which it still retains." In the second work he continues the narrative to the Norman conquest.

GREEN, *Mrs.* J. R. Town life in the fifteenth century. London and N. Y.: Macmillan & Co. 1894. 2 v.

"Every page gives proof of careful research, skilful arrangement of facts, and felicitous treatment."—C. J. Robinson, *Review* (*Academy, June* 16, 1894).

GROSS, CHAS. The Gild Merchant; a contribution to British municipal history. Oxford. 1890.

Concededly the best work on the subject.

KEMBLE, JOHN M. The Saxons in England. New edition, edited and revised by W. De Gray Birch. London: B. Quaritch. 1876. 2 v.

"An account of the principles upon which the public and political life of our Anglosaxon forefathers was based, and of the institutions in which those principles were most clearly manifested."—*Author's Preface.*—"Kemble has no narrative work to compare with that of Palgrave; but the 'Saxons in England' may fairly be compared with the 'History of the English Commonwealth.' They are two great works, works of two great scholars, who assuredly are not yet superseded. They will give you two sides of the same general story."—E. A. Freeman, *Methods of Historical Study, p.* 281.

LECHLER, G. John Wiclif and his English precursors; trans. from the German. London: C. K. Paul & Co. 1878. 2 v.

LONGMAN, WILLIAM. History of the life and times of Edward III. London: Longmans. 1869.

MAURICE, C. EDMUND. Lives of English popular leaders in the Middle Ages. London: H. S. King. 1872–5. 2 v.

Stephen Langton, Wat Tyler, John Ball and Sir John Oldcastle are the subjects.

NORGATE, KATE. England under the Angevin kings. London: Macmillan & Co. 1887. 2 v.

"In point of historical scholarship it is rarely indeed that Miss Norgate gives anything to complain of. What strikes us before all things is her firm grasp of facts and authorities. . . . it is a sterling book, one which places its writer very high indeed in the ranks of real scholars."—E. A. Freeman, *Review* (*Eng. Hist. Rev., Oct.*, 1887).

OMAN, CHARLES W. Warwick, the Kingmaker. London: Macmillan & Co. 1891.

An excellent small book on the Wars of the Roses, written for a series entitled "English Men of Action."

PALGRAVE, *Sir* FRANCIS. History of Normandy and England. London: Macmillan & Co. 1851 and 1878. 4 v.

A work which can almost be described as the history of Western Europe from the eighth to the end of the eleventh century, viewed especially in its connection with the movements and settlements of the Northmen.

History of the Anglo Saxons. London: W. Tegg.

Written from studies made more than sixty years ago, and subject now to considerable modification; but it is still valuable, and no later work has quite replaced it.

The rise and progress of the English Commonwealth: Anglo-Saxon period. London: Murray. 1831. 2 v.

See note to Kemble's "Saxons in England," above.

PASTON LETTERS, THE; 1422–1509; a new edition, edited by James Gairdner. London: [E. Arber.] 1872. 3 v.

"A collection of family letters written during the Wars of the Roses, which are now commonly known as the 'Paston Letters,' because most of them were written by or to particular persons of the family of Paston in Norfolk. . . . Mr. Gairdner's introduction of 130 closely printed pages to the first volume, 50 to the second, and 60 to the third, is a book in itself, giving a clear record of the public and private life of England from 1422 to 15 9, so far as they are illustrated by, or illustrate, the 'Paston Letters.'"—H. Morley, *English Writers, v.* 6, *pp.* 253 *and* 261.

PAULI, R. Life of Alfred the Great; trans. from the German by B. Thorpe. London: Bohn. 1853.

PEARSON, CHARLES H. History of England during the Early and Middle Ages. London: Bell & Daldy. 1867. 2 v.

A work of ability which presents views of early English history considerably antagonistic to those of Stubbs, Freeman and Green, especially concerning the destructiveness of the Saxon conquest and the completeness of the break in institutional history which that event produced; also touching the results of the Norman Conquest.

PROTHERO, GEORGE W. Life of Simon De Montfort. London: Longmans. 1877.

RAMSAY, *Sir* JAMES H. Lancaster and York: a century of English history (A. D. 1399–1485). Oxford: Clar. Press. 1892. 2 v.

"'Lancaster and York' is essentially a book of reference, to be at the elbow of every careful student who would know the honest fact, or would be saved indefinite quest through a score of records. . . . We must admit that it is not a readable book."—G. Gregory Smith, *Review* (*Academy, Oct.* 29, 1892).

SELECTED BIBLIOGRAPHY.

RHYS, J. Celtic Britain. London: S. P. C. K. 1882.
A small book, but probably the best that can be found on the subject.

ROUND, J. H. Geoffrey de Mandeville; a study of the Anarchy. London: Longmans. 1892.
Geoffrey de Mandeville, Earl of Essex, played a dishonorable but important part in the strife for the English crown between the Empress Matilda and Stephen of Blois. He is used by Mr. Round as merely a central figure in the most thorough study that has been made of that distressing time of anarchy.

ROWLEY, JAMES. The rise of the People and the growth of Parliament, 1215–1485. London: Longmans.
An interesting outline of the period in which the popular institutions of England were rooted. It is one of the little volumes in the series of the "Epochs of English History."

SCARTH, H. M. Roman Britain. London: S. P. C. K.

SKENE, W. F. Celtic Scotland. Edin.: Edmonston & Douglas. 1876. 3 v.

STUBBS, WILLIAM. Constitutional history of England in its origin and development. Oxford: Clar. Press. 1874–7. 3 v.
"In a long and careful study of the Bishop of Chester's writings, I will not say that I have always agreed with every inference that he has drawn from his evidence; but I can say that I have never found a flaw in the statement of his evidence. . . . After five-and-thirty years' knowledge of him and his works, I can say without fear that he is the one man among living scholars to whom one may most freely go as to an oracle, that we may feel more sure with him than with any other that in his answer we carry away words of truth which he must be rash indeed who calls in question."—E. A. Freeman, *Methods of historical study*, p. 10.

The Early Plantagenets. London: Longmans. 1877.
A little volume in the series of "Epochs of Modern History," contributed by one of the master-historians.

WARBURTON, W. Edward the Third. London: Longmans.
In the series of the "Epochs of Modern History."

WRIGHT, THOMAS. The Celt, the Roman and the Saxon: a history of the early inhabitants of Britain. London: Trübner & Co. 1875.
Particularly a good summary of what is known of the Celtic and Roman periods.

History of domestic manners and sentiments in England during the Middle Ages. London: Chapman & Hall. 1862.

WYLIE, JAMES HAMILTON. History of England under Henry IV. London: Longmans. 1881–94. 2 v. (a third v. to come).
An elaborate and painstaking investigation of the period, producing a useful but not an interesting work.

GREAT BRITAIN: MODERN.

AIRY, OSMUND. The English restoration and Louis XIV.; from the Peace of Westphalia to the Peace of Nimwegen. London: Longmans. N. Y.: C. Scribner's Sons. 1889.

ANSON, *Sir* W. R. Law and custom of the Constitution. Oxford: Clar. Press. 1886.

BACON, FRANCIS, *Lord*. History of the reign of Henry VII. [Works, ed. by Spedding, et al., v. 6.] London: Longmans, 1857–62.

BAGEHOT, WALTER. The English Constitution. London: Chapman & Hall.
Not a history of the English constitution, but an essay in exposition and elucidation of its principles and its practical working. The book is one of the classics of political literature.

BAYNE, PETER. The chief actors in the Puritan Revolution; 2d ed. London: J. Clarke & Co. 1879.

BOURNE, H. R. FOX. English seamen under the Tudors. London: R. Bentley. 1868. 2 v.

Sir Philip Sidney. N. Y.: G. P. Putnam's Sons. 1891. London: T. F. Unwin.
In the series entitled "Heroes of the Nations."

BOUTMY ÉMILE. The English Constitution; trans. from the French, with an introd. by Sir Fred'k. Pollock. London: Macmillan & Co. 1891.

BREWER, J. S. The reign of Henry VIII. from his accession to the death of Wolsey. London: J. Murray. 1884. 2 v.
This work "consists of four different treatises, which were originally published as prefaces to the four volumes of 'Letters and Papers of the Reign of Henry VIII.,' edited by Professor Brewer for the Master of the Rolls. . . . They do not . . . contain a detailed systematic narrative of all that was done in the times of which they treat; but they certainly do contain a review of the reign of Henry VIII. down to the death of Wolsey, as clear sighted as it is comprehensive, drawn from the latest sources of information, carefully collected and arranged by the author himself."—*Preface, by James Gairdner.*

BRIDGET, T. E. Life and writings of Sir Thomas More. London: Burns & Oates. 1891.

BURKE, S. HUBERT. Historical portraits of the Tudor dynasty and the Reformation period. London: J. Hodges. 1879–83. 4 v.
An interesting view of Tudor times and people by a well instructed and fairly candid Roman Catholic student.

BURNET, *Bishop*. History of his own time. London: W. Smith. 1839. 2 v.

BURTON, THOMAS [member in the Parliaments of Oliver and Richard Cromwell from 1656 to 1659]. Diary; ed. by J. T. Rutt. London: H. Colburn. 1828. 4 v.

CARLYLE, THOMAS. Oliver Cromwell's letters and speeches, with elucidations. London: Chapman & Hall. 5 v.

CHAMBERS, ROBERT. History of the rebellion of 1745–6. Edin. 1847.

CHARLES I. Letters to Queen Henrietta Maria; ed. by J. Bruce. London: Camden Soc. 1856.

CLARENDON, EDWARD HYDE, *Earl of*. History of the Rebellion and Civil Wars in England. Oxford. 1849. 7 v.
"What is unique in his case is the value of his facts, as contrasted with, nay as demonstrating, the inconsequence of his reasonings. Other historians, when they go wrong, can be refuted only by reference to other authorities; Clarendon can be answered out of his own lips."—P. Bayne, *Chief Actors in the Puritan Revolution*, p. 475.

COOKE, GEORGE W. History of Party, from the rise of the Whig and Tory factions, in the reign of Charles II., to the passing of the Reform Bill. London: J. Macrone. 1836. 2 v.

CORDERY, B. MERITON, *and* J. S. PHILLPOTTS. King and Commonwealth; a history of Charles I. and the great rebellion. London: Seeley & Co. Phil.: J. H. Coates & Co.
The principal author of this bit of compact, careful historical writing is now better known as Mrs. Bertha M. Gardiner, wife of the historian, Samuel Rawson Gardiner.

CREIGHTON, LOUISE. Life of John Churchill, Duke of Marlborough. London: Rivingtons. 1879.

Life of Sir Walter Raleigh. London: Rivingtons. 1877.

DICEY, A. V. Lectures introductory to the study of the law of the Constitution. London: Macmillan & Co. 1885.

EPOCHS OF ENGLISH HISTORY. London: Longmans. N. Y.: C. Scribner & Co. 8 v. or 1 v.
Early England to the Norman Conquest; by F. York Powell. England a Continental Power, from the Conquest to the Great Charter, 1066–1216; by Mrs. M. Creighton.—The rise of the People and the growth of Parliament, from the Great Charter to the accession of Henry VII., 1215–1485; by James Rowley.—The Tudors and the Reformation, 1485–1603; by Rt. Rev. M. Creighton.—The struggle against absolute Monarchy, 1603–1688; by Mrs. S. R. Gardiner.—The settlement of the Constitution, 1689–1784; by James Rowley.—England during the American and European wars, 1763–1820; by O. W. Tancock.—Modern England, 1820–1885; by Oscar Browning.

FORSTER, JOHN. Statesmen of the Commonwealth of England. London: Longmans. 1840. 7 v.
Biographies of Eliot, Strafford, Pym, Hampden, Vane, Marten, Cromwell. It is now known that the biography of Strafford was written for Forster by Robert Browning, and it has been separately published as Browning's work. "Mr. Forster . . . was not only an historical writer, but his time and energies were also largely absorbed in the journalism of the Whig party of his day, and his treatment of important questions too often betrays the influence of a strong feeling of partisanship."—S. R. Gardiner and J. B. Mullinger, *Introduction to the study of English History*, p. 354.

FROUDE, J. A. History of England, from the fall of Wolsey to the death of Elizabeth. London: Longmans. N. Y.: C. Scribner & Co. 12 v.
"The well-known work of Mr. Froude abounds with graphic descriptions, accompanied by much admirable and just criticism. In its composition he was largely aided by his researches among the archives at Simancas, collections which at that time had been very imperfectly investigated. Unfortunately, the conception he has formed of the character and conduct of Henry VIII. is of so strange and unreal a kind as to deprive this portion of his History of much of its value. The reign of Edward VI. is described with more impartiality, but the policy of Somerset is somewhat harshly judged. . . . The volumes that relate to the reign of Elizabeth are the most valuable part of the work."—S. R. Gardiner and J. B. Mullinger, *Introduction to the study of English History*, p. 325.

Life and times of Thomas Becket. N. Y.: C. Scribner.

GARDINER, S. R. The first two Stuarts and the Puritan revolution, 1603–1660. London: Longmans.
In the series entitled "Epochs of Modern History."

History of England from the accession of James I. to the outbreak of the civil war, 1603–1642. London: Longmans. 1883–4. 10 v.

History of the Great Civil War, 1642–1649. London: Longmans. 1886–94. 3 v.

SELECTED BIBLIOGRAPHY.

GARDINER, S. R. History of the Commonwealth and Protectorate, 1649-1660. London and N. Y.: Longmans. 1894. v. 1.

ed. The constitutional documents of the Puritan revolution. Oxford: Clar. Press. 1889.

GASQUET, FRANCIS AIDAN. Henry VIII. and the English monasteries. London: J. Hodges. 1888. 2 v.

An investigation of facts connected with the suppression of the monasteries, by a learned Roman Catholic.

GEIKIE, C. The English Reformation. London: Strahan & Co. 1879.

GEORGE III. Correspondence with Lord North, from 1768 to 1783. London: J. Murray. 1867. 2 v.

GREVILLE, CHARLES C. F. Memoirs: a journal of the reigns of George IV., William IV., and Victoria. London; Longmans. 1874-88. N.Y.: D. Appleton & Co. 8 v.

The journal is brought to a close in the year 1860.

GUIZOT, F. P. History of Richard Cromwell and the restoration of Charles II.; tr. by A. R. Scoble. London: R. Bentley's Sons. 1856. 2 v.

History of the English revolution of 1640, commonly called the great rebellion; trans. by Wm. Hazlitt. London: H. Bohn. N.Y.: D. Appleton & Co. 1846. 2 v.

Monk; or the fall of the Republic and the restoration of the Monarchy in England in 1660; trans. by A. R. Scoble. London: Bell & Daldy. 1866.

HALE, E. The fall of the Stuarts and Western Europe from 1678 to 1697. London: Longmans. 1876.

A small book in the series entitled "Epochs of Modern History."

HALL, HUBERT. Society in the Elizabethan Age. London: Sonnenschein & Co. 1887.

HALLAM, HENRY. Constitutional history of England, from the accession of Henry VII. to the death of George II. London: J. Murray. 3 v.

HAMILTON, J. A. Life of Daniel O'Connell. London: W. H. Allen & Co. 1888.

HEATON, WILLIAM. The three reforms of Parliament: a history, 1830-1885. London: T. F. Unwin. 1885.

HERBERT OF CHERBURY, EDWARD, *Lord*. History of England under Henry VIII. London: A. Herbert. 1870.

HOSMER, JAMES K. Life of Young Sir Henry Vane, Governor of Massachusetts Bay and leader of the Long Parliament. Boston: Houghton, Mifflin & Co. 1888.

A careful study from original sources of the political career of Sir Henry Vane on both sides of the sea.

HUGHES, THOMAS. Alfred the Great. London: Macmillan & Co.

HUTCHINSON, LUCY. Memoirs of Colonel Hutchinson; rev., with additional notes, by C. H. Firth. London: Nimmo. 1885.

"Hutchinson represented Nottinghamshire in the Long Parliament, taking the parliamentary side; and the narrative throws much light on the conduct of the committees through which Parliament worked, and the machinery whereby it maintained its authority over the whole kingdom."—S. R. Gardiner and J. B. Mullinger, *Introduction to the study of English History*, *p.* 348.

JEPHSON, HENRY. The Platform; its rise and progress. London and N. Y.: Macmillan & Co. 1892. 2 v.

"In 1820 we find the word 'platform' used as describing the place from which the speakers addressed the meeting, and gradually, as we advanced into the present century, the word 'platform,' by a perfectly simple and natural transition, came into general use and acceptation, not merely in the technical sense, as the place from which the speech was made, but as descriptive of the spoken expression of public opinion outside Parliament."—H. Jephson, *The Platform, its rise and progress, introd.*

LECKY, W. E. H. History of England in the 18th century. London: Longmans. 1878-87. N. Y.: D. Appleton & Co. 1878-90. 8 v.

"Mr. Lecky's book ought to have been entitled 'Essays on the Growth of the British Empire during the Eighteenth Century.' . . . He has seized more clearly than most writers the fruitful idea that the importance of the eighteenth century in English history lies in the transformation of England into the British Empire, and further, that no part of British history can be understood unless the development of the Empire be regarded as a whole."—A. V. Dicey, *Lecky's History* (*Nation*, *Apr.* 18, 1878, *p.* 261).

LETTERS AND PAPERS, foreign and domestic, of the reign of Henry VIII., preserved in the Public Record Office, the British Museum and elsewhere in England; arranged and catalogued by J. S. Brewer [after his death by James Gairdner], under the direction of the Master of the Rolls. London: Longmans. 1862-93. 12 v. in 18.

LYALL, *Sir* ALFRED. Warren Hastings. London: Macmillan & Co. 1889.

McCARTHY, JUSTIN. The epoch of Reform, 1830-1850. London: Longmans. 1882.

In the series entitled "Epochs of Modern History."

History of our own times, from the accession of Queen Victoria to the Berlin Congress. London: Chatto & Windus. 1879. 4 v. N. Y.: Harper & Bros. 1880. 2 v.

A most readable narrative of recent history; colored by the national and partisan prejudices of the writer, as every contemporary writing of history is sure to be; but manifestly honest in intention, and a praiseworthy piece of work.

MACKINTOSH, *Sir* JAMES. History of the Revolution in England in 1688; comprising a view of the reign of James II.; completed, to the settlement of the crown, by the editor.

"Almost all the distinguished writers who have treated of English history are advocates. Mr. Hallam and Sir James Mackintosh alone are entitled to be called judges. But the extreme austerity of Mr. Hallam takes away something from the pleasure of reading his learned, eloquent and judicious writings. He is a judge, but a hanging judge, the Page or Buller of the High Court of Literary Justice. His black cap is in constant requisition. . . . Sir James, perhaps, erred a little on the other side. He liked a maiden assize, and came away with white gloves, after sitting in judgment on batches of the most notorious offenders."—Lord Macaulay, *Sir James Mackintosh* (*Essays*).

MAHON, *Lord* (afterwards Earl Stanhope). History of England, comprising the reign of Queen Anne until the Peace of Utrecht, 1701-1713. London: J. Murray. 1870.

History of England from the Peace of Utrecht [1713] to the Peace of Versailles [1783]. London: J. Murray. 7 v.

"Though the volumes of Lord Mahon are distinguished by research and varied learning, by a spirit at once candid, patient, and investigating—though his lordship possesses considerable ability as a narrator, and is a master of a style at once easy, flowing, and thoroughly English, yet with all his calm discrimination, and all his spirit of truth and justice, there is something of the leaven of old Toryism about his tone of thought."—*Fraser's Magazine*, *v.* 51, *p.* 128.

Life of William Pitt. 2d ed. London: J. Murray. 1862. 4 v.

MALLESON, *Colonel* G. B. Lord Clive. Oxford: Clar. Press. 1893.

MARTINEAU, HARRIET. History of England, A. D. 1800-1815; being an introduction to the history of the peace. London: G. Bell & Sons. 1878.

History of the Thirty Years' Peace, A. D. 1816-1846. London: G. Bell & Sons. 1877. 4 v.

A work which is exceedingly heavy reading, and which does not at all sustain the literary reputation of Miss Martineau. It gives, however, the most complete account we have of the thirty years following the Napoleonic wars.

MASSEY, WILLIAM. History of England during the reign of George III. 2d ed., rev. and cor. London: Longmans. 1865. 4 v.

"Mr. Massey is clear, succinct, and nervous. He is a careful and conscientious inquirer, who searches into original and contemporary documents, and who does not take facts or adopt opinions at second hand. Mr. Massey is not a decided party man, though a Liberal in the best sense of the word."—*Fraser's Magazine*, *v.* 51, *p.* 144.—"The work is dispassionate and impartial in its tone."—J. B. Mullinger, *Introd. to the Study of Eng. Hist.*, *pt.* 2, *p.* 394.

MASSON, DAVID. Life of John Milton, narrated in connection with the political, ecclesiastical and literary history of his time. London: Macmillan & Co. 1858-80. 6 v. and index.

"Professor Masson's 'Life of Milton' is an elaborate and often highly interesting study of all the contemporary movements—religious, political, and social—which may be supposed to have influenced the poet's genius or to have moulded the national history." S. R. Gardiner and J. B. Mullinger, *Introduction to the study of English History*, *p.* 336.

MAY, THOMAS ERSKINE. Constitutional history of England since the accession of George III., 1760-1860. London: Longmans. 1861-2. Boston: Crosby & Nichols. 2 v.

A continuation of Hallam's "Constitutional History."

MIGNET, F. A. History of Mary, Queen of Scots. London: R. Bentley & Son. 1887.

MOBERLY, C. E. The early Tudors: Henry VII.; Henry VIII. London: Longmans. N. Y.: C. Scribner's Sons. 1887.

A small book in the series entitled "Epochs of Modern History."

MOLESWORTH, WILLIAM NASSAU. History of England from 1830 to 1874. London: Chapman & Hall. 1874. 3 v.

MORLEY, JOHN. Edmund Burke; a historical study. London: Macmillan & Co. 1867.

SELECTED BIBLIOGRAPHY.

MORLEY, JOHN. Life of Richard Cobden. London: Chapman & Hall. 1881.
A fine piece of biographical writing and the best account existing of the Anti-Corn-Law League and the struggle for free trade in England.

MORRIS, EDWARD E. The age of Anne. London: Longmans. N. Y.: C. Scribner's Sons. 1877.
The early Hanoverians. London: Longmans. N. Y.: C. Scribner's Sons. 1886.
In the series entitled "Epochs of Modern History."

NAPIER, MARK. Montrose and the Covenanters. London: J. Duncan. 1838. 2 v.

PAUL, ALEXANDER. History of reform; a record of the struggle for the representation of the people in Parliament. 2d ed. London: Routledge & Sons. 1884.

PEPYS, SAMUEL. Diary, completely transcribed by the late Rev. Mynors Bright, with Lord Braybrooke's notes; ed. with additions by H. B. Wheatley. London: George Bell & Sons. 1893. 3 v.

PORRITT, EDWARD. The Englishman at home; his responsibilities and privileges. N. Y.: T. Y. Crowell & Co. 1893.

PRIME MINISTERS OF QUEEN VICTORIA; ed. by Stuart J. Reid. London: S. Low, Marston & Co. 1890. N. Y.: Harper & Bros.
Lord Beaconsfield; by J. A. Froude. Lord Melbourne; by Henry Dunckley. Sir Robert Peel; by Justin McCarthy. Gladstone; by G. W. E Russell.—Marquis of Salisbury; by H. D. Traill.—Viscount Palmerston; by the Marquis of Lorne. The Earl of Derby; by Geo. Saintsbury.—The Earl of Aberdeen; by Sir A. Gordon.

RANKE, LEOPOLD VON. History of England, principally in the 17th century; trans. from the German. Oxford: Clar. Press. 1875. 6 v.
The broadest and most philosophical study that has been made of English history in the important period from the Reformation to the Revolution.

SEELEY, J. R. The expansion of England. London: Macmillan & Co. 1883.
A comprehensive and highly suggestive survey of the colonial system of England and of her historical relations to the vast dependent empire that has been organized around her.

SMITH, GOLDWIN. Three English statesmen; a course of lectures on the political history of England. London: Macmillan & Co. 1867. N. Y.: Harper & Bros.
The three English statesmen discussed are Pym, Cromwell and Pitt.

SMITH, R. BOSWORTH. Life of Lord Lawrence. London: Smith, Elder & Co. 1883. 2 v.

SOUTHEY, ROBERT. Life of Nelson. London: J. Murray.

SOUTHEY, ROBERT. Life of Wesley: the rise and progress of Methodism. London: Bell & Daldy. 1864.

STEBBING, W. Sir Walter Raleigh: a biography. Oxford. 1891.

SYDNEY, WILLIAM CONNOR. England and the English in the 18th century. London and N. Y.: Macmillan & Co. 1891. 2 v.

THACKERAY, W. M. The four Georges: sketches of manners, morals, court and town life. London: Smith & Elder. 1861. N. Y.: Harper & Bros.

THORNBURY, G. W. Shakespeare's England; or sketches of our social history in the reign of Elizabeth. London: Longmans. 1856. 2 v.

TODD, ALPHEUS. Parliamentary government in England; its origin, development and practical operation; new ed., abridged and rev. by Spencer Walpole. London: Low, Marston & Co. 1892. 2 v.
A work which has grown steadily in reputation since it first appeared.

TREVELYAN, GEORGE OTTO. Early history of Charles James Fox. London: Longmans. 1880.

TULLOCH, JOHN. English Puritanism and its Leaders. Edin.: W Blackwood & Sons.
Biographical essays on Cromwell, Milton, Baxter and Bunyan.

TWO CENTURIES OF IRISH HISTORY; with introd. by James Bryce. London: K. Paul & Co. 1888.

WAITE, ROSAMUND. Life of the Duke of Wellington. London: Rivingtons. 1878.

WAKELING, G. H. King and Parliament (A. D. 1603–1714). London: Blackie & Son. 1894.
One of a promising series of small books lately undertaken, entitled "Oxford Manuals of English History."

WALPOLE, SPENCER. History of England from the conclusion of the great war in 1815. London: Longmans. 1878–86. 5 v.
"His treatment does not exhibit any of the higher powers of philosophic generalisation; but his research is extensive, and the commercial, economic, and financial questions which now begin to enter more largely than ever into the political history of the nation, are treated with sound judgment and conspicuous moderation."—S. R. Gardiner and J. B. Mullinger, *Introduction to the study of English History*, p. 403.

WOLSELEY, G. J., *Viscount*. Life of John Churchill, Duke of Marlborough, to the accession of Queen Anne. London: R. Bentley & Son. 1894. 2 v.

WRIGHT, THOMAS, *ed.* Queen Elizabeth and her times: a series of original letters. London: H. Colburn. 1838. 2 v.
Letters selected from the unpublished private correspondence of the Lord Treasurer Burghley, the Earl of Leicester, and other distinguished persons of the time.

GERMANY AND AUSTRIA-HUNGARY.

ARNDT, E. M. Werke. Leipzig. 1892–.
Geist der Zeit. Erinnerungen, etc.
All important for age of Napoleon.

ARNETH, A. V. Geschichte Maria Theresias. Wien. 1863–79. 10 v.

BAUMGARTEN, H. Geschichte Karls V. v. 1–3. Stuttgart. 1885–92.
Extends only to 1539.

BENEDETTI, V., *Comte*. Ma Mission en Prusse. Paris. 1871.

BEUST, FRIEDRICH F., *Count von*. Memoirs [1830–1885]. London: Remington & Co. 1887. 2 v.
The memoirs of a statesman who bore the leading part in the reconstruction and reconstitution of the Austrian empire after the Seven Weeks War of 1866 are necessarily important and interesting.

BEZOLD, F. VON. Geschichte der Deutschen Reformation. Berlin. 1887–90.
Theil von Oncken, Allgem. gesch. in Einzeldarstellungen. Highly praised.

BIEDERMANN, K. Dreissig jahre Deutscher geschichte; von der Thronbesteigung Friedrich Wilhelms IV bis zur aufrichtung des neuen Deutschen Kaiserthums. Breslau. 1881–2. 2 v.
Mein Leben und ein Stück Zeitgeschichte. Breslau. 1886–7. 2 v.

BISMARCK, *Fürst*. Gesammelte werke: briefe, reden und aktenstücke; herausg. von B. Walden. 5 v. Berlin. 1892.
Briefe. Eb. 1892.
Politische reden. Historisch-kritische gesammtausgabe besorgt von H. Kohl. Stuttgart. 1892–4. 9 v.

BLUM, *Dr.* Hans. Das Deutsche Reich zur zeit Bismarcks; politische geschichte von 1871 bis 1890. Leipzig und Wien. 1893. v. 1–2.

BOYEN, HERMANN v. Erinnerungen aus dem Leben. Herausgegeben von F. Nippold. Leipzig. 1889–90.
Important for the war of Liberation.

BRACE, CHARLES LORING. Hungary in 1851. New York: C Scribner. 1852.

BRACKENBURY, *Col.* C. B. Frederick the Great. N. Y.: G. P. Putnam's Sons. 1884.
A succinct, clear, well studied military history.

BROGLIE, JACQUES V. A., *Duc de*. Frederick the Great and Maria Theresa; trans. by Mrs. Hoey and J. Lillie. London: Low, Marston & Co. 1883. 2 v.
"Piquant, readable, and full of interesting revelations.'—Herbert Tuttle, *Preface to "Hist. of Prussia under Frederick the Great."*

BROSIEN, H. Preussische geschichte. Abth. 1. Geschichte der Mark Brandenburg im Mittelalter. Leipzig 1887.
Das wissen der gegenwart.

BUCHWALD, G. v. Deutsches gesellschaftsleben im endenden Mittelalter. Kiel. 1885–7. 2 v.

BULLE, C. Geschichte der neuesten zeit, 1815–1871. Leipzig. 1886–7. 4 v.

BUNSEN, CH. K. J., *Freiherr v.* Aus seinen Briefen und nach eigener Erinnerung geschildert, von seiner Witwe. 3 auf., vermehrt von F. Nippold. Leipzig. 1868–71. 3 v.

CARLYLE, THOMAS. History of Friedrich II. of Prussia. London: Chapman & Hall. New York: Harper & Bros.
See note to Tuttle's "History of Prussia," below.

COXE, WM. History of the house of Austria, 1218–1792. London: H. G. Bohn. 3 v.
"Besides being a work of real intrinsic merit, it has the greater distinction of being the only complete history of

SELECTED BIBLIOGRAPHY.

the House of Austria accessible to the reader of English." —C. K. Adams, *Manual of Historical Literature, 3d ed.* p. 283.

DAHLMANN-WAITZ. Quellenkunde der Deutschen geschichte. Göttingen. 1894.
6,550 titles.

DEBIDOUR, A. Histoire diplomatique de l'Europe depuis l'ouverture du congrès de Vienne jusqu'à la clôture du congrès de Berlin (1814–1878). Paris. 1891. v. 1–2.

Weltgeschichte, herausg. von A. Dove u. G. Winter. Leipzig. 1886-8. 9 v.
Extends to 15th century.

SCHACK, A. F. *Graf von.* Ein halbes Jahrhundert Lebenserinnerungen. Stuttgart. 1889.

SCHERER, W. Geschichte der Deutschen Literatur. Berlin. 1891.

SCHILLER, FREDERICK. History of the Thirty Years' War; [also] History of the revolt of the Netherlands to the confederacy of the Gueux; trans. from the German. London: H. G. Bohn.

SEELEY, J. R. Life and times of Stein, or Germany and Prussia in the Napoleonic age. Cambridge: Univ. Press. 1878. 3 v.
The only full, clear, broadly studied account that we have in the English language of the remarkable work of national development, by education and organization, that was begun in Prussia after her prostration by Napoleon, and which made her the nucleus of the Germanic consolidation that has taken place in our own time.

SÉGUR, L. P. History of the reign of Frederic William II., King of Prussia; trans. from the Fr. London: Longmans. 1801. 3 v.

SIME, JAMES. History of Germany. London: Macmillan & Co. N. Y.: H. Holt & Co. 1874.
An excellent brief sketch of German history by one who had been gathering material, during many years, for a larger work, but who died recently without fulfilling his purpose.

SIMON, E. Histoire du Prince de Bismarck (1847-1887). Paris. 1887.
L'empereur Guillaume et son règne. Paris. 1886.
L'empereur Fréderic. Paris. 1888.
L'empereur Guillaume II et la première année de son règne. Paris. 1889.
Emperor William and his reign; trans. from the Fr. London: Remington & Co. 1886. 2 v.

SMITH, THOMAS. Arminius: a history of the German people and of their customs from the days of Julius Cæsar to the time of Charlemagne. London: J. Blackwood & Co. 1861.

STILES, WM. H. Austria in 1848-49. N. Y.: Harper & Bros. 1852-3. 2 v.

STOCKMAR, FRH. v. Denkwürdigkeiten. Braunschweig. 1872.

STOFFEL, *Colonel Baron.* Military reports addressed to the French war minister, 1866-70; trans. at the [English] war office, by Capt. Home. London: 1873.
These are the reports on the organization and efficiency of the Prussian army which might have deterred France from her insane declaration of war in 1870, and saved her from her great humiliation, if Napoleon III. and his reckless ministers had given attention to them.

STRAUSS, G. L. M. Men who have made the new German empire. London: Tinsley Bros. 1875. 2 v.

SYBEL, HEINRICH VON. The founding of the German empire, by William I.; trans. by M. L. Perrin. N. Y.: T. Y. Crowell & Co. 1890-4. 5 v.

SZABAD, EMERIC. Hungary, past and present. Edin.: A. & C. Black. 1854.

TAYLOR, BAYARD. School history of Germany. N. Y.: Appleton & Co. 1874.
A compilation from David Müller's "History of the German People" more condensed than that of Charlton T. Lewis.

TESTA, GIOVANNI B. History of the war of Frederick I. against the communes of Lombardy. London: Smith, Elder & Co. 1877.

TREITSCHKE, H. v. Deutsche Geschichte im 19 Jahrhundert. Leipzig. 1879-95. 5 v.
Extends as yet to 1847.

TRENCH, RICHARD C. Gustavus Adolphus in Germany. 2d ed. London: Macmillan & Co. 1872.
Lectures, two only of which were published in 1865.

TURNER, SAMUEL EPES. Sketch of the Germanic constitution from early times to the dissolution of the empire. N. Y.: G. P. Putnam's Sons. 1888.

TUTTLE, HERBERT. Brief biographies: German political leaders. N. Y.: G. P. Putnam's Sons 1876.
Prince Bismarck; Dr. Falk; President Delbrück; Herr Camphausen; Prince Hohenlohe; Count von Arnim; Herr von Bennigsen; Dr. Simson; Herr Lasker; Herr Windthorst; Dr. Lewe; Herr Schulze-Delitzsche; Herr Jacoby; Herr Rasselmann; Herr Sonnemann; Professors Gneist, Virchow, Treitschke, and Von Sybel.
History of Prussia to the accession of Frederick the Great, 1134-1740. Boston: Houghton, Mifflin & Co. 1884.
Same. Under Frederick the Great, 1740-1756. Boston: Houghton, Mifflin & Co. 1888. 2 v.
In the preface to these last two volumes of his work, which he did not live to complete, Professor Tuttle remarked: "The great name of Carlyle is associated so commandingly with the reign of Frederic the Great that any other writer, who ventures to treat the same subject, is bound to make good in advance his claim to a hearing. . . . But my own faith was shaken when during a residence of several years in Berlin I discovered how inadequate was Carlyle's account, and probably also his knowledge, of the working system of the Prussian government in the last century,—a system which it is absolutely necessary to understand if one desires to know as well why Frederic was able to accomplish what he did, as why his successors failed to accomplish what they undertook."

VÁMBÉRY, ARMINIUS, *and* LOUIS HEILPRIN. The story of Hungary. N. Y.: G. P. Putnam's Sons. 1886. London: T. F. Unwin.
In the series entitled "Story of the Nations."

MONTPENSIER, *M'lle de*. Memoirs [1627–1683]; trans. from the French. London: Henry Colburn. 3 v.

MORRISON, J. COTTER. Madame de Maintenon: an étude. London: Field & Tuer.

PARIS, PAULIN. Études sur François I. Paris: Leon Téchener. 1885. 2 v.

PERKINS, JAMES BRECK. France under Mazarin. N. Y.: G. P. Putnam's Sons. 1886. 2 v.
"About a third of the work is given to Richelieu; about a third (six chapters out of twenty) to the Fronde; and three chapters at the end are of a general nature, upon the administration, society, and religion. The reader lays aside the book with a higher estimate of Mazarin's ability and character. The style is for the most part excellent — serious and perspicuous in discussion and in the delineation of character, animated in narration."—*The Nation, Sept.* 9, 1886.

France under the regency. Boston: Houghton, Mifflin & Co. 1892. London: Macmillan & Co.

LOWELL, EDWARD J. The eve of the French revolution. Boston: Houghton, Mifflin & Co. 1892.
In Mr. Lowell's view, the year 1789 is a date which "marks the outbreak in legislation and politics of ideas which had already been working for a century, and which have changed the face of the civilized world." His book is a thoughtful study of those ideas in their rise and development.

MACDONALD, *Marshal*. Recollections; trans. from the French. London: R. Bentley & Son. 1892. 2 v.

MACDONELL, JAMES. France since the first empire. London: Macmillan & Co. 1879.

MAHAN, *Capt.* ALFRED T. The influence of sea power upon the French revolution and Empire. Boston: Little, Brown & Co. 1892. 2 v.
A book which has produced a new conception of the importance of naval power in history.

MARBOT, *Baron de*. Memoirs [1793–1814]; trans. by A. J. Butler. London: Longmans, Green & Co. 1892. 2 v.
"It is as the vivacious exponent of the spirit of the Grande Armée that he possesses the most serious interest for the historical student. Others have chronicled the deeds of that army, others have contributed to its anecdotic history, others have surpassed him in the skilful narration of its military achievements; but no one except Marbot has so unwittingly but so truly revealed its spirit in all its heroism and its weakness."—H. M. Stephens, *Review* (*Academy*, *May* 21, 1892).

MARCEAU, SERGENT. Reminiscences of a regicide [1751–1847]; ed. by M. C. M. Simpson. London: Chapman & Hall. 1889.

FINLAY, GEORGE. History of Greece; new ed., rev. by H. F. Tozer. London: Macmillan & Co. 1877. 7 v.
"George Finlay, more perhaps than any other modern writer, belongs to the same class as those earlier historians who began a story of remote ages and carried it on into times and scenes in which they were themselves spectators and actors. . . . While Grote put forth volume after volume amid the general applause of scholars, Finlay toiled on at his thankless task, amid every form of neglect and discouragement, till he made a few here and there understand that there was a Roman Empire of the East. Full of faults his book is, in form, in matter, in temper; but it is a great work all the same."—E. A. Freeman, *Methods of Historical Study*, pp. 285–286.

History of the United Netherlands, from the death of William the Silent to the Synod of Dort. N. Y.: Harper & Bros. 1861-8. 4 v.
Life and death of John of Barneveld. N. Y.: Harper & Bros. 2 v.

SELECTED BIBLIOGRAPHY.

"He paints the confused scenes of the period he has chosen to describe—its great and little passions, its atrocious and its noble men, its terrible sieges and picturesque festivals, bridals in the midst of massacres, its fights upon the sea and under the sea, its torture-fires and blood-baths—in vivid colors, with a bold free hand, and with a masterly knowledge of effect. Whatever was dramatic in those fierce conflicts he has siezed; whatever is peculiar or striking in character, he has penetrated; whatever is significant of time or place, he appropriates: while he has never forgotten the great purpose of history, which is, the illustration of moral power."—P. Godwin, *Out of the Past, p.* 439.

PONTALIS, A. L. John DeWitt, Grand Pensionary of Holland. London: Longmans. 1885. 2 v.

POOLE, STANLEY LANE-. The story of Turkey. N. Y.: G. P. Putnam's Sons. London: T. F. Unwin. 1888.

In the series entitled "The Story of the Nations."

The Colonial Era; by George Park Fisher.—The French War and the Revolution; by William Milligan Sloane. (Other volumes in preparation.)

AMERICAN STATESMEN; ed. by John T. Morse, Jr. Boston: Houghton, Mifflin & Co. 1882–93. 25 v.

George Washington; by Henry Cabot Lodge.—Benjamin Franklin; by John T. Morse, Jr.—Samuel Adams; by James K. Hosmer.—Patrick Henry; by Moses Coit Tyler.—John Adams; by John T. Morse, Jr.—Alexander Hamilton; by Henry Cabot Lodge.—Thomas Jefferson; by John T. Morse, Jr.—John Jay; by George Pellew.—Gouverneur Morris; by Theodore Roosevelt.—James Madison; by Sidney Howard Gay.—John Marshall; by Allan B. Magruder.—Albert Gallatin; by John Austin Stevens.—James Monroe; by Daniel C. Gilman.—John Quincy Adams; by John T. Morse, Jr.—John Randolph; by Henry Adams.—Andrew Jackson; by William G. Sumner.—Martin Van Buren; by Edward M. Shepard.—Thomas H. Benton; by Theodore Roosevelt.—Daniel Webster; by Henry Cabot Lodge.—Henry Clay: by Carl Schurz (2 v.).—John C. Calhoun; by Dr. H. von Holst.—Lewis Cass; by Andrew C. McLaughlin.—Abraham Lincoln; by John T. Morse, Jr. (2 v.).

ANDREWS, ELISHA BENJAMIN. History of the United States. N. Y.: C. Scribner's Sons. 1894. 2 v.

Not such a history, either in style of writing or skill of handling, as should have been expected from the President of Brown University, but yet to be welcomed until something better comes to supply the need of an intermediate work, between the school text-books and the histories of special periods.

BANCROFT, GEORGE. History of the United States of America from the discovery of the Continent: author's last revision. N. Y.: Appleton & Co. 1883–5. 5 v. [See, also, next page.]

Ends at the closing of the War of Independence. "The last volumes are limited in scope, giving a history of little but military and diplomatic movements during the Revolution. Perhaps it is as well. Bancroft's talents for the narration of military and diplomatic history were of a very high order. He had great skill in marshalling large arrays of facts, good judgment, and a lucid and picturesque style. On the other hand, a history of popular movements, of public opinion and of the internal development of the United States, would exhibit at the greatest disadvantage the author's faults."—J. F. Jameson, *History of Historical Writing in America, p.* 108.

BANCROFT, HUBERT H. History of the Pacific States of North America. San Francisco: A. L. Bancroft & Co. 1882–90. 34 v.

"From twelve to twenty accomplished linguists, we are told, have been constantly employed in Mr. Bancroft's service since 1869. Secretaries have all this time been reading, translating, summarizing, cataloguing, and indexing the whole collection. The result, attained at the cost of half a million dollars, is a mass of systematized information, such as must make the users and the desirers of historical materials elsewhere deeply envious. . . . Mr. Bancroft has prepared from these materials, and published, a gigantic 'History of the Pacific States of America,' in thirty-four unusually large volumes."—J. F. Jameson, *Hist. of Historical Writing in America, p.* 153.

BOLLES, ALBERT S. Financial history of the United States. N. Y.: D. Appleton & Co. 1879–85. 3 v.

A painstaking piece of work, embodying a large amount of investigation and study, but not very broadly luminous in its discussion of the facts.

BROOKS, ELBRIDGE S. The Century book for young Americans. N. Y.: Century Co. 1894.

Descriptive of the machinery of government at Washington, in its practical working, as seen by an imaginary party of young visitors.

BROOKS, NOAH. Short studies in party politics. N. Y.: C. Scribner's Sons. 1895.

Some first things in American politics.—The passing of the Whigs.—When Slavery went out of Politics.—The Party Platforms of Sixty Years.

BRYANT, WILLIAM CULLEN, *and* SYDNEY H. GAY. Popular history of the United States, to the end of the first century of the Union. N. Y.: Scribner, A. & Co. 1876. 4 v.

Understood to have been substantially the work of Mr. Gay, Mr. Bryant's contribution to it having been very slight. Although it brings nowhere, perhaps, new light from original studies to bear on American history, it is a work of much merit.

BRYCE, JAMES. The American Commonwealth; 3d ed., completely revised, with additional chapters. London and N. Y.: Macmillan & Co. 1895. 2 v.

"One may doubt if such a living picture of Democracy in all its ways, in its strength and its weakness, its dangers and its future, in all its strange nakedness of appearance, and its amazing vitality and force, in its golden hopes, and its simplicity and limitations as of a raw, lucky, inexperienced youth entering on a matchless inheritance for good or for evil, has ever yet been drawn by a competent hand."—Frederic Harrison, *Mr. Bryce's "American Commonwealth" (Nineteenth Century, Jan.*, 1889).

CAMPBELL, DOUGLAS. The Puritan in Holland, England and America.

A work which has commanded attention to the influence exerted by the Dutch on the development of ideas and institutions in the United States, and which has done so with good effect, though with some exaggeration.

COFFIN, CHARLES CARLETON. Building the nation; from the Revolution to the beginning of the war between the states. N. Y.: Harper & Bros. 1883.

For young readers, especially.

DAWES, ANNA L. How we are governed; an explanation of the constitution and government of the United States, for young people. Boston: Lothrop & Co. 1885.

DRAKE, SAMUEL ADAMS. The making of the Great West, 1512–1883. N. Y.: C. Scribner's Sons. 1887.

The making of the Ohio Valley States, 1660–1837. N. Y.: C. Scribner's Sons. 1894.

EPOCHS OF AMERICAN HISTORY; edited by Albert Bushnell Hart. N. Y. and London: Longmans. 1891–3. 3 v.

The colonies, 1492–1750; by Reuben Gold Thwaites.—Formation of the Union, 1750–1829; by Albert Bushnell Hart.—Division and reunion, 1829–1889; by Woodrow Wilson.

FISKE, JOHN. Civil government in the United States considered with some reference to its origins. Boston: Houghton, Mifflin & Co. 1890.

History of the United States for schools. Boston: Houghton, Mifflin & Co. 1894.

FOSTER, W. E. References to the history of Presidential administrations, 1789–1885. N. Y.: Soc. for Pol. Ed. 1885.

HART, ALBERT BUSHNELL. Topical outline of the courses in constitutional and political history of the United States given at Harvard College, 1887–88. Part 1 (1783–1829). Cambridge. 1886.

HIGGINSON, THOMAS WENTWORTH. Larger history of the United States, to the close of Jackson's administration. N. Y.: Harper & Bros. 1886.

SELECTED BIBLIOGRAPHY.

HIGGINSON, THOMAS WENTWORTH. Young folks' history of the United States. Boston: Lee & Shepard. 1875–83.

Always attractive to young readers.

HILDRETH, RICHARD. History of the United States [to the end of the 16th Congress]. N. Y.: Harper & Bros. 1849–51. 6 v.

"A man of very decided convictions, and ardently interested in politics, the Whig editor wrote the 'History of the United States' with a strong partisan bias."—J. F. Jameson, *The History of Historical Writing in America*, *p.* 112.

HINSDALE, B. A. How to study and teach history, with particular reference to the history of the United States. N. Y.: D. Appleton & Co. 1894.

The Old Northwest. N. Y.: T. MacCoun. 1888.

HOLST, *Dr.* H. VON. Constitutional and political history of the United States; trans. from the German. Chicago: Callaghan & Co. 1876–85. 7 v.

v. 1. 1750–1833. State sovereignty and slavery.—v. 2. 1828–1846. Jackson's administration; annexation of Texas.—v. 3. 1846–1850. Annexation of Texas; Compromise of 1850.—v. 4. 1850–1854. Compromise of 1850; Kansas-Nebraska Bill.—v. 5. 1854–1856. Kansas-Nebraska Bill; Buchanan's election.—v. 6. 1856–1859. Buchanan's election; end of the 35th Congress.—v. 7. 1859–1861. Harper's Ferry; Lincoln's inauguration.

JOHNSTON, ALEXANDER. History of American politics. 2d ed. N. Y.: H. Holt & Co. 1884.

Parties and party politics in the United States sketched with a brevity which spoils neither the instructiveness nor the interest.

History of the United States for schools. N. Y.: H. Holt & Co. 1885.

The United States; its history and constitution. N. Y.: C. Scribner's Sons. 1889.

Originally written for the latest edition of the Encyclopædia Britannica, the remarkable excellence of this compact account of the history and constitution of the United States caused its republication separately.

LALOR, J. J., *ed.* Cyclopædia of political science, political economy, and of the political history of the United States. Chicago: Rand, McNally & Co. 1881. 3 v.

MACLAY, EDGAR STANTON. History of the United States navy from 1775 to 1893. N. Y.: D. Appleton & Co. 1894. 2 v.

McMASTER, JOHN BACH. History of the people of the United States from the Revolution to the Civil War. N. Y.: D. Appleton & Co. 1883–95. v. 1–4.

"Mr. McMaster's book is a valuable contribution to our history, and will be the cause of work better than its own. His industrious collection of materials, and his effective arrangement and courageous presentation of them, cannot fail to stimulate other workers in the same field. But he does not always discriminate as to the value of authorities, and his history suffers somewhat in consequence."—Mellen Chamberlain, *McMaster's History* (*Andover Rev.*, *June*, 1886).

POPULAR HISTORY OF THE UNITED STATES OF AMERICA. N. Y.: A. S. Barnes & Co. 1875–8.

A book which has been successful in interesting young readers in American history.

PRATT, MARA L. American history stories. Boston: Educational Pub. Co. 1890. v. 1–4.

For readers of the youngest class, and happily adapted to their taste.

PRESTON, HOWARD W. Documents illustrative of American history (1606–1863). N. Y.: G. P. Putnam's Sons. 1886.

ROOSEVELT, THEODORE. The Winning of the West. N. Y.: G. P. Putnam's Sons. 1889–94. 3 v.

"Before Mr. Roosevelt began his work, there was no satisfactory account of our westward expansion as a whole. . . . Mr. Roosevelt had the historical insight and the good fortune to make use of a vast mass of original material. . . . These abundant materials [he] has used with the skill of a practised historian."—*The Nation*, *March* 28, 1895.

SCHOULER, JAMES. History of the United States of America under the Constitution. N. Y.: Dodd, Mead & Co. v. 1–5.

A sound, painstaking piece of historical work, but without much literary attractiveness.

SMITH, GOLDWIN. The United States; an outline of political history, 1492–1871. N. Y.: Macmillan & Co. 1893.

There is probably no other living man who could put so much into a bird's-eye view of American history, and put it into English of such classical fineness, as Professor Goldwin Smith has done in this little book.

STANWOOD, EDWARD. History of Presidential elections. 2d ed., rev. Boston: Ticknor & Co. 1888.

TUCKER, GEORGE. History of the United States. Phil.: J. B. Lippincott & Co. 1856. 4 v.

By a southern writer and representing the better-minded southern view of events and movements in the first half century of American national history.

WASHINGTON, GEORGE. Writings; coll. and ed. by Worthington C. Ford. N. Y.: G. P. Putnam's Sons. 1889–91. 14 v.

WILSON, WOODROW. Congressional government: a study in American politics. Boston: Houghton, Mifflin & Co. 1885.

WINSOR, JUSTIN, *ed.* Narrative and critical history of America. Boston: Houghton, Mifflin & Co. 1886–9. 8 v.

"With its chapters of historical narrative by our most learned and able historical scholars, each writing upon his own special field, and with its critical essays upon the sources of information, it seems without doubt to be the most important and useful contribution ever yet made to American historical science. It splendidly sums up the historical labors of a century."—J. F. Jameson, *History of Historical Writing in America*, *p.* 156.

UNITED STATES: TO THE CIVIL WAR.

ADAMS, HENRY. History of the United States of America [during the administrations of Jefferson and Madison]. N. Y.: C. Scribner's Sons. 1889–90. 9 v.

ADAMS, JOHN QUINCY. Lives of James Madison and James Monroe, with historical notices of their administrations. Buffalo: G. H. Derby & Co. 1850.

Memoirs, comprising portions of his diary from 1795 to 1848; ed. by Charles Francis Adams. Phil.: J. B. Lippincott & Co. 1874–5. 12 v.

and CHARLES FRANCIS. Life of John Adams; rev. and cor. Phil.: J. B. Lippincott & Co. 1871. 2 v.

ARNOLD, SAMUEL G. History of the State of Rhode Island and Providence Plantations. N. Y.: D. Appleton & Co. 1859. 2 v.

BANCROFT, GEORGE. History of the formation of the Constitution of the United States. N. Y.: D. Appleton & Co. 1882. 2 v.

BEER, GEORGE LOUIS. The commercial policy of England toward the American colonies. N. Y. 1893.

One of the "Studies in History, Economics and Law," ed. by the Faculty of Political Science of Columbia College.

BENTON, THOMAS H. Thirty Years' View; or a history of the working of the American government from 1820 to 1850, chiefly taken from the Congress debates, private papers of General Jackson and speeches of Senator Benton. N. Y.: D. Appleton & Co. 1856. 2 v.

BEVERLEY, ROBERT. History of Virginia [to 1706]; reprinted from the 2d rev. ed. (London, 1722). Richmond: J. W. Randolph. 1855.

BRODHEAD, JOHN R. History of the State of New York. N. Y.: Harper & Bros. 1853–71. 2 v.

BROWN, ALEXANDER, *ed.* The Genesis of the United States; a narrative of the movement in England, 1605–1616. Boston: Houghton, Mifflin & Co. 1890.

A collection of historical manuscripts now first printed, with a reissue of rare contemporaneous tracts, accompanied by brief biographies, portraits, etc.

BUTLER, NICHOLAS MURRAY. Effect of the War of 1812 upon the consolidation of the Union. Balt.: 1887.

Published among the Johns Hopkins University Studies in History and Political Science.

CARRINGTON, HENRY B. Battles of the American Revolution, 1775–1781; historical and military criticism. N. Y.: A. S. Barnes & Co. 1876.

A volume of battle-maps and charts, with notes, to supplement the above, was issued by the same publishers in 1881.

COFFIN, CHARLES CARLETON. The boys of '76: a history of the battles of the Revolution. N. Y.: Harper & Bros. 1877.

Old times in the colonies. N. Y.: Harper & Bros. 1880.

CURTIS, GEORGE T. History of the origin, formation and adoption of the constitution of the United States. N. Y.: Harper & Bros. 1854. 2 v.

DOYLE, J. A. The English in America: Virginia, Maryland and the Carolinas. London: Longmans. 1882.

Same. The Puritan Colonies. London: Longmans. 1887. 2 v.

DWIGHT, THEODORE. History of the Hartford Convention. N. Y.: N. & J. White. 1833.

ELLIS, GEORGE E. The Puritan age and rule in the colony of Massachusetts Bay, 1629–1685. Boston: Houghton, Mifflin & Co. 1888.

FISKE, JOHN. The American Revolution. Boston: Houghton, Mifflin & Co. 1891. 2 v.

The War of Independence. Boston: Houghton, Mifflin & Co. 1889.

The last named of these two is a small book which preceded Dr. Fiske's larger history of the American Revolution, treating the same subject in a simpler way, especially for young readers. There is the same delightful clearness of narrative, and the same large intelligence of view, in both works, and they easily take the first place among histories of the Revolution.

The beginnings of New England; or the Puritan theocracy in its relations to civil and religious liberty. Boston: Houghton, Mifflin & Co. 1889.

The critical period of American history, 1783–89. Boston: Houghton, Mifflin & Co. 1888.

"'It is not too much to say that the period of five years following the peace of 1783 was the most critical moment in all the history of the American people. The dangers from which we were saved in 1788 were even greater than the dangers from which we were saved in 1865.' This proposition Mr. Fiske makes abundantly good, and he has turned it into a text for one of the most interesting chapters of history that has been written for many a day."—John Morley, *Review (Nineteenth Century, Aug.*, 1889).

FORCE, PETER. American Archives; a collection of authentic state papers [etc.], forming a documentary history of the North American colonies. Wash. 1837–48. 9 v.

Only part of the collection, forming the 4th series (1774–1776) and 3 v. of the 5th series, was published.

FRANKLIN, BENJAMIN. Life, written by himself; now first edited, from original mss. and from his printed correspondence, by John Bigelow; 2d ed. rev. and cor. Phil.: J. B. Lippincott. 1884. 3 v.

FROTHINGHAM, RICHARD. The rise of the Republic of the United States. Boston: Little, Brown & Co. 1886.

GOODWIN, JOHN A. The Pilgrim republic; an historical review of the colony of New Plymouth. Boston: Ticknor & Co. 1888.

GRAHAME, JAMES. History of the United States of North America from the plantation of the British colonies to their assumption of national independence. 2d ed. rev. and enl. Phil.: Lea & Blanchard. 1846. 2 v.

GREENE, GEORGE W. The German element in the War of American Independence. N. Y.: Hurd & Houghton. 1876.

Contains biographical sketches of Baron von Steuben and General John Kalb, and an account of the German mercenaries.

Life of Nathanael Greene, major-general in the army of the Revolution. N. Y.: Hurd & Houghton. 1871. 3 v.

HAMILTON, ALEXANDER, JAMES MADISON *and* JOHN JAY. The Federalist; a commentary on the Constitution of the United States; ed. by Henry Cabot Lodge. N. Y.: G. P. Putnam's Sons. 1892.

HAMILTON, JOHN C. Life of Alexander Hamilton, by his son. N. Y.: D. Appleton & Co. 1840. 2 v.

HENRY, WILLIAM WIRT. Patrick Henry: life, correspondence and speeches. N. Y.: C. Scribner's Sons. 1891. 3 v.

HUTCHINSON, THOMAS. History of the Colony of Massachusetts Bay, 1628–1691. Boston. 1764.

History of the Province of Massachusetts Bay, 1691–1750. Boston. 1767.

History of the Province of Massachusetts Bay, 1749–1774. London: J. Murray. 1828.

IRVING, WASHINGTON. Life of George Washington. N. Y.: G. P. Putnam. 5 v.

Life of Washington; abridged for schools, with a brief outline of United States history, by John Fiske. Boston: Ginn & Co. 1887.

JOHNSON, ROSSITER. History of the French war, ending in the conquest of Canada. N. Y.: Dodd, Mead & Co. [1882.]

History of the war of 1812–'15. N. Y.: Dodd, Mead & Co. [1882.]

JOHNSTON, HENRY P. The campaign of 1776 around New York and Brooklyn. Brooklyn: L. I. Hist. Soc. 1878.

The Yorktown campaign and the surrender of Cornwallis, 1781. N. Y.: Harper & Bros. 1881.

JONES, THOMAS. History of New York during the Revolutionary War, and of the leading events in the other colonies at that period; ed. by E. F. De Lancey. N. Y.: N. Y. Hist. Soc. 1879. 2 v.

A loyalist history of the Revolution, by one of the Judges of the Supreme Court of the Province of New York, who wrote his account soon after the close of the war, being then in exile.

GIDDINGS, JOSHUA R. History of the Rebellion, its authors and causes. N. Y.: Follett, Foster & Co. 1864.

Really a Congressional history of the years preceding the Rebellion.

GORDON, GEORGE H. History of the campaigns of the Army of Virginia under John Pope, 1862. Boston: Houghton, Osgood & Co. 1880.

GRANT, ULYSSES S. Personal memoirs. N. Y.: C. L. Webster & Co. 1885–6. 2 v.

"Nine-tenths of the value of autobiography is in the revelation of the writer himself to the world. This book is no exception to the rule. The history of his campaigns may be got elsewhere. Badeau's book is more full and has scarcely less of Grant's authority, for he revised its statements and certified that it contained his views. . . . It is, then, for the new light which they throw upon Grant himself that these memoirs will be prized. His personality was too strong to be hidden. When he took his pen to tell the story of his career, the things which flowed most easily from his mind were the judgments and opinions of men and of events in the gross, and not the detailed incidents which the experienced writer would use to fill and color his narrative. . . . As to his style, it has the principal element of thoroughly good writing, since we are made to feel that the writer's only thought, in this regard, is how to express most directly and simply the thing he has to say."—J. D. Cox, *Review* (*Nation*, *Feb.* 25, 1886).

GREELEY, HORACE. The American conflict: a history of the Great Rebellion in the United States of America, its causes, incidents and results. Hartford: O. D. Case & Co. 1867. 2 v.

A hurried and careless piece of work, poor in style and quite unworthy of the eminent journalist who produced it, but valuable as a document representing the views and feelings of the time.

HALE, EDWARD E., *ed.* Stories of war, told by soldiers. Boston: Roberts Bros. 1879.

* This bibliography has been prepared by Mr. Alan C. Reiley, who writes the following explanatory note: "The original purpose of this bibliography was simply to bring together in a group by themselves the atlas works on historical geography; but the fact that all of the contributions to the literature of the subject do not exist in map form requires a slight expansion of the original plan. The list contains, therefore, in addition to the atlases, a number of carefully chosen text works, some of them not devoted exclusively to historical geography, but that subject forming in all them a predominant feature. The term 'historical geography' as here used refers distinctly to the geography of history, preferably the political geography of history, and all of the much more numerous class of works on what may be called the history of geography, save as they may in some feature fall within the strict interpretation of this definition, have been carefully excluded."

Mr. Reiley is not responsible for the typographical style in which German titles are printed.
